### Supplementary Figure S1. Protein expression changes in H295R cells after BMP-2 treatment.

(a) Western blot result with CYP17A1, CYP11A1 , DENND1A varient1(DENND1A V1), DENND1A varient1(DENND1A V1) and Caspase3 in control H295R cells and BMP-2 treated (25ng/ml) H235R cells. The cleaved Caspase3 were not detected in this samples. (b) Relative protein level of CYP17A1, CYP11A1 , DENND1A varient1(DENND1A V1), DENND1A varient1(DENND1A V1) and Pro-Caspase3. Data presented as the mean ± SD. (n=2, Significant level, \*: p<0.05; NS: Not significant).
