*Received: 18 March 2004 / Published: 30 March 2004*

After three years service as the Editor-in-Chief of *Sensors*, Prof. Dr. Milan M. Antonijevic resigned from this position at the end of 2003. Prof. Dr. Michael J. Schoening will be soon appointed as the new Editor-in-Chief of *Sensors*. As one of several MDPI online journals, *Sensors*, the first open access journal in this research field, already has become a leading open forum for researchers from all over the world. Professor Antonijevic's great contribution and distinct engagement will be appreciated by all of us on the editorial board, and the authors of the first three volumes.

In addition to his editorial work, Prof. Dr. Milan M. Antonijevic also joined the organizers of the First International Symposium on Sensor Science (I3S2003) in Paris, France, which was held 16-20 June 2003. Under the excellent chairmanship of Dr. Francis Muguet, Milan's main responsibility was to invite world-wide leading scientists in the field of "sensorics" (physical sensors, chemical sensors, biosensors) to give lectures and he fulfilled this work very fruitfully.

Forward-looking and following the great success of I3S2003, we have decided to run I3S also in 2004. Thanks to Prof. Dr. Huangxian Ju, the Second International Symposium on Sensor Science will be held in Nanjing, China, during 29 May - 3 June 2004 with Huangxian as the Executive Chairman. Therefore, we strongly recommend to visit our website at <http://www.mdpi.net/sensors/I3S2004/>. Meet you in Nanjing!
