

Figure S1. Relative changes in JIP-test parameters after 15 d of Cd₀ treatment. (a) TR₀/ABS, ET₀/ABS, RE₀/ABS, ET₀/TR₀, RE₀/TR₀ and RE₀/ET₀; (b) ABS/RC, TR₀/RC, ET₀/RC, DI₀/RC; (c) ABS/CS₀, TR₀/CS₀, ET₀/CS₀, DI₀/CS₀, RC/CS₀; (d) PI_{ABS}. The average of five replicates is used as the value, and the error was determined based on this value ($n = 5$).
