humanproteinatlas

Supplementary Figure S2. Quantitative RT-PCR analysis of 35-day old HCOs. (A) Day 35 organoids were analyzed using primers for the small intestinal genes DPEP1, DPP4 and APOB. Data is presented as mean \pm standard error. N=3 biological replicates per genotype. (B) Human protein atlas data showing tissue specific mRNA levels of genes tested in (A). * denotes p value <0.05. ** denotes p value <0.01.
