the red seaweeds *Halymenia floresii* and *Solieria chordalis*

EAE: Enzyme-Assisted Extraction with protamex; HWE: Hot Water Extraction; IEX: Ion exchange Chromatography (DEAE-Sepharose fast-flow); 3.6-AG: Anhydrogalactose; /: Not determined; Data are means ± SD (n=3). *Significantly different (p<0.05) between EAE and HWE by biochemical group (one-way ANOVA).

Table S2. Monosaccharide composition of polysaccharides Fractions 1.1 (Enzyme-Assisted Extraction) and 1.2 (Hot Water Extraction) of *Halymenia floresii*
