

Supplementary Figures and Tables

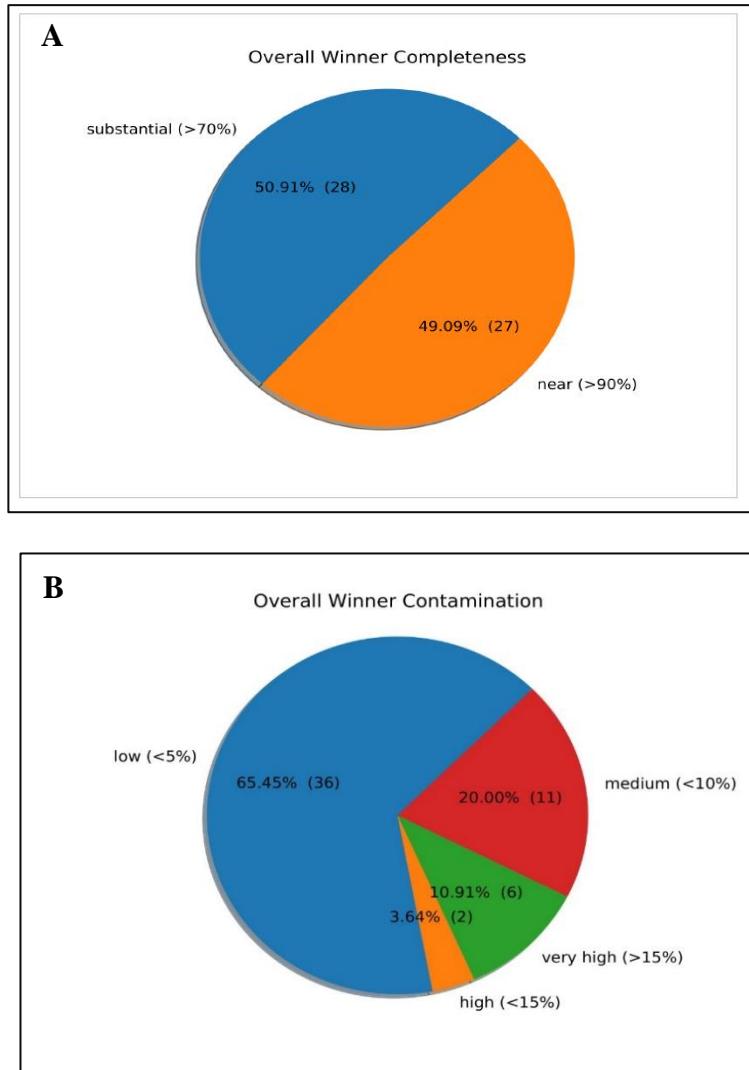

Figure S1. Overall winner MAGs produced from the SRS soils. About 254 individual bins were recovered from the SRS soil samples; however, 49 MAGs were selected based on the >75 completion (A) and < 25 contamination level (B).

Table S1 Winning Genome information with Marker lineage reconstructed after dRep analysis on the MAG generated from SRS samples with varying uranium concentrations collected at different seasons. 55 MAGs with completeness >75% and contamination <25%, accounting for 21.6% of the total MAGs were reconstructed.

Table S2. Analysis performed on the MAGs of *Arthrobacter oryzae* using the KBase bioinformatics pipeline.

Function Role	Gene count	Subsystem Name	Subsystem Class
ATP-dependent DNA helicase RecQ	6	DNA repair, bacterial RecFOR pathway	DNA processing
ATP-dependent DNA helicase SCO5183	2	DNA repair, bacterial RecBCD pathway	DNA processing
ATP-dependent DNA helicase SCO5184	4	DNA repair, bacterial RecBCD pathway	DNA processing
DNA integrity scanning protein DisA	2	DNA repair, bacterial	DNA processing
DNA polymerase like protein MT3142	4	DNA repair, bacterial	DNA processing
DNA recombination and repair protein RecF	2	DNA repair, bacterial RecFOR pathway	DNA processing
DNA recombination and repair protein RecO	2	DNA repair, bacterial RecFOR pathway	DNA processing
DNA recombination protein RmuC	2	DNA repair, bacterial	DNA processing
DNA repair helicase	2	Potential DNA repair cluster	DNA processing
DNA repair protein RadA	2	DNA repair, bacterial	DNA processing
DNA repair protein RecN	2	DNA repair, bacterial rRNA modification related cluster including tlyA	DNA processing
Endonuclease VIII	4	DNA repair base excision	DNA processing
Error-prone repair protein UmuD	2	DNA repair, bacterial UmuCD system	DNA processing
Excinuclease ABC subunit A	4	DNA repair, UvrABC system	DNA processing
Excinuclease ABC subunit A parlog of unknown function	6	DNA repair, UvrABC system	DNA processing
Excinuclease ABC subunit B	4	DNA repair, UvrABC system	DNA processing
Excinuclease ABC subunit C	2	BarA-UrvY(SirA) two component regulatory system DNA repair, uvrABC system	Regulation and Cell signaling DNA processing

Table S3. Number and types of specialized genes found in the MAG of *Arthrobacter oryzae*.

	Source	Genes
Antibiotic Resistance	CARD	2
Antibiotic Resistance	PATRIC	32
Drug Target	DrugBank	6
Drug Target	TTF	2
Transporter	TCDB	1
Virulence Factor	PATRIC_VF	4
Virulence Factor	Victors	1
