We just became aware that the article [1] published in Entropy 2009 contains a *false reference*. From the list of references in [1] one gets the impression that the manuscript [2] has been *accepted* for publication in the journal Biophysical Chemistry. We have contacted the editors of that journal and they could tell us that [2] is a *rejected* manuscript, which is also the reason why the manuscript does not appear on the journal's homepage. Following the editorial policy of Entropy we do not make any changes in an already published paper, so we have to bring this correction instead.
