

Table S1. Supplementary data for all butterflies sampled near Monterrey Mexico in 2019. The VSMOW-1 results refer to wing $\delta^2\text{H}$ values calibrated to the former in-house keratin calibration standards EC-01 (−197 ‰) and EC-02 (−54.1 ‰); the VSMOW-2 results refer to the same samples calibrated to the values reported by Soto et al. (2017) EC-01 (−157 ‰) and EC-02 (−35.3 ‰). Date is the day of field sampling.

Soto, D.; Koehler, G.; Wassenaar, L.; Hobson, K. Determination of Stable Hydrogen Isotopic Compositions of Complex Organic Materials: Contrasting the Role of Exchangeable Hydrogen and Residual Moisture. *Rapid Comm Mass Spec* **2017**, *31*, 1193–1203.
