**Figure S1.** Proven and putative phosphorylation sites in MCPyV large T antigen. The functional domains of large T-antigen are shown in different colors: constant region 1 in purple (residues 13–17, LCKLL); DnaJ motif in orange (residues 42–48, HPDKGGN); retinoblastoma binding motif in yellow (residues 212–216, LFCDE); nuclear localization signal in green (residues 277–280, RKRK); origin binding domain in light blue (residues 308–433); helicase domain in dark grey). Truncated large T-antigen sequenced from Merkel cell carcinomas so far vary in length from 252 amino acids (JPN MCC74; BAO04662) to 538 amino acids (KIP1; AHN13646). A premature stop codon in MKL-2 indicated by the arrow results in a truncated large T-antigen that spans the N-terminal 275 residues.

**Figure S2.** Phosphorylation sites detected by mass spectrometry of in vitro PKA phosphorylated peptides. The method does not allow distinction between phosphorylation of S202 and/or S203 (resp. S264 and/or S265).

**A****B**

**Figure S3.** Expression levels of LTag, MKL2 LTag and their single mutants. **(A)** HEK293 cells were transfected with 1 mg empty expression vector (lane 1) or 1 mg of expression vector for respectively LT (lane 2), LT-S91A (lane 3), LT-S191D (lane 4), LT-S203A (lane 5), LT-S203D (lane 6), LT-S265A (lane 7) or LT-S265D (lane 8). **(B)** as A, but empty expression vector (lane 1), MKL2 (lane 2), MKL2-S91A (lane 3), MKL2-S191D (lane 4), MKL2-S203A (lane 5), MKL2-S203D (lane 6), MKL2-S265A (lane 7) or MKL2-S265D (lane 8). Lane M: protein marker (in kDa). ERK2 was used as a loading control.

**Figure S4.** Expression levels of LTag, MKL2 LTag and their triple mutants. **(A)** HEK293 cells were transfected with empty expression vector (EV) or expression plasmids for MCPyV LTag, LT-3A, LT-3D and protein levels were determined by western blot. **(B)** as panel A but cells were transfected with expression plasmids for MKL2 tLT, MKL2-3A or MKL2-3D. ERK2 was used as a loading control. The protein size marker (in kDa) is shown.

**Figure S5.** Activation of the PKA pathway does not increase the levels of MS1 LTag. Serum-starved MS1 cells were stimulated with 10  $\mu$ M forskolin (FSK) for the indicated time points and levels of MS1 LT was monitored by western blotting using CM2B4 antibody. GAPDH was used as a loading control. The molecular marker (in kDa) is shown. The absence (-) or presence (+) of forskolin is indicated.

**Table S1.** Biological consequences of mutations in putative phosphoacceptor sites of MCPyV full-length (fl-LT) or truncated large T-antigen (tLT).

| Mutation             | fl-LT or tLT     | Protein kinase  | Effect  | Reference  |
|----------------------|------------------|-----------------|---|------------|
| S96A                 | fl-LT            | ND              | no effect on half-life  | [1]        |
| S134A                | fl-LT            | ND              | no effect on half-life  | [1]        |
| S142A                | fl-LT            | ND              | increased half-life and reduced interaction with b-TrCP   | [2]        |
| S147A                | fl-LT            | ND              | increased half-life; similar to wild-type LT, this mutant was unable to stimulate viral DNA replication; no effect on early and late promoter activity; reduced interaction with b-TrCP | [1]<br>[2] |
| S179A                | fl-LT            | ND              | no effect on half-life  | [1]        |
| S186A                | fl-LT            | ND              | no effect on half-life  | [1]        |
| T192A/E <sup>a</sup> | tLT <sup>b</sup> | ND <sup>c</sup> | no effect on growth of MKL1 MCC cells; no effect on half-life   | [3]<br>[1] |
| S202A/E              | tLT              | ND              | no effect on growth of MKL1 MCC cells   | [3]        |
| S203A/E              | tLT              | ND              | no effect on growth of MKL1 MCC cells   | [3]        |
| T205A/E              | tLT<br>fl-LT     | ND<br>ND        | no effect on growth of MKL1 MCC cells; T205A: no effect on hVam6p binding   | [3]<br>[4] |
| Y206A                | fl-LT            | ND              | no effect on hVam6p binding   | [4]        |
| T208A                | fl-LT            | ND              | no effect on hVam6p binding   | [4]        |
| S217A/E              | tLT              | ND              | no effect on growth of MKL1 MCC cells   | [3]        |
| S219A/E              | tLT              | ND              | S219A, but not S219E partially inhibited growth of MKL1 MCC cells <sup>d</sup>  | [3]        |

|                                     |                  |                  |   |
|-------------------------------------|------------------|------------------|---|
