

Supplementary Materials: Establishing the Link Across the Synthesis Reaction Kinetics, Structural Changes, and Photocatalytic Efficiency of an Enhanced Chitosan-Clay (1:3) Nanocomposite

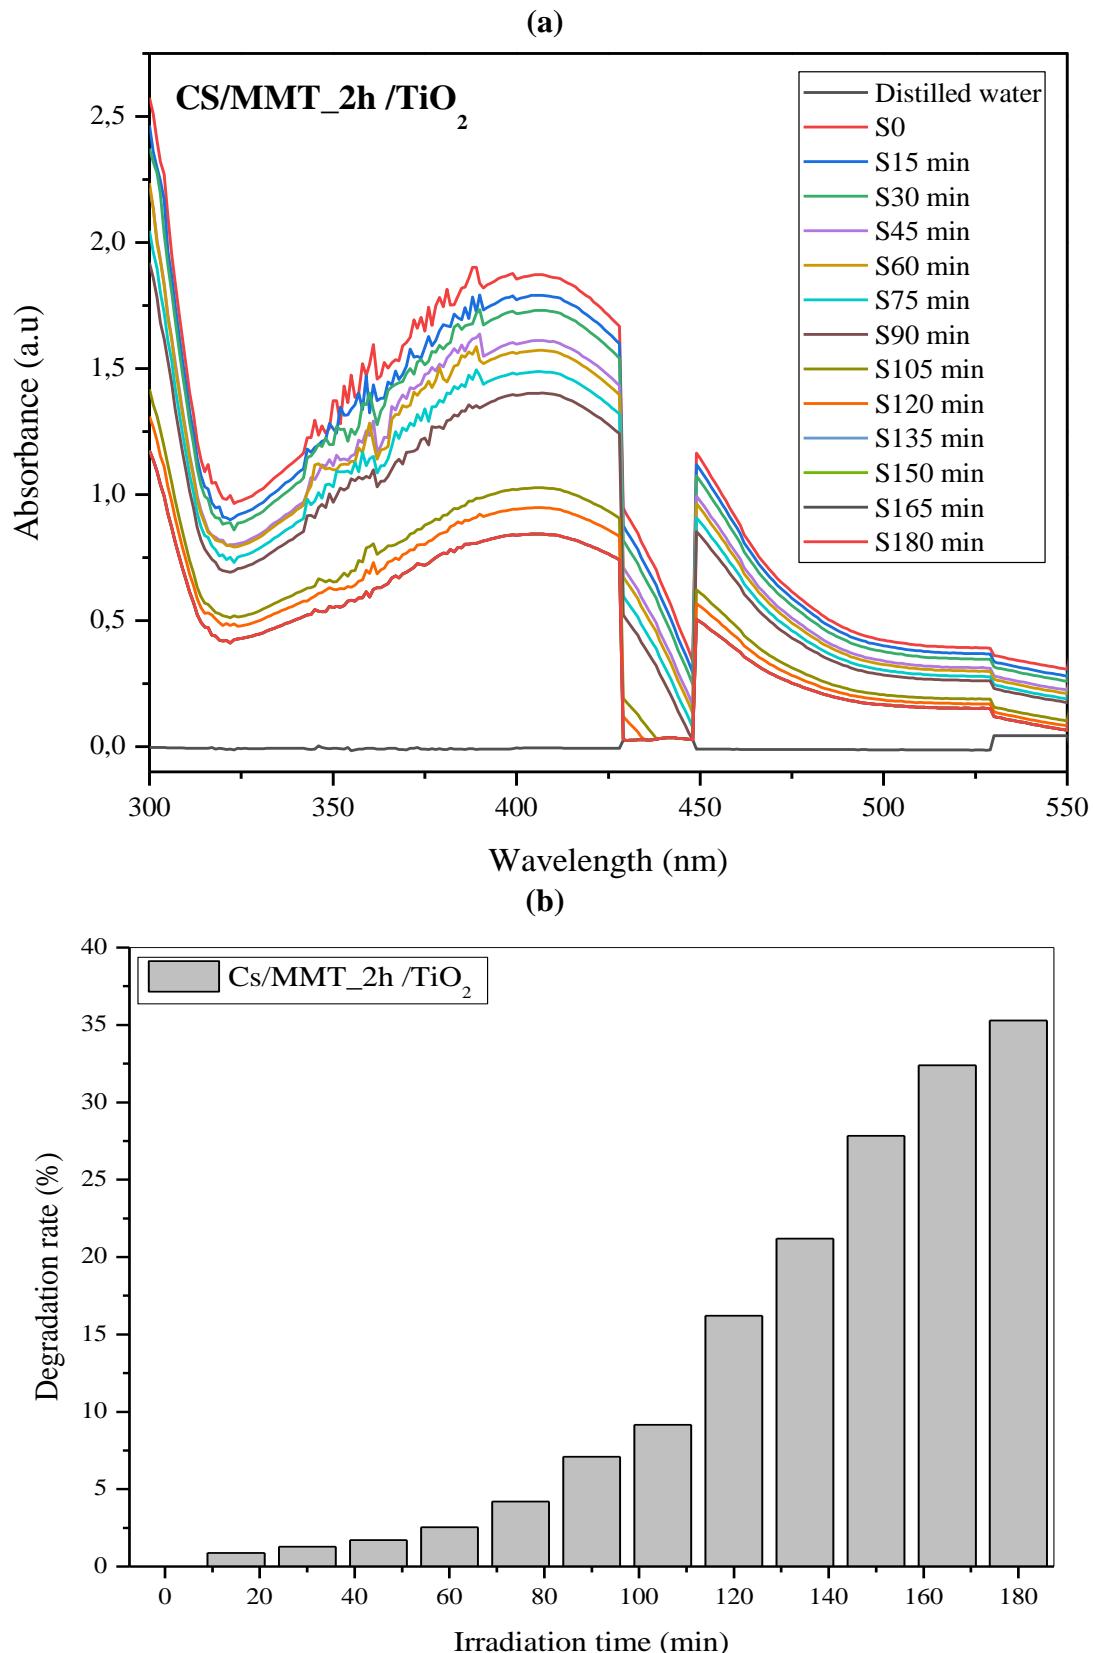

Wael ALBOUCHI, Malek Lahbib, Chadha MEJRI , Sana JEBALI, Mahdi Meftah, Walid OUESLATI* 

Table S1: The commercialized CS specifications given by the supplier (Glentham life sciences (Wiltshire, UK))

Commercialized CS Specifications	Value
Degree of Deacetylation	$\geq 90.0\%$
Sulphated Ash	$\leq 1.0\%$
Viscosity (1% in 1% AcOH, 20°C)	from 100 - 300 cps
Water	$\leq 8.0\%$
Solubility (in acetic acid)	$\leq 99\%$
pH (1% in water, 20°C)	6.0 - 8.0

Supplementary Materials: Establishing the Link Across the Synthesis Reaction Kinetics, Structural Changes, and Photocatalytic Efficiency of an Enhanced Chitosan-Clay (1:3) Nanocomposite

Wael ALBOUCHI, Malek Lahbib, Chadha MEJRI , Sana JEBALI, Mahdi Meftah, Walid OUESLATI*

Supplementary Materials: Establishing the Link Across the Synthesis Reaction Kinetics, Structural Changes, and Photocatalytic Efficiency of an Enhanced Chitosan-Clay (1:3) Nanocomposite

Wael ALBOUCHI, Malek Lahbib, Chadha MEJRI , Sana JEBALI, Mahdi Meftah, Walid OUESLATI*

Figure S1: To be continued.

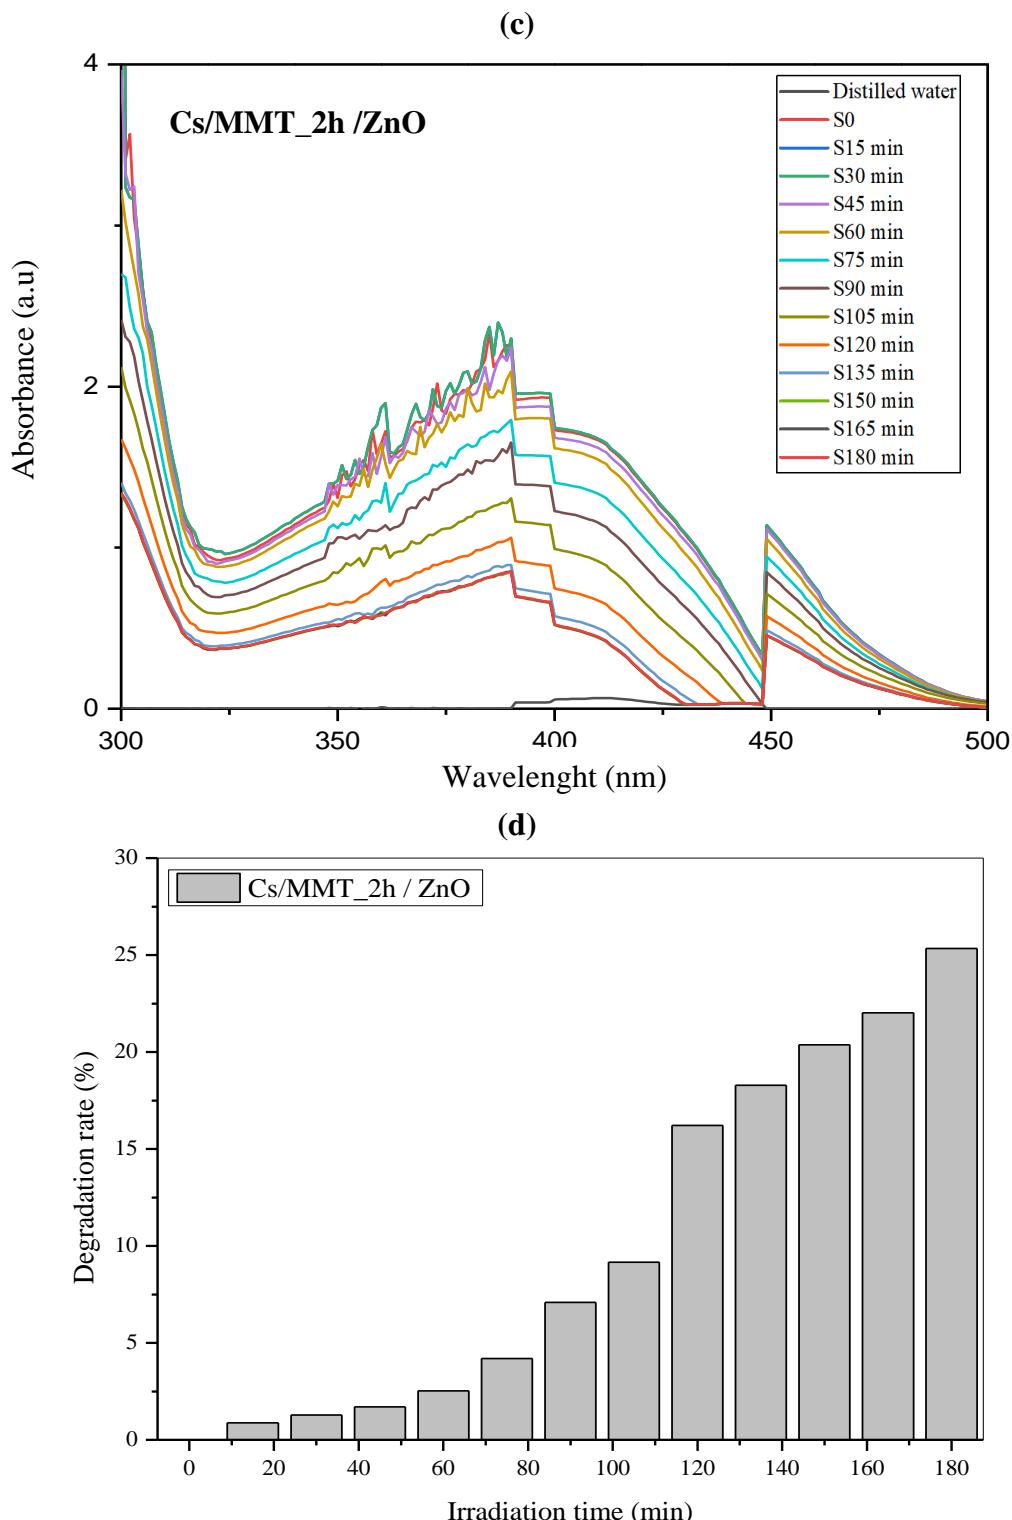

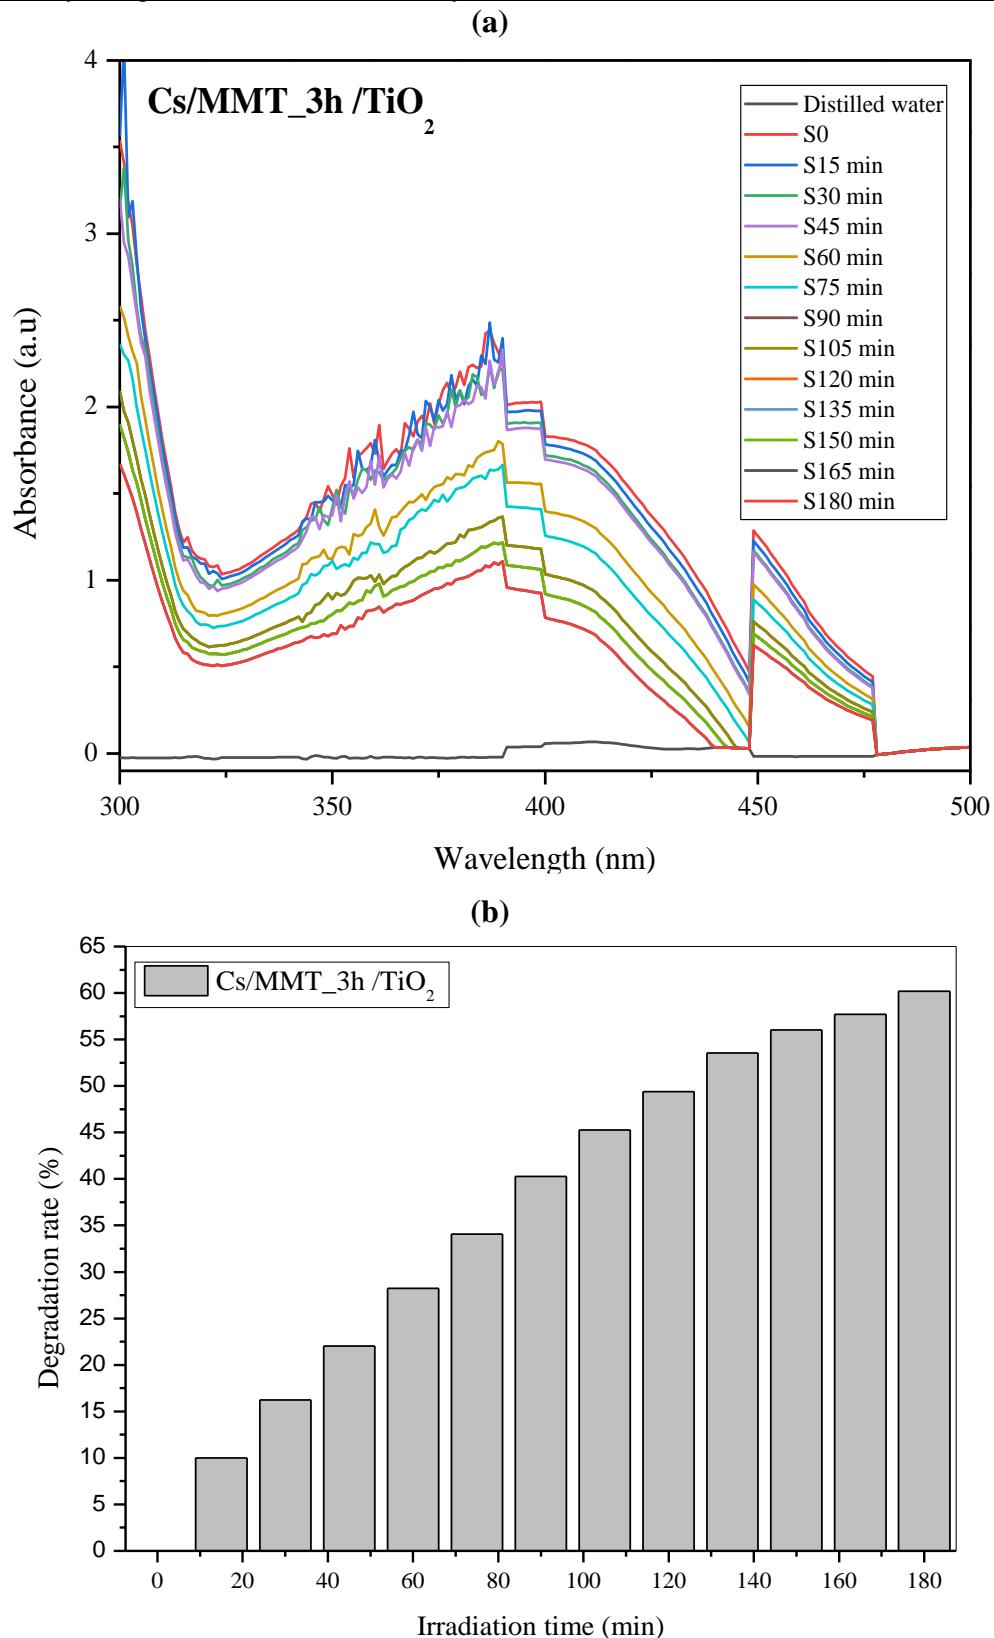

Figure S1: (a) Catalytic degradation of CBY3G-P by Cs/MMT nanocomposites 2h in the presence of TiO₂, (b) Photocatalytic degradation rate of CBY3G-P dye on Cs/MMT, TiO₂ 2h under 180 min of irradiation, (c)

Supplementary Materials: Establishing the Link Across the Synthesis Reaction Kinetics, Structural Changes, and Photocatalytic Efficiency of an Enhanced Chitosan-Clay (1:3) Nanocomposite

Wael ALBOUCHI, Malek Lahbib, Chadha MEJRI , Sana JEBALI, Mahdi Meftah, Walid OUESLATI*

Catalytic degradation of CBY3G-P by Cs/MMT nanocomposites 2h in the presence of ZnO, and (d) Photocatalytic degradation rate of CBY3G-P dye on Cs/MMT, ZnO 2h under 180 min of irradiation.

Supplementary Materials: Establishing the Link Across the Synthesis Reaction Kinetics, Structural Changes, and Photocatalytic Efficiency of an Enhanced Chitosan-Clay (1:3) Nanocomposite

Wael ALBOUCHI, Malek Lahbib, Chadha MEJRI , Sana JEBALI, Mahdi Meftah, Walid OUESLATI*

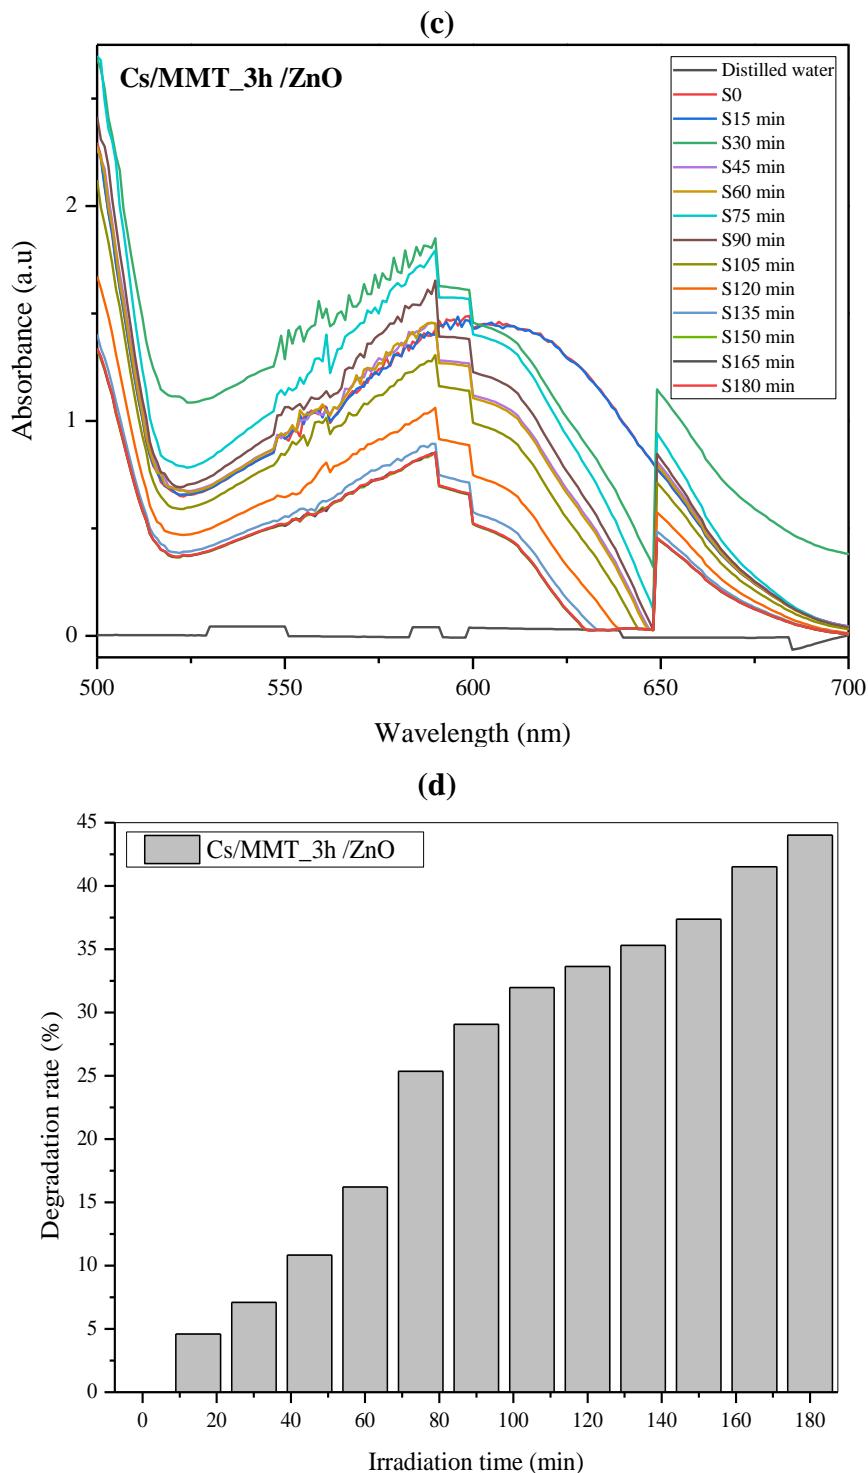

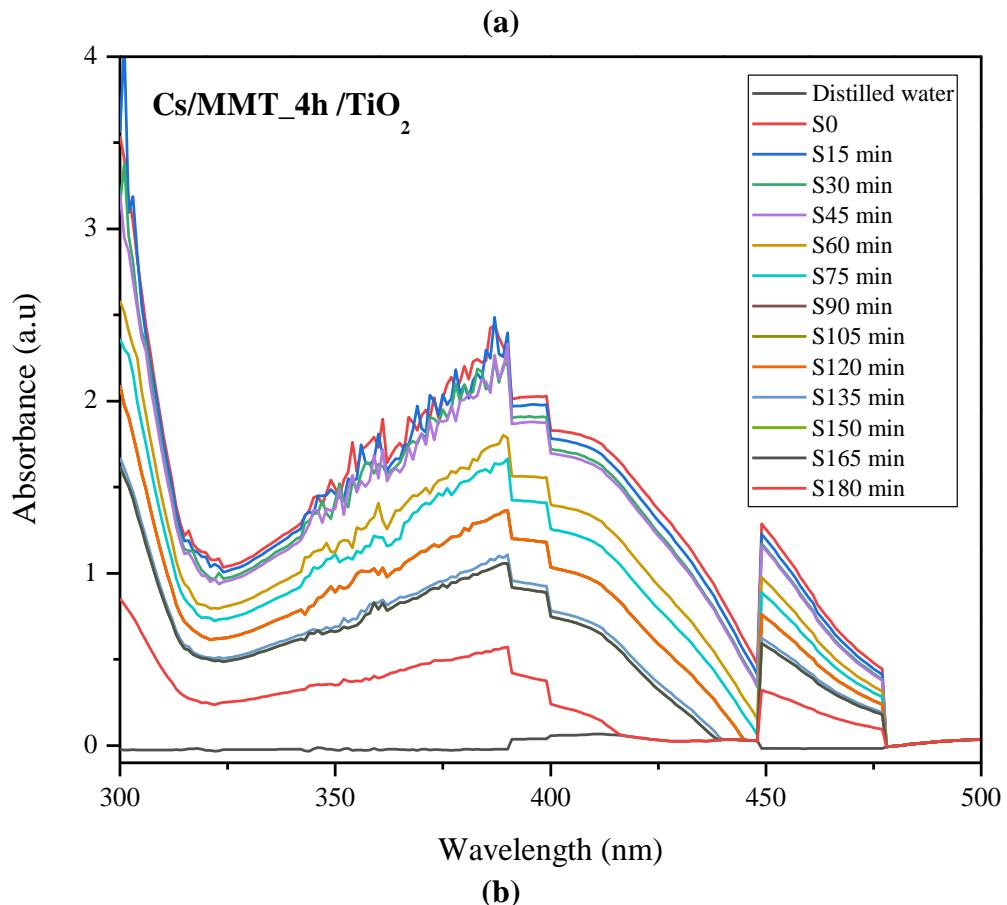

Figure S2: (a) Catalytic degradation of CBY3G-P by Cs/MMT nanocomposites 3h in the presence of TiO_2 , (b) Photocatalytic degradation rate of CBY3G-P dye on Cs/MMT, TiO_2 3h under 180 min of irradiation, (c)

Supplementary Materials: Establishing the Link Across the Synthesis Reaction Kinetics, Structural Changes, and Photocatalytic Efficiency of an Enhanced Chitosan-Clay (1:3) Nanocomposite

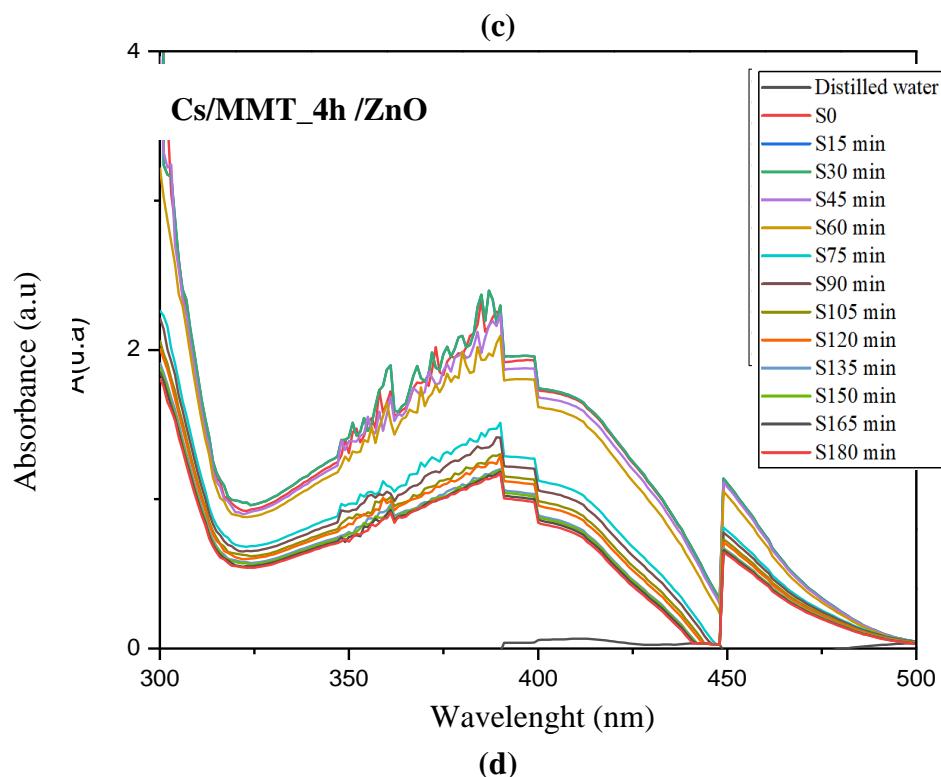

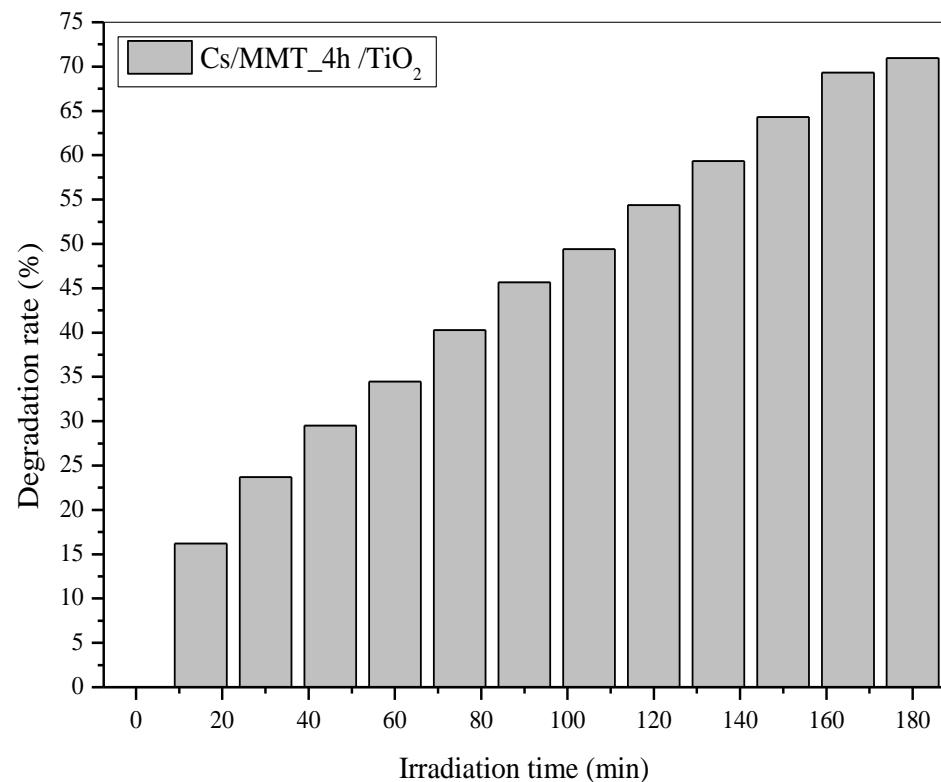

Wael ALBOUCHI, Malek Lahbib, Chadha MEJRI , Sana JEBALI, Mahdi Meftah, Walid OUESLATI* 

Catalytic degradation of CBY3G-P by Cs/MMT nanocomposites 3h in the presence of ZnO, and (d)
Photocatalytic degradation rate of CBY3G-P dye on Cs/MMT, ZnO 3h under 180 min of irradiation.

Supplementary Materials: Establishing the Link Across the Synthesis Reaction Kinetics, Structural Changes, and Photocatalytic Efficiency of an Enhanced Chitosan-Clay (1:3) Nanocomposite

Wael ALBOUCHI, Malek Lahbib, Chadha MEJRI , Sana JEBALI, Mahdi Meftah, Walid OUESLATI* 

Supplementary Materials: Establishing the Link Across the Synthesis Reaction Kinetics, Structural Changes, and Photocatalytic Efficiency of an Enhanced Chitosan-Clay (1:3) Nanocomposite

Wael ALBOUCHI, Malek Lahbib, Chadha MEJRI , Sana JEBALI, Mahdi Meftah, Walid OUESLATI*

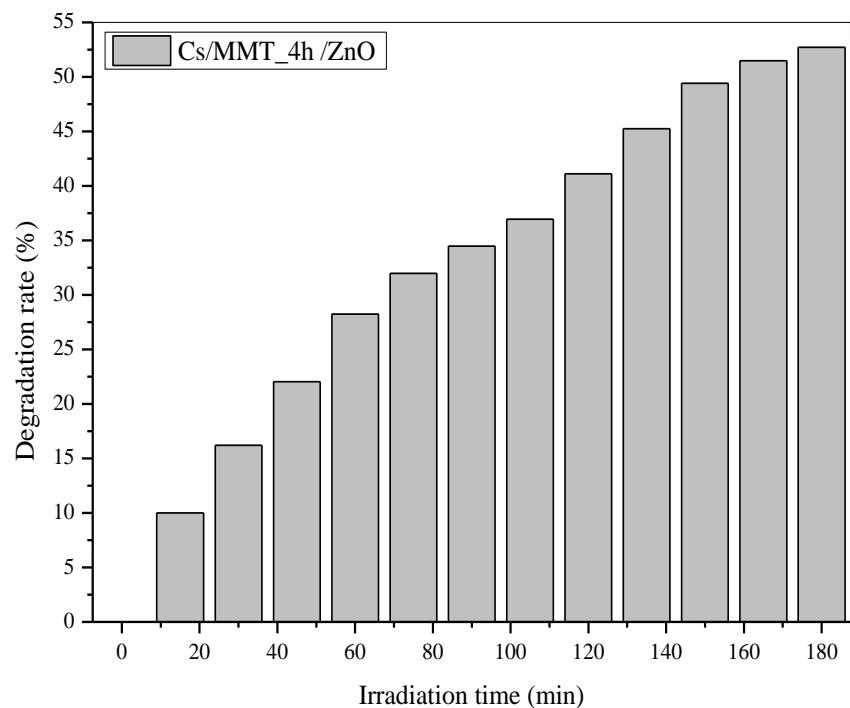

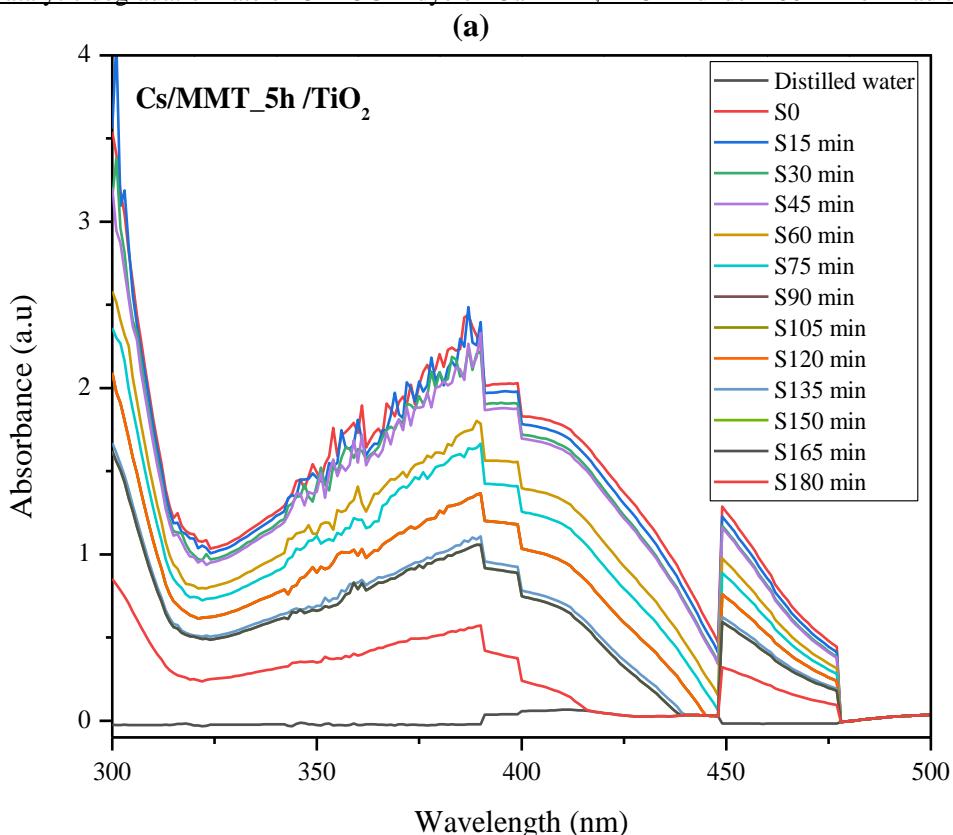

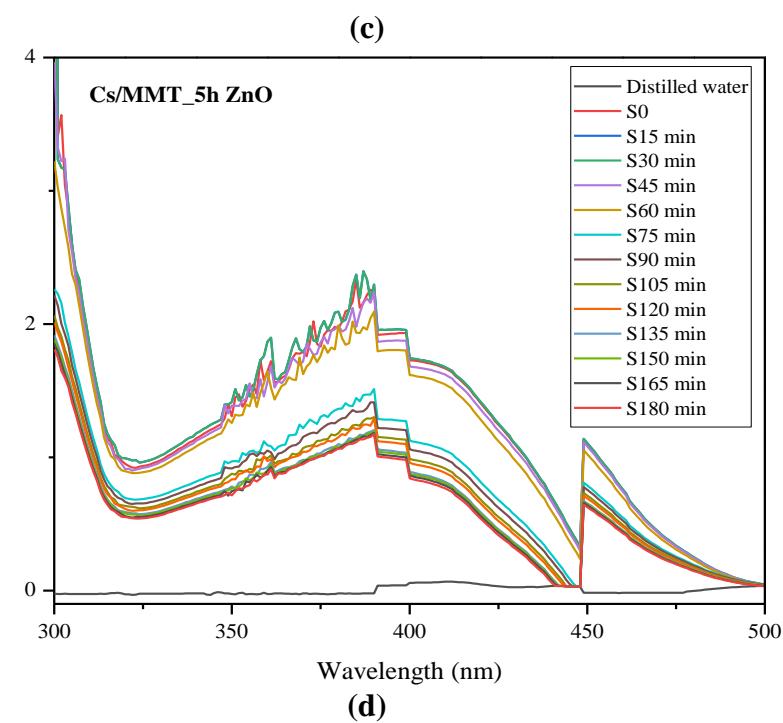

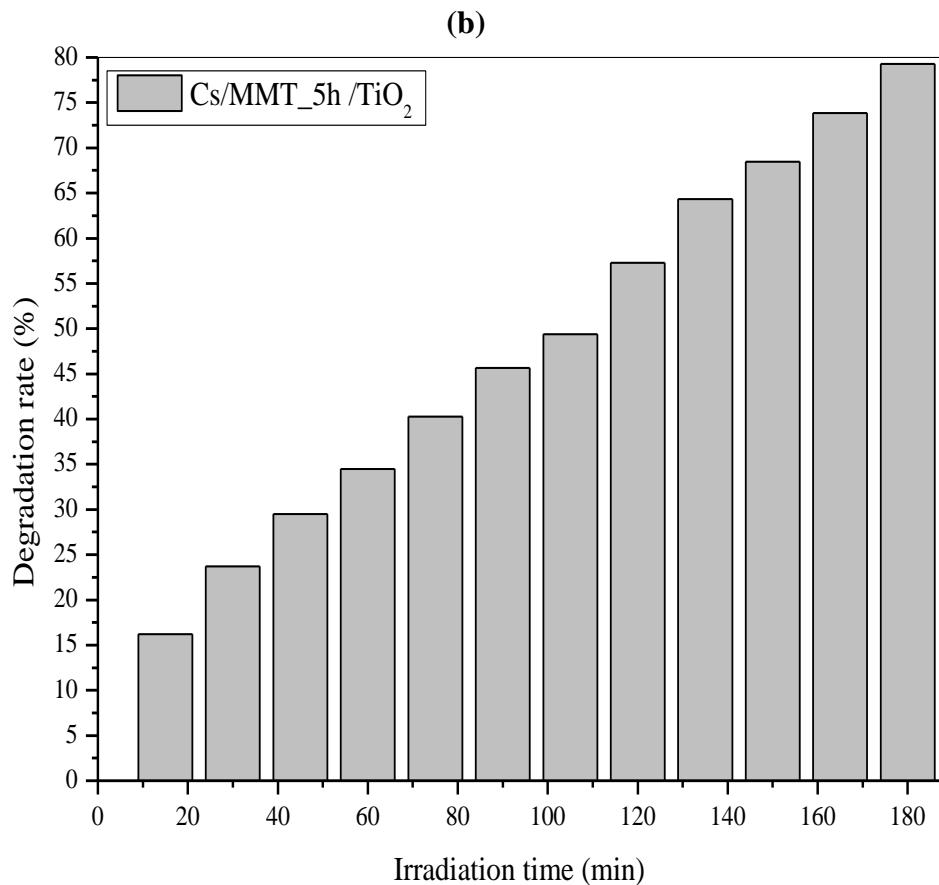

Figure S3: (a) Catalytic degradation of CBY3G-P by Cs/MMT nanocomposites 4h in the presence of TiO₂, (b) Photocatalytic degradation rate of CBY3G-P dye on Cs/MMT, TiO₂ 4h under 180 min of irradiation, (c) Catalytic degradation of CBY3G-P by Cs/MMT nanocomposites 4h in the presence of ZnO, and (d) Photocatalytic degradation rate of CBY3G-P dye on Cs/MMT, ZnO 4h under 180 min of irradiation.

Supplementary Materials: Establishing the Link Across the Synthesis Reaction Kinetics, Structural Changes, and Photocatalytic Efficiency of an Enhanced Chitosan-Clay (1:3) Nanocomposite

Wael ALBOUCHI, Malek Lahbib, Chadha MEJRI , Sana JEBALI, Mahdi Meftah, Walid OUESLATI* 

Supplementary Materials: Establishing the Link Across the Synthesis Reaction Kinetics, Structural Changes, and Photocatalytic Efficiency of an Enhanced Chitosan-Clay (1:3) Nanocomposite

Wael ALBOUCHI, Malek Lahbib, Chadha MEJRI , Sana JEBALI, Mahdi Meftah, Walid OUESLATI* 

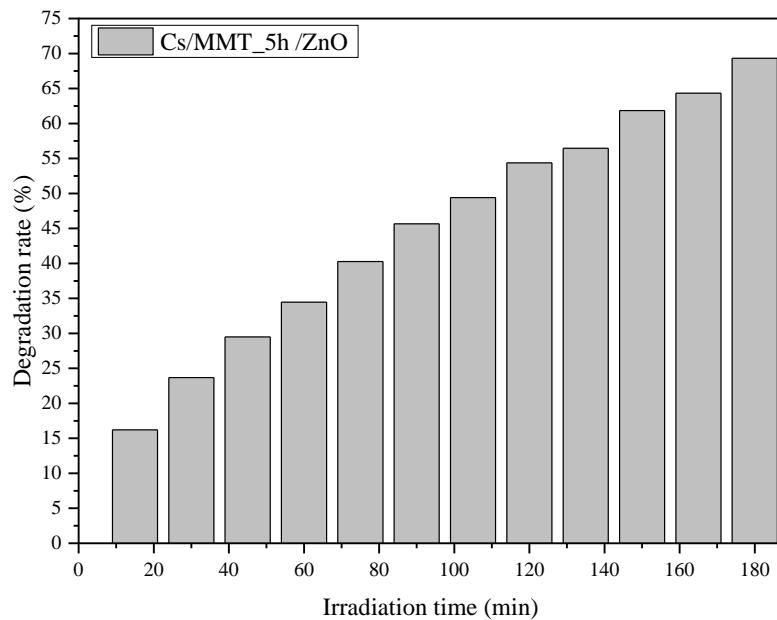

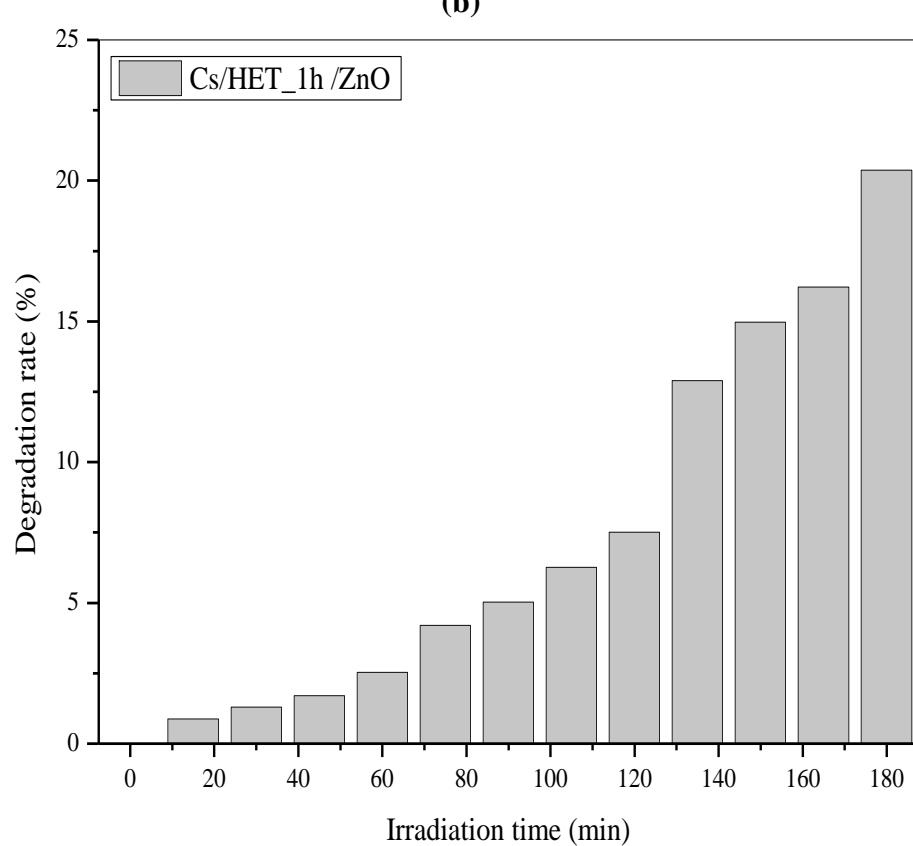

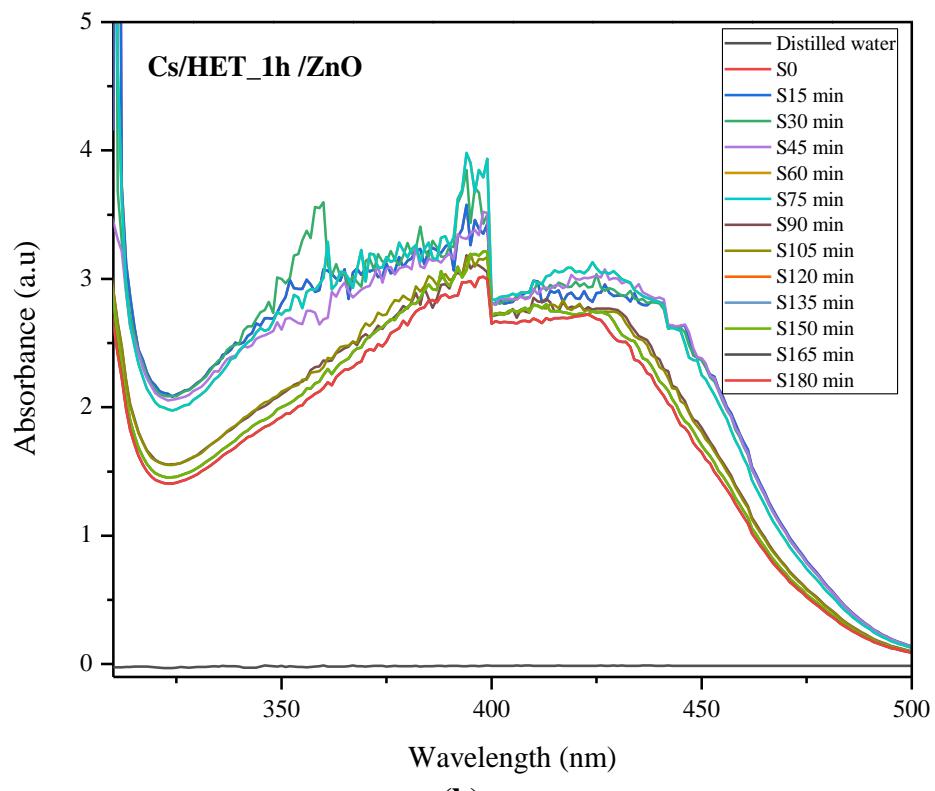

Figure S4: (a) Catalytic degradation of CBY3G-P by Cs/MMT nanocomposites 5h in the presence of TiO_2 , (b) Photocatalytic degradation rate of CBY3G-P dye on Cs/MMT, TiO_2 5h under 180 min of irradiation, (c) Catalytic degradation of CBY3G-P by Cs/MMT nanocomposites 5h in the presence of ZnO , and (d) Photocatalytic degradation rate of CBY3G-P dye on Cs/MMT, ZnO 5h under 180 min of irradiation.
