submissions:

1 July 2024

Message from the Guest Editors

Dear Colleagues,

The development and progression of obesity is a multifaceted issue with varied etiology. As such, the management, mitigation, and prevention of obesity requires a comprehensive approach encompassing multiple sectors of society. This Special Issue will focus on the “Development and Management of Obesity: Social Systems,” as it pertains to the interplay of policies, systems, and environments that either mitigate or contribute to obesity. The focus of this Issue will highlight social and food justice, the built environment, and progressive policies and programs that emphasize community and/or public health, entitlement programs, and other social safety nets. Submissions can include any targeted demographic group across the lifespan.

Message from the Editor-in-Chief

Addressing the environmental and public health challenges requires engagement and collaboration among clinicians and public health researchers. Discovery and advances in this research field play a critical role in providing a scientific basis for decision-making toward control and prevention of human diseases, especially the illnesses that are induced from environmental exposure to health hazards. *IJERPH* provides a forum for discussion of discoveries and knowledge in these multidisciplinary fields. Please consider publishing your research in this high quality, peer-reviewed, open access journal.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, PubMed, MEDLINE, PMC, Embase, GEOBASE, CAPus / SciFinder, and other databases.

Journal Rank: CiteScore - Q1 (*Public Health, Environmental and Occupational Health*)
