

**Supporting Information:** Species-specific functional morphology of four US Atlantic Coast dune grasses: biogeographic implications for dune shape and coastal protection. By Sally D. Hacker, Katya R. Jay, Nicholas Cohn, Evan B. Goldstein, Paige Hovenga, Michael Itzkin, Laura J. Moore, Rebecca S. Mostow, Elsemarie V. Mullins, and Peter Ruggiero.

**Table S1.** Transect locations, north to south, used to survey the distribution and abundance of vegetation along foredunes of the Outer Banks islands from False Cape, Virginia, to Bogue Banks, North Carolina, USA (see Figure 2).

| Island           | Transect Name | Latitude   | Longitude   | Distance to Neighboring Transect (km; S or W) |
|------------------|---------------|------------|-------------|---|
| False Cape       | FAC_4         | 36.6276652 | -75.889766  | 3   |

**Table S2.** List of the 53 plant species found in foredune surveys of the Outer Banks islands from False Cape, Virginia, to Bogue Banks, North Carolina, USA. Plants are classified by functional group. Eleven plant species are listed as unknowns with their basic defining characteristics.

| Species |                                       |                                 |
|---------|---------------------------------------|---------------------------------|
| Grasses | <i>Ammophila breviligulata</i> (AMBR) | <i>Spartina cynosuroides</i>    |
|         | <i>Andropogon littoralis</i>          | <i>Spartina patens</i> (SPPA)   |
|         | <i>Cenchrus tribuloides</i>           | <i>Uniola paniculata</i> (UNPA) |
|         | <i>Digitaria</i> sp.                  | Unknown 3 (small grass)         |
|         | <i>Panicum amarum</i> (PAAM)          | Unknown 4 (small grass)         |
|         | <i>Panicum virgatum</i>               | Unknown 9 (tall grass)          |
| Sedges  | <i>Carex</i> sp.                      |                                 |
| Forbs   | <i>Achillea millefolium</i>           | <i>Krigia virginica</i>         |
|         | <i>Aster subulatus</i>                | <i>Lactuca canadensis</i>       |
|         | <i>Borrichia frutescens</i>           | <i>Lepidium virginicum</i>      |
|         | <i>Cakile edentula</i>                | <i>Oenothera humifusa</i>       |
|         | <i>Centella asiatica</i>              | <i>Rumex acetosella</i>         |
|         | <i>Conyza canadensis</i>              | <i>Solidago sempervirens</i>    |
|         | <i>Commelina erecta</i>               | <i>Trichostema</i> sp.          |
|         | <i>Croton punctatus</i>               | Unknown 1 (small fuzzy herb)    |
|         | <i>Diodia teres</i>                   | Unknown 5 (small herb)          |
|         | <i>Euphorbia polygonifolia</i>        | Unknown 6 (aster)               |
|         | <i>Gaillardia pulchella</i>           | Unknown 7 (fuzzy aster)         |
|         | <i>Gnaphalium obtusifolium</i>        | Unknown 8 (small herb)          |
|         | <i>Heterotheca subaxillaris</i>       | Unknown 11 (small fuzzy herb)   |
|         | <i>Hydrocotyle bonariensis</i>        |                                 |
| Vines   | <i>Ipomoea sagittata</i>              | <i>Smilax auriculata</i>        |
|         | <i>Ipomoea stolonifera</i>            | <i>Smilax bona-nox</i>          |
|         | <i>Lonicera sempervirens</i>          | <i>Strophostyles helvola</i>    |
|         | <i>Parthenocissus quinquefolia</i>    | Unknown 2 (thorny vine)         |
| Shrubs  | <i>Iva imbricata</i>                  | <i>Opuntia drummondii</i>       |
|         | <i>Myrica cerifera</i>                | Unknown 10 (small shrub)        |
| Trees   | <i>Quercus geminata</i>               |                                 |

**Table S3.** One-way ANOVAs and associated Tukey's post hoc tests ( $p \leq 0.05$  in bold) for the abundance of (A) plant functional groups (grasses, forbs, vines, and shrubs) on different islands (abbreviations in Table S1), (B) dune grass species (abbreviations in Table S2) on different islands, and (C) dune grass species across the dune profile (toe/face, crest, and heel/back) in foredunes of the Outer Banks islands from Virginia to North Carolina, USA.

**Table S4.** Mean ( $\pm$  95% CI) growth form and morphological differences of the four dominant dune grass species (abbreviations in Table S2) in foredunes of the Outer Bank islands, USA. Sample sizes are in the first parentheses and significant differences are represented by different letters in the second parentheses.
