

Supplementary Figure S1

Figure S1. Distribution of RISE indexes obtained from the RNA-Seq data. p-values are from the DEXSeq for exon changes by KCl depolarization. *: >20% change of the ratio of 5SS/3SS RISE index by KCl.

Supplementary Figure S2

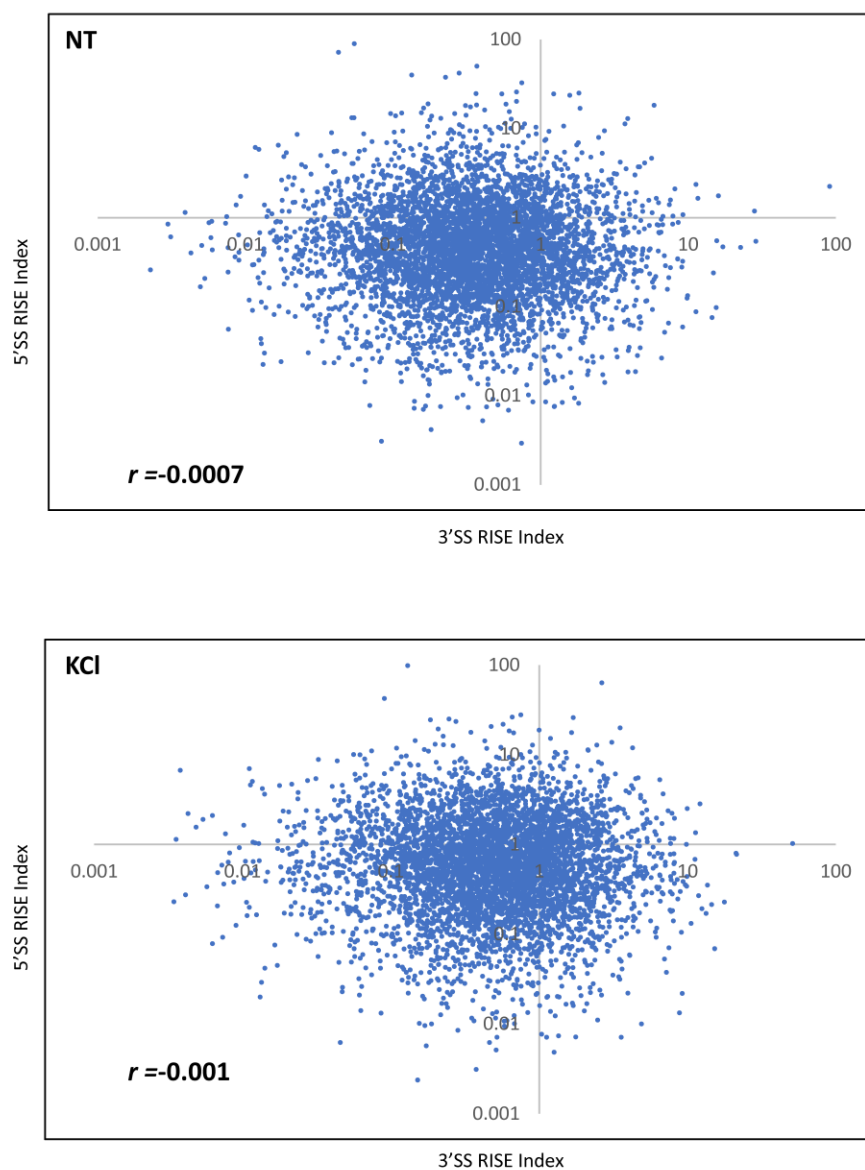

Figure S2. Distribution pattern of 5,062 RISE indexes of 5'SS and 3'SS unselected in pairs from the nuclear RNA-Seq data (see also Figure S1).
