

Table S4. Number and percentage of publications for each population parameter assessed in sea turtle population monitoring. Some studies assessed more than one population parameter. Percentage of studies calculated out of 655 studies reviewed.

Population parameter	Number of publications	% studies
abundance (current/historic)	206	31.45
gene flow	8	1.22
genetic diversity	67	10.23
habitat range	172	26.26
hybridization	13	1.98
migration	63	9.62
multiple paternity	22	3.36
origin	103	15.73
other	9	1.37
phylogeny	25	3.82
population structure	138	21.07
sex ratio	40	6.11
survivability	93	14.20
