

Suppl. Table S1. Receiver operating characteristic curve analysis. Performance of Type D components in discriminating the presence of the pronounced preference for the "Escape-avoidance" strategy.

Area Under the Curve

Test Result Variable(s)	Area
NA	0.749
SI	0.643
Type D	0.715
zNA×zSI	0.518

The test result variable(s): NA, SI, Type D, zNA×zSI has at least one tie between the positive actual state group and the negative actual state group.

Suppl. Table S2. Logistic regression analysis of the relationship between personality type D components (HA and SI) and their interaction on indicators of coping strategy scales (WSQ and CSI scales)

	Model	Unstandardized Coefficients		Standardized Coefficients	T	Sig.	Unstandardized Coefficients		Standardized Coefficients	t	Sig.
