

# Supplementary Materials: Essential Oil Variation of Twenty Two Genotypes of *Citrus* in Brazil—Chemometric Approach and Repellency Against *Diaphorina citri* Kuwayama

Moacir dos Santos Andrade, Leandro do Prado Ribeiro, Paulo Cesar Borgoni,  
Maria Fátima das Graças Fernandes da Silva, Moacir Rossi Forim, João Batista Fernandes,  
Paulo Cezar Vieira, José Djair Vendramin and Marcos Antônio Machado

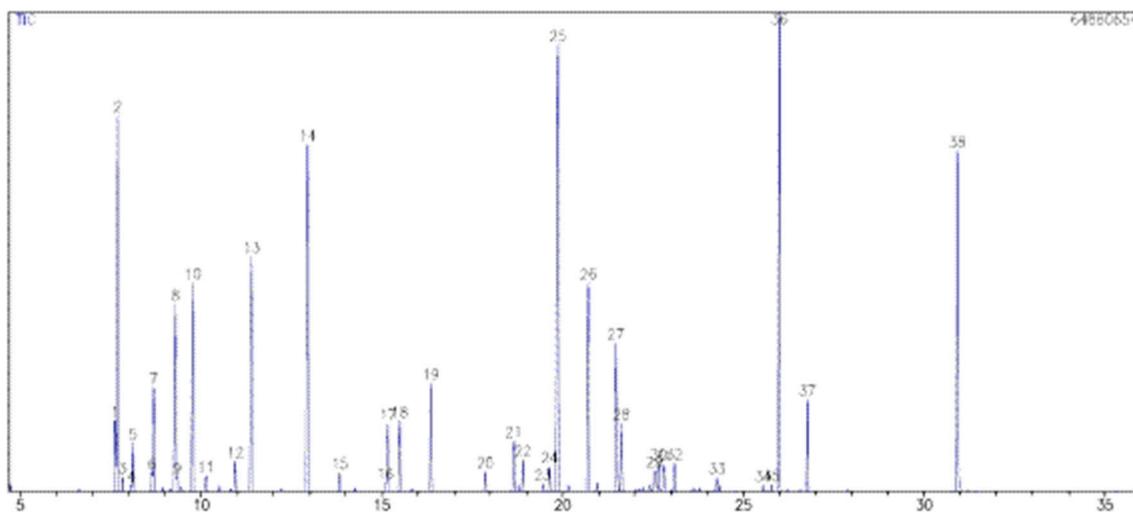

## 1. Figures

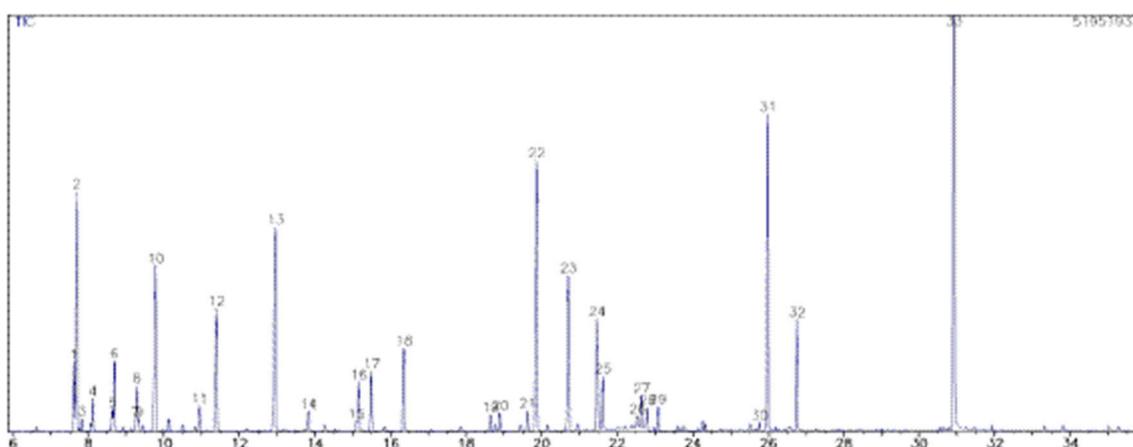

**Figure S1.** GC (TIC) chromatogram of volatile oils from *Citrus sinensis* cv. 'Pera' (C-1), indicating the major compounds.

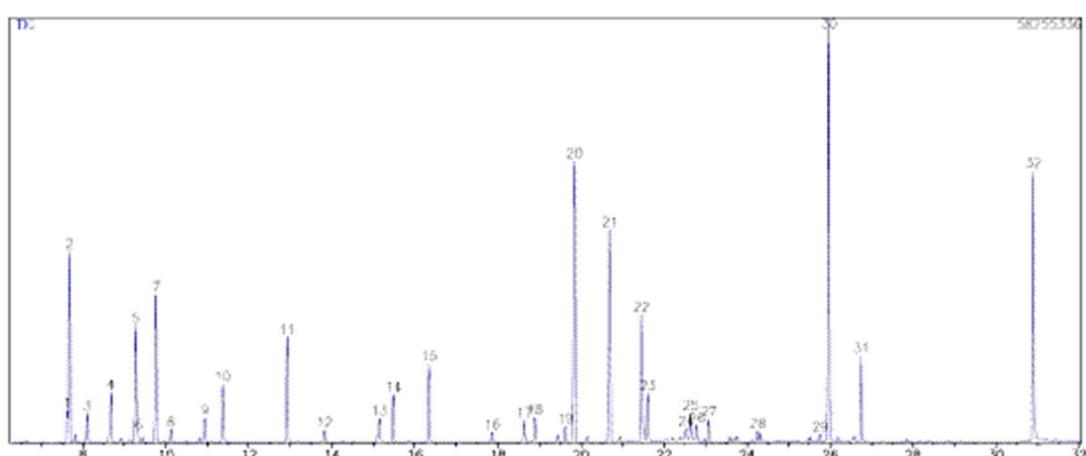

**Figure S2.** GC (TIC) chromatogram of volatile oils from *Citrus sinensis* cv. 'Natal' (C-2), indicating the major compounds.

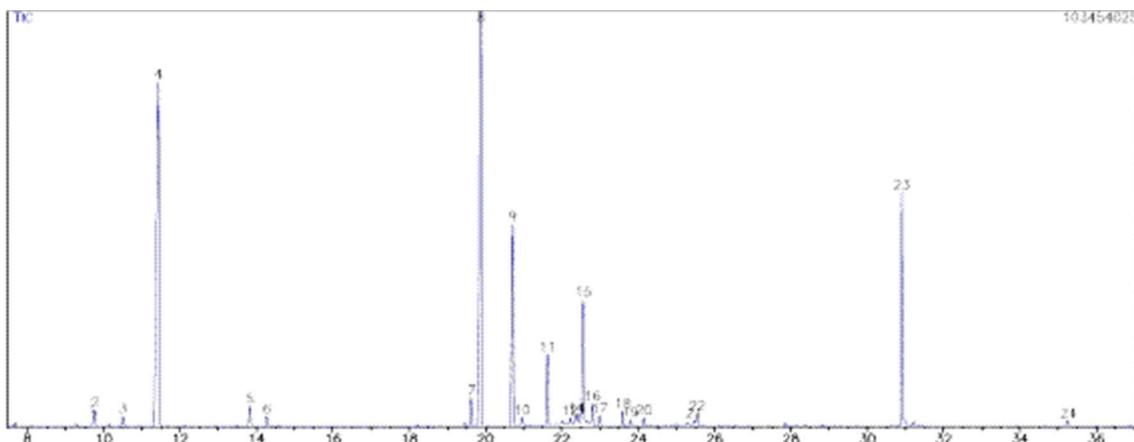

**Figure S3.** GC (TIC) chromatogram of volatile oils from *Citrus sinensis* cv. 'Valencia' (C-3), indicating the major compounds.

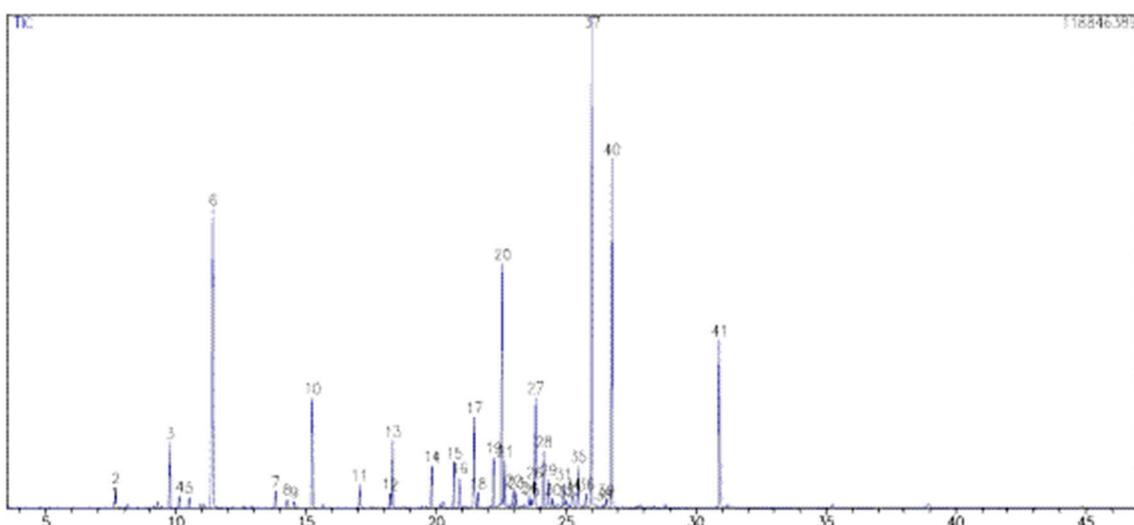

**Figure S4.** GC (TIC) chromatogram of volatile oils from *Citrus sinensis* cv. 'Washington Navel' ('Bahia') (C-4), indicating the major compounds.

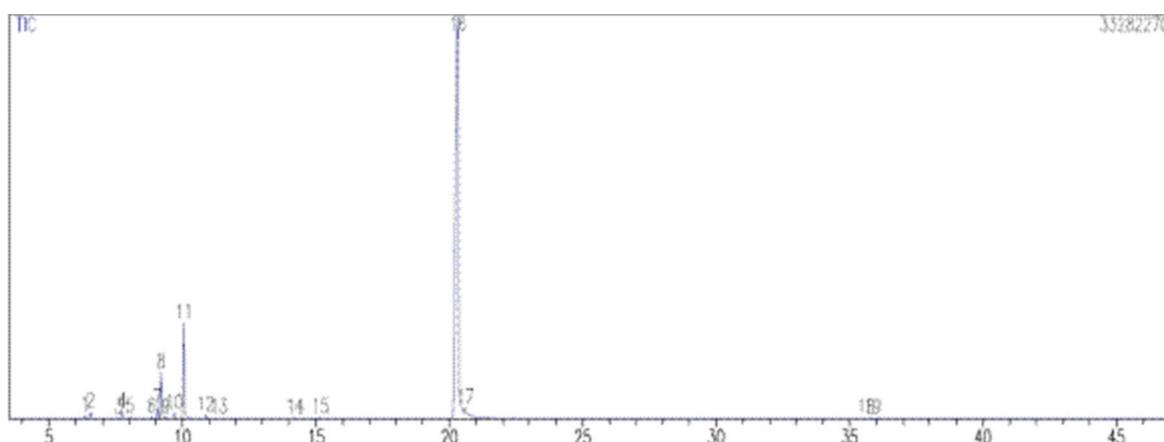

**Figure S5.** GC (TIC) chromatogram of volatile oils from *Citrus sinensis* cv. 'Hamlin' (C-5), indicating the major compounds.

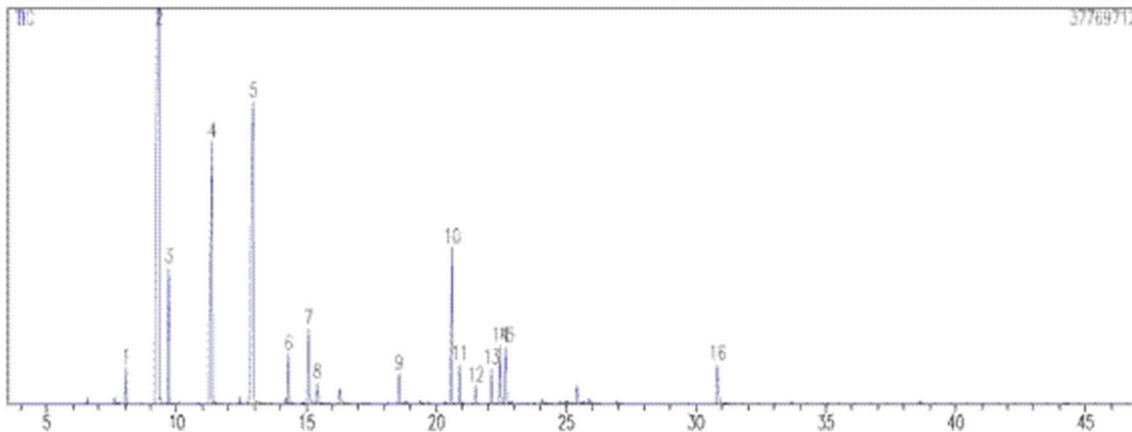

**Figure S6.** GC (TIC) chromatogram of volatile oils from *C. reticulata* Blanco (tangerine or mandarin) cv. ‘Cravo’ (C-6), indicating the major compounds.

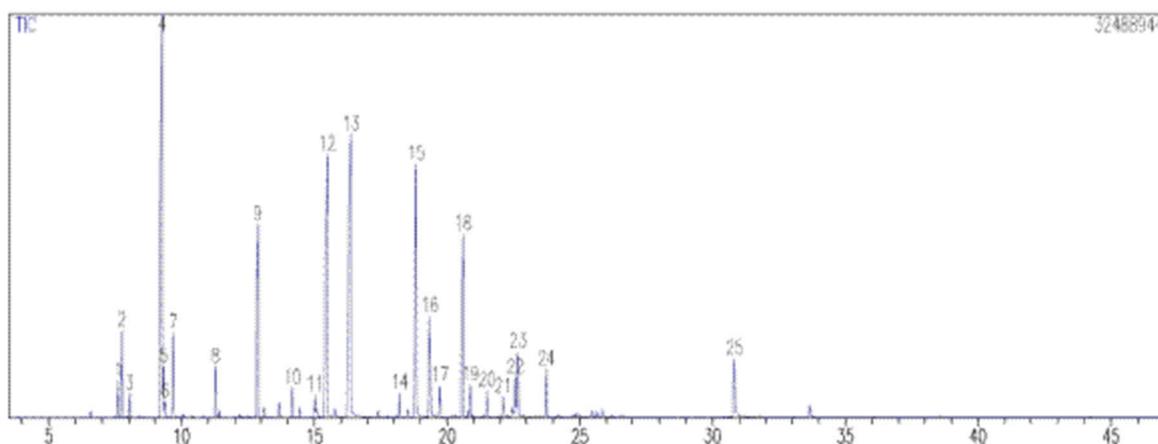

**Figure S7.** GC (TIC) chromatogram of volatile oils from *C. reticulata* Blanco (tangerine or mandarin) cv. ‘Ponkan’ (C-7), indicating the major compounds.

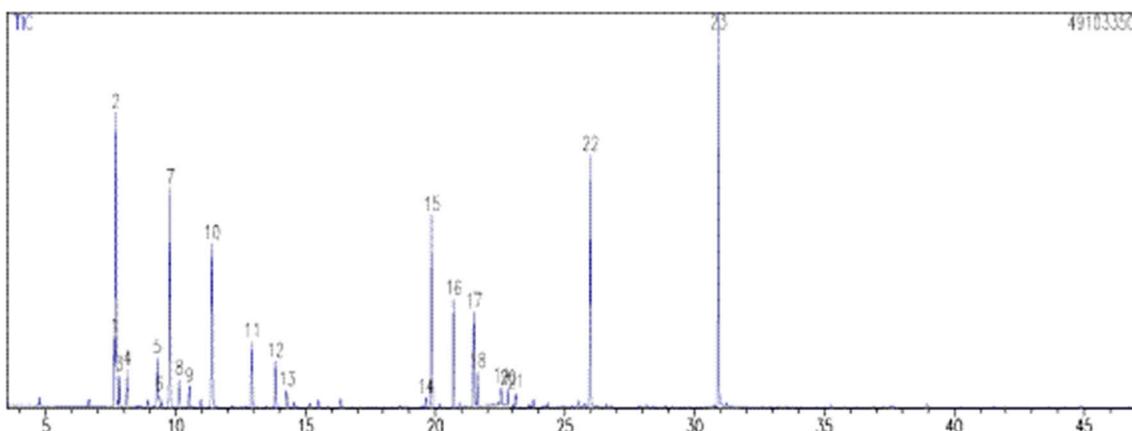

**Figure S8.** GC (TIC) chromatogram of volatile oils from *C. deliciosa* Tenore (mandarin) cv. ‘Mexericado-rio’ (C-8), indicating the major compounds.

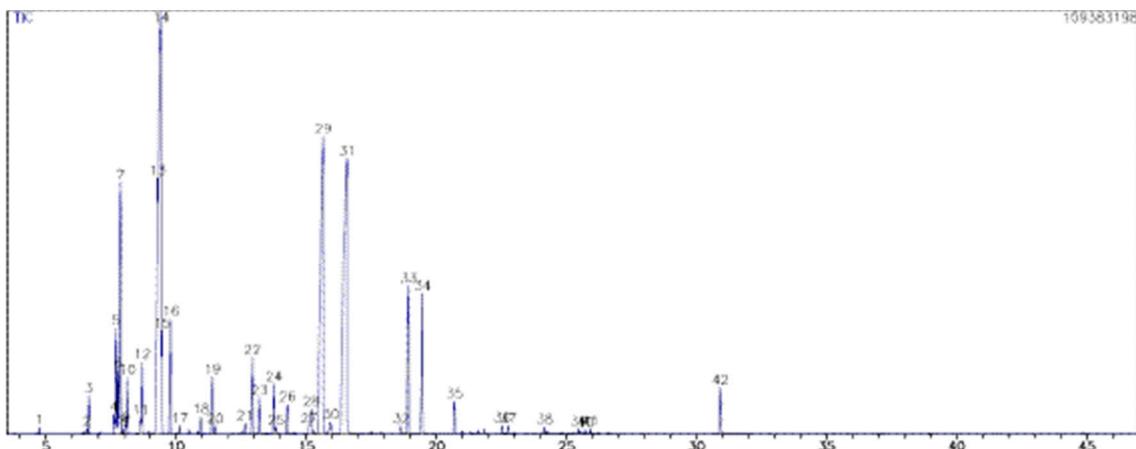

**Figure S9.** GC (TIC) chromatogram of volatile oils from *C. limettoides* Tanaka (sweet lime) cv 'Palestine' (C-9), indicating the major compounds.

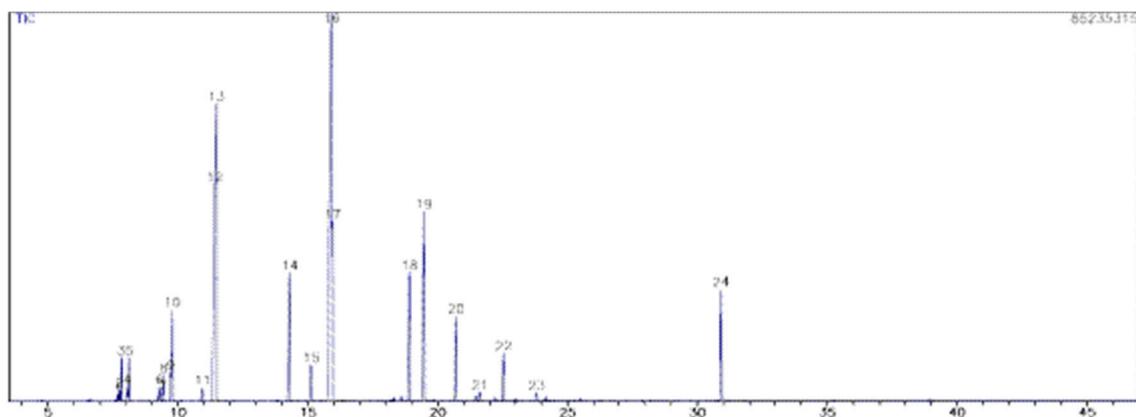

**Figure S10.** GC (TIC) chromatogram of volatile oils from *C. latifolia* Tanaka (lime) cv. 'Tahiti' (C-10), indicating the major compounds.

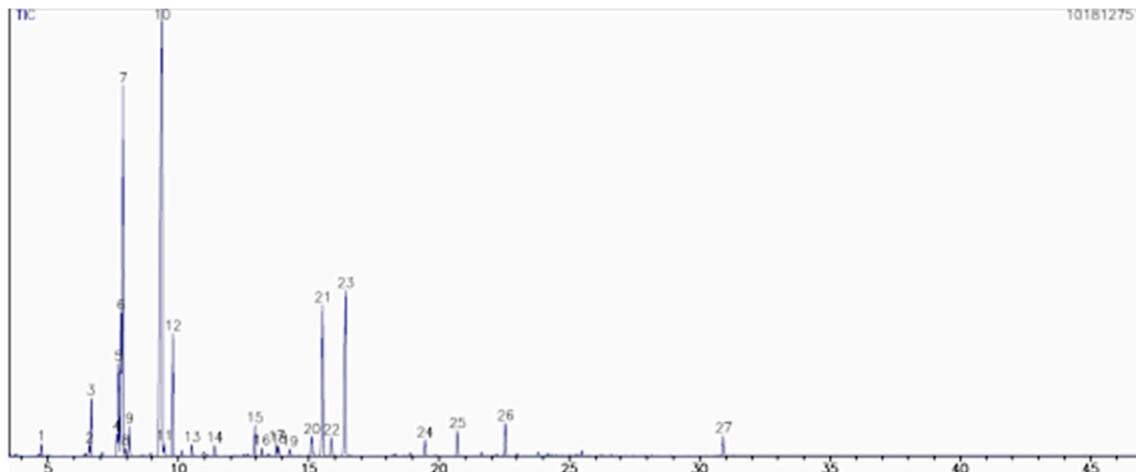

**Figure S11.** GC (TIC) chromatogram of volatile oils from *C. paradisi* Mcf. (grapefruit) cv. 'Marsh Seedless' (C-11), indicating the major compounds.

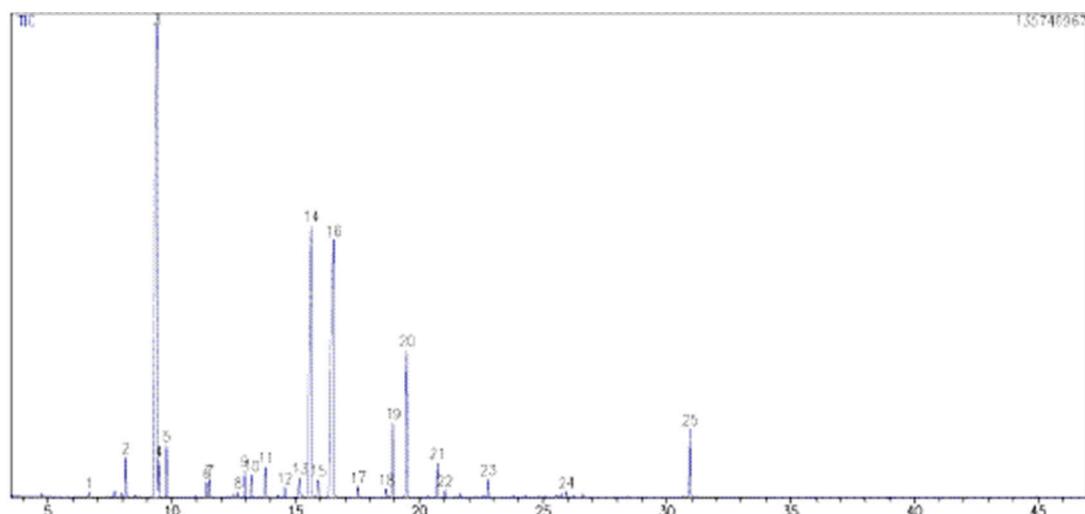

**Figure S12.** GC (TIC) chromatogram of volatile oils from *C. limon* (L.) Burm. F. (Sicilian lemon) (C-12), indicating the major compounds.

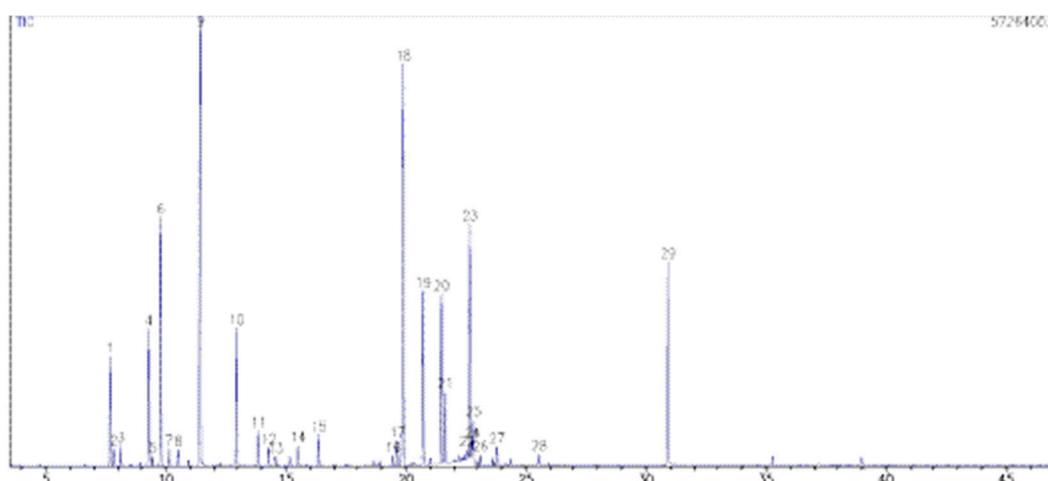

**Figure S13.** GC (TIC) chromatogram of volatile oils from *C. aurantium* L. (sour orange) (C-13), indicating the major compounds.

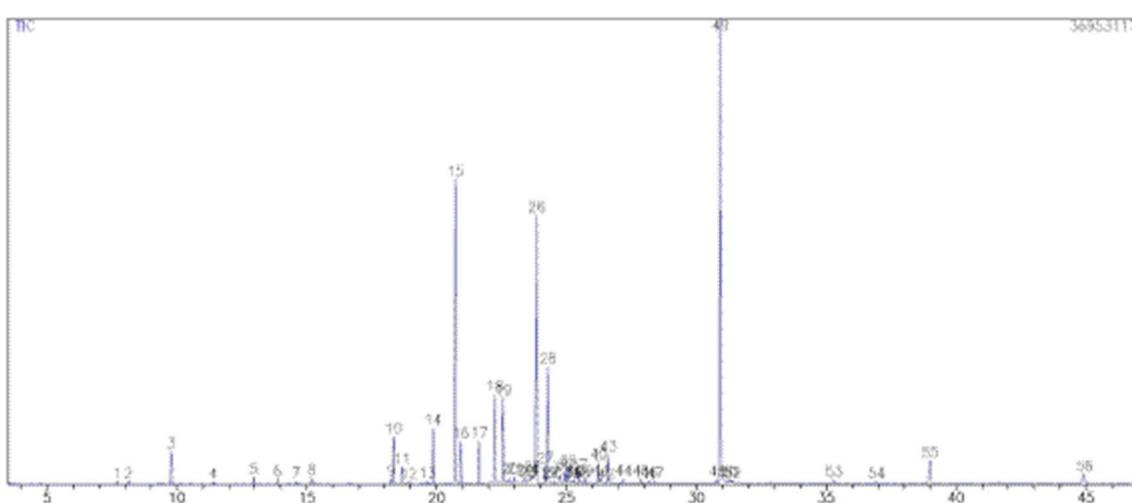

**Figure S14.** GC (TIC) chromatogram of volatile oils from *C. grandis* Osbeck (sweet pummel) (C-14), indicating the major compounds.

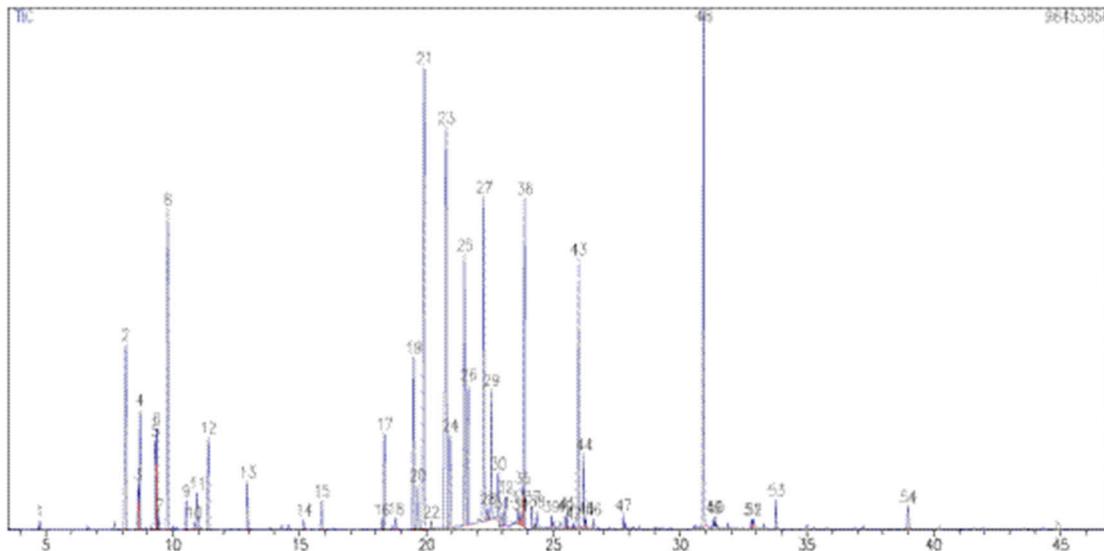

**Figure S15.** GC (TIC) chromatogram of volatile oils from *C. medica* L. (citron) (C-15), indicating the major compounds.

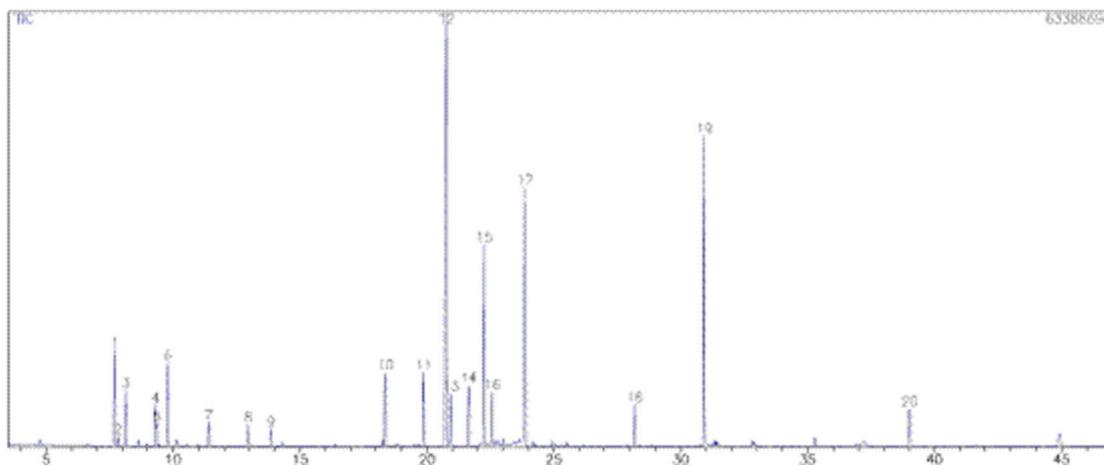

**Figure S16.** GC (TIC) chromatogram of volatile oils from *C. reticulata* L. x *C. sinensis* L. (tangor) 'Murcott' (C-16), indicating the major compounds.

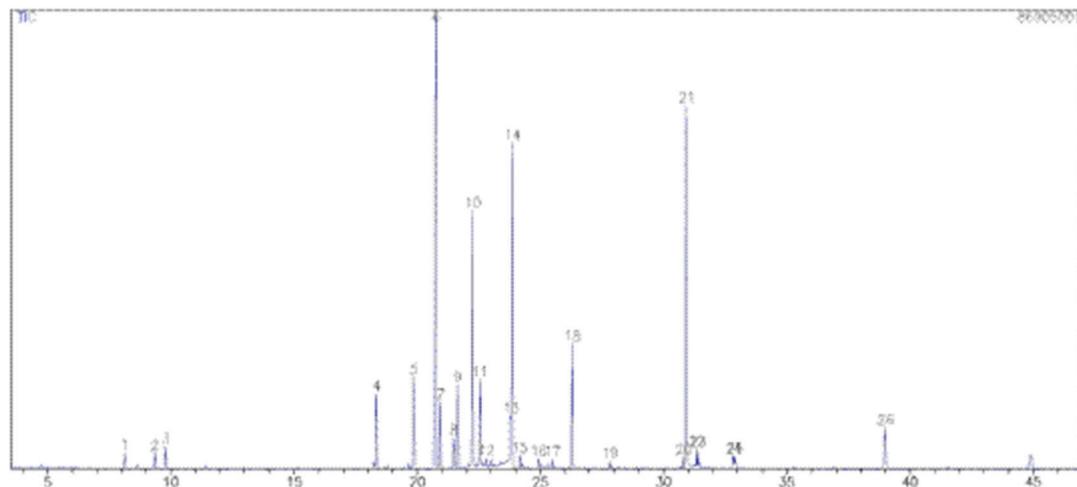

**Figure S17.** GC (TIC) chromatogram of volatile oils from *C. paradisi* x *P. trifoliata* (citrumeelo) cv. 'Swingle' (C-17), indicating the major compounds.

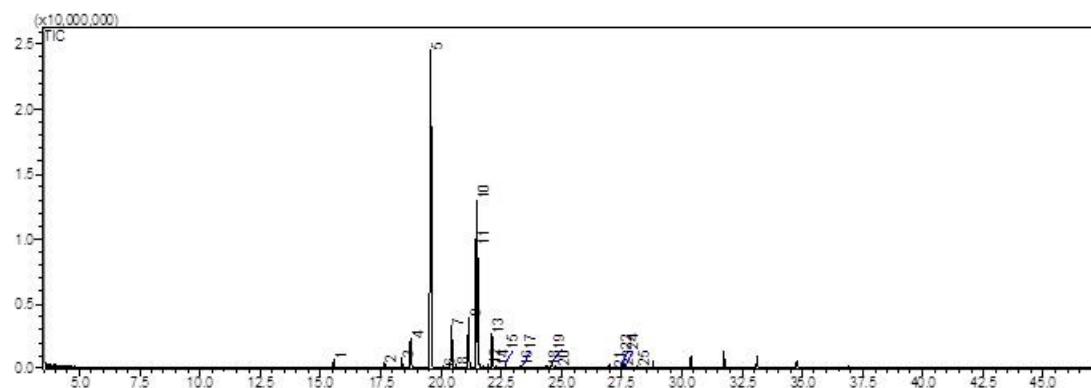

**Figure S18.** GC (TIC) chromatogram of volatile oils from *P. trifoliata* × *C. sinensis* (citrange) cv. 'Troyer' (C-18), indicating the major compounds.

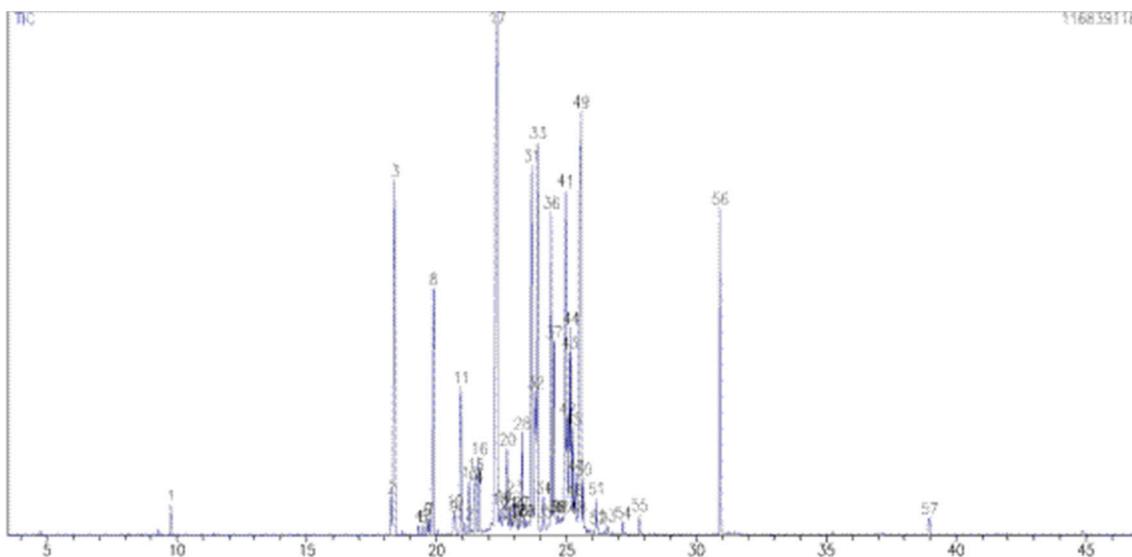

**Figure S19.** GC (TIC) chromatogram of volatile oils from *C. sunki* hort. ex Tanaka × *P. trifoliata* L. Raf. (citranderatin) 'English' (C-19), indicating the major compounds.

**Figure S20.** GC (TIC) chromatogram of volatile oils from *P. trifoliata* L. Raf. (poncirus) cv 'Rubidoux' (C-20), indicating the major compounds.

**Figure S21.** GC (TIC) chromatogram of volatile oils from *M. paniculata* (C-21), indicating the major compounds.

**Figure S22.** GC (TIC) chromatogram of volatile oils from *F. margarita* Lour. (kumquat) (C-22), indicating the major compounds.

**Table S1.** Essential oil composition (%) from 22 genotypes of *Citrus* (C-1–C-22).
