

## Article

"Investigating the molecular mechanisms underlying early response to inflammation and *Helicobacter pylori* infection in human gastric epithelial cells"

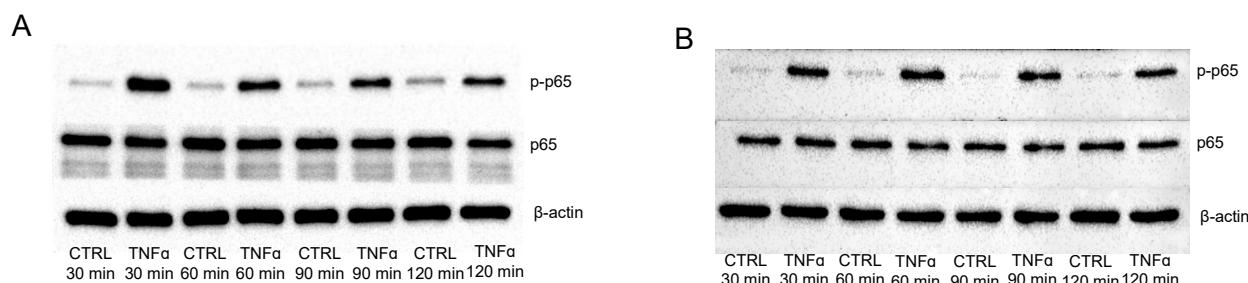

Martinelli et al., 2023

## Supplementary data

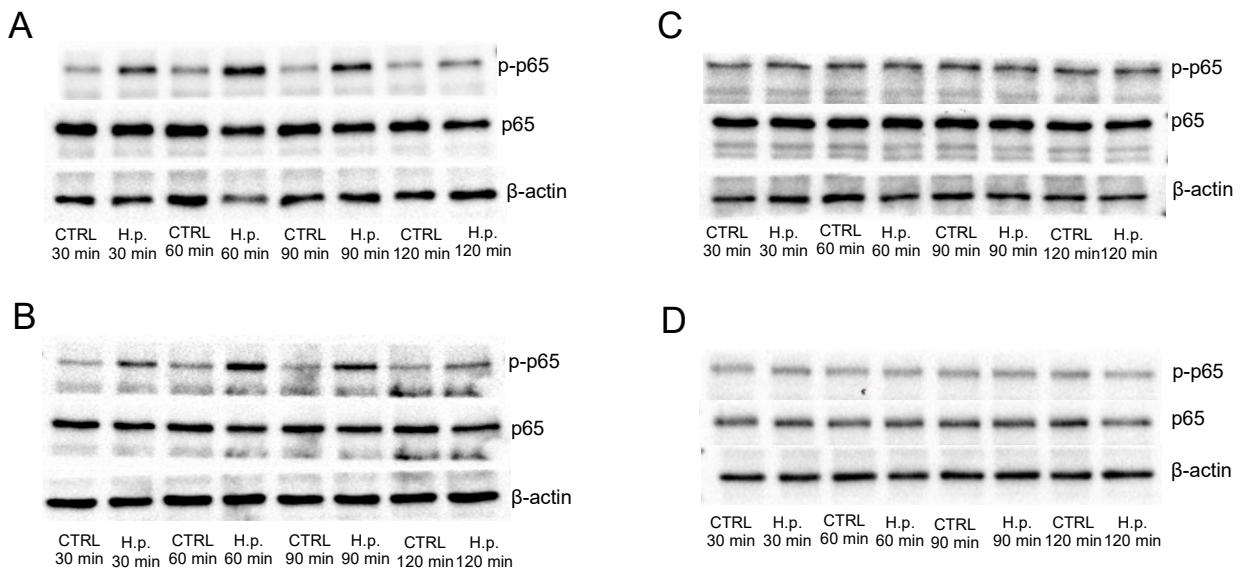

**Figure S1.** MMP-9 release to TNF in GES-1 and AGS cells.

GES-1 (red bars) and AGS (black bars) cells were treated for 3 and 6 h with TNF (10 ng/mL). MMP-9 secretion (A, and B) was measured by ELISA. Results are expressed as mean  $\pm$  SEM of at least 3 experiments performed in duplicates.

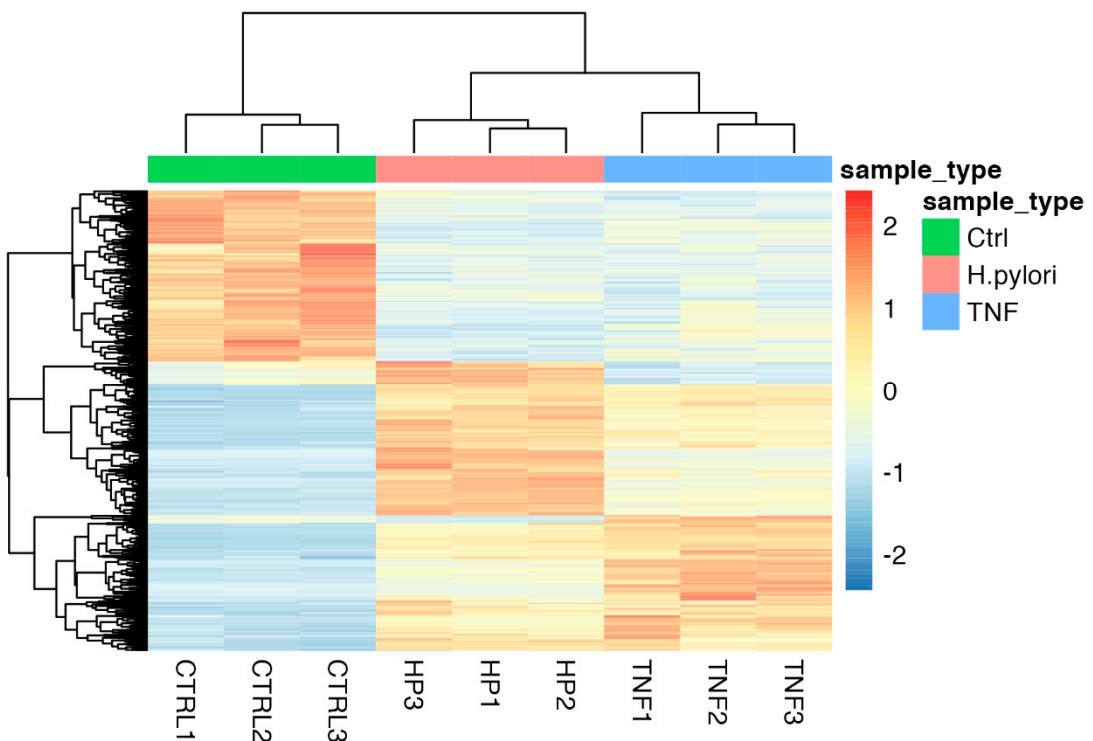

**Figure S2.** NF-κB signaling in TNF treated GES-1 and AGS cells.

Representative blots for the phosphorylation state of p65 (p-p65) of GES-1 (A) and AGS (B) cells treated with TNF (10 ng/mL) for the indicated time points.

**Figure S3.** NF- $\kappa$ B signaling in GES-1 and AGS cells infected with *H. pylori* strains.

Representative blots for the phosphorylation state of p65 (p-p65) of GES-1 (A,C) and AGS (B,D) cells treated with *H. pylori* strains (bacterium-to-cell ratio, 50:1) for the indicated time points. A) and B) Cells were infected with the CagA-positive (ATCC) and C) and D) with CagA-negative clinical isolate #6 (#6) strain.

**Figure S4.** Transcriptomic analysis of *H. pylori*-infected and TNF -treated GES-1 cells vs untreated cells

Heatmap representing the distribution of differentially expressed genes (DEGs) in infected (*H. pylori*) or TNF-treated (TNF) cells in respect to untreated cells. GES-1 cells were infected with the CagA-positive (ATCC) *H. pylori* strain (bacterium-to-cell ratio, 50:1) or treated with TNF (10 ng/mL) for 6 h. RNA-seq was performed as described in Materials and methods.

**Supplementary table S1.** Virulence and antibiotic resistance of the two strain of *H. pylori* included in this study (ATCC strain , and clinical isolate #6)

| <i>H. pylori</i> strain | Antibiotic resistance        | Antibiotic sensitivity     | CagA | Allelic combination of VacA |
|-------------------------|------------------------------|----------------------------|------|-----------------------------|
| ATCC strain             | Clarithromycin/metronidazole | Levofloxacin/amoxicillin   | +    | S1/M1                       |
| #6                      | Clarithromycin/metronidazole | Levofloxacina/amoxicillina | -    | S2/M2                       |

**Supplementary table S2.** Differentially expressed genes following 6 h *H. pylori* infection (ATCC strain) (Human Inflammatory Cytokines & Receptors RT<sup>2</sup> Profiler PCR Array)

| Gene symbol    | GES-1           |             | AGS                   |             |               |
