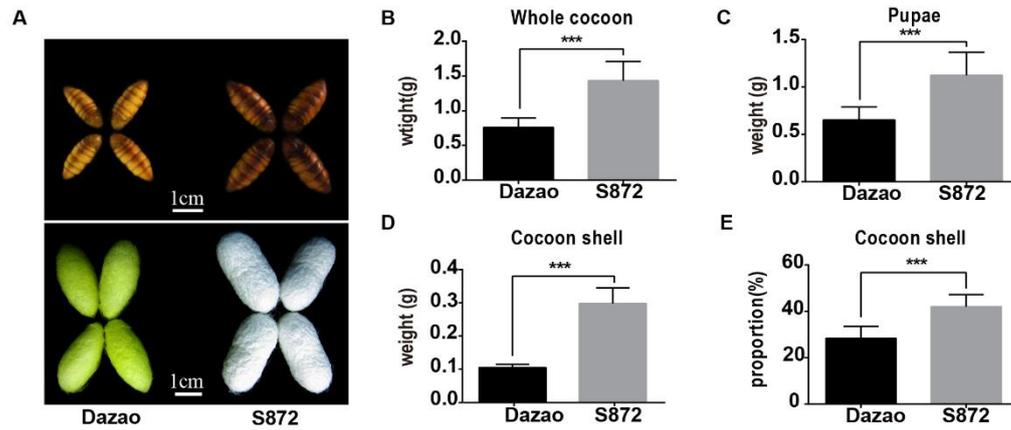

Figure S1. Main characteristics of different silk-producing strains of *Dazao* and *S872*. A. Pupae and cocoons. B. whole cocoon weight. C. Pupae weight. D. Cocoon shell weight. E. Cocoon shell proportion. Data are means \pm SD. *** $P < 0.001$.

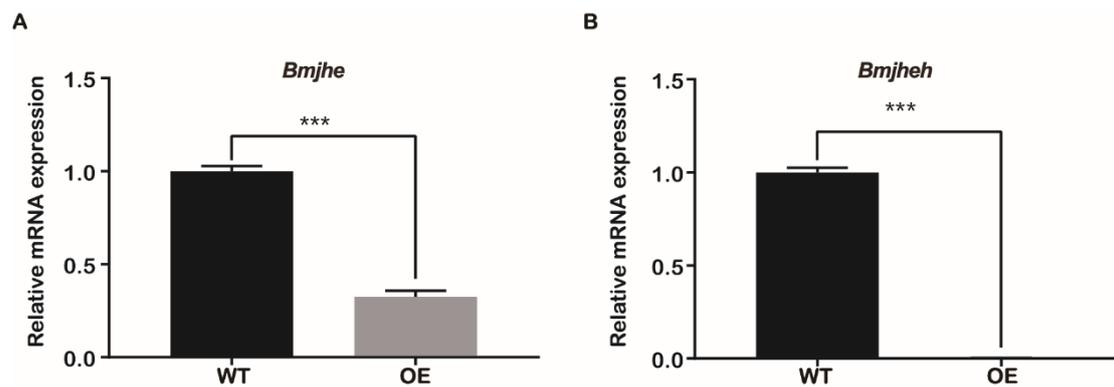

Figure S2. Overexpression of *BmJHBPd2* results in inhibition of JH catabolic enzyme in silk glands. The following JH catabolic enzyme related genes were selected: JHE(A) and JHEH(B). *BmRpl3* was used as a control. Results are expressed as means S.D. of three independent experiments. *** $P < 0.001$.
