

Supplementary Figure S1. The ML tree was generated with IQ-TREE web server. The analysis includes 47 COI (658bp) sequences (16 from *H. julitta*, 5 from *H. g. grisea*, 23 from *H. g. glauconome*, and sequences of *H. februa*, *H. amphiclo*, and *H. feronia* as outgroup). The nodes are shown with bootstrap support.
