

Supplementary materials

Title: Mediating effect of heat wave between ecosystem services and heat-related mortality of characteristic populations

Table of Contents

Figure S1. Ecosystem services of Jiangsu Province.

Figure S2. Spatial-temporal patterns of HWMI.

Figure S3. Mortality relative risk caused by heat from 2007 to 2015

Table S1. Estimated effects of heat (95% confidence interval) on cause-specific mortality during 2007 to 2015 in 3 cities.

Table S2. Estimated effects of heat (95% confidence interval) on cardiorespiratory mortality during 2007 to 2015 in different sexes and age-groups in 3 cities.

Table S3. The minimum mortality temperature (MMT) stratified by cause of death.

Table S4. The minimum mortality temperature (MMT) of cardiorespiratory diseases stratified by sex and age.

Table S5. Sensitivity analysis for the RR of cause-specific mortality caused by extreme heat in three cities.

Table S6. Sensitivity analysis for the RR of cardiorespiratory mortality in different sexes and age-groups caused by extreme heat in three cities.

Table S7. Ecosystem services values of Jiangsu Province, Nanjing, Suzhou and

Yancheng.

Table S8. Correlation between ESs and HWMI.

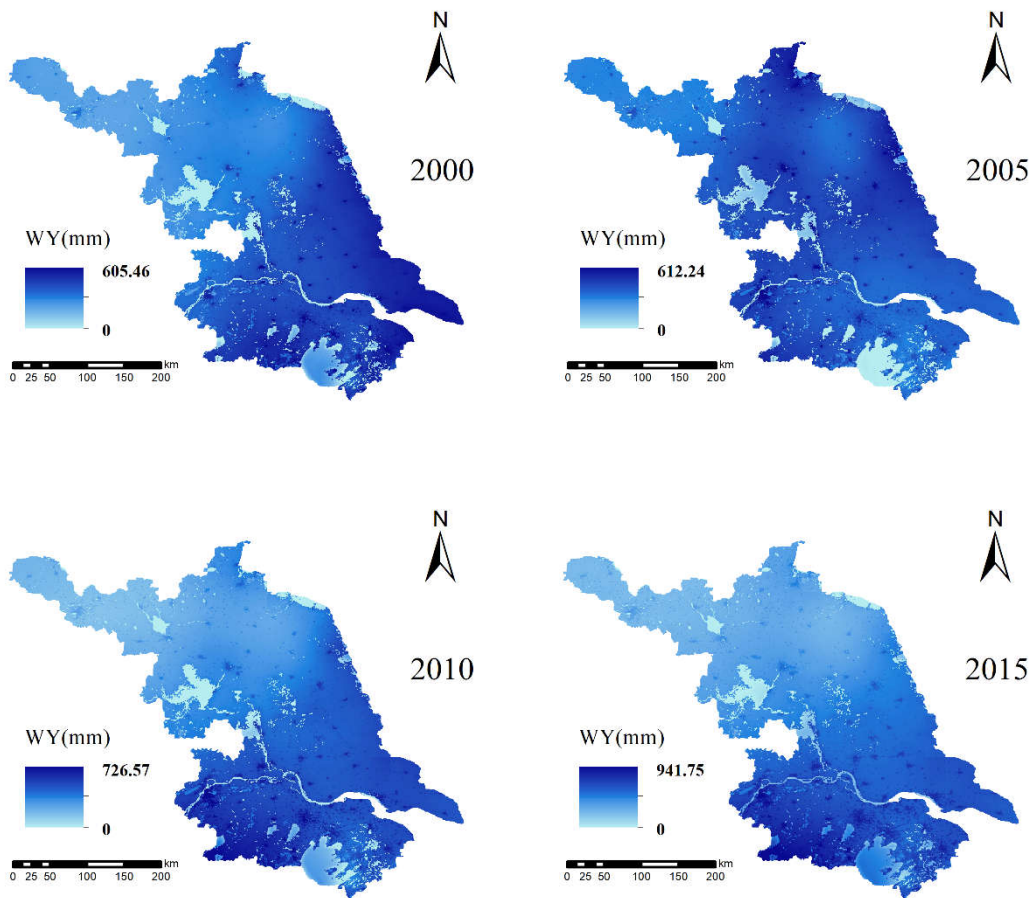

Table S9. Correlation between ESs and cause-specific mortality risk associated with heat.

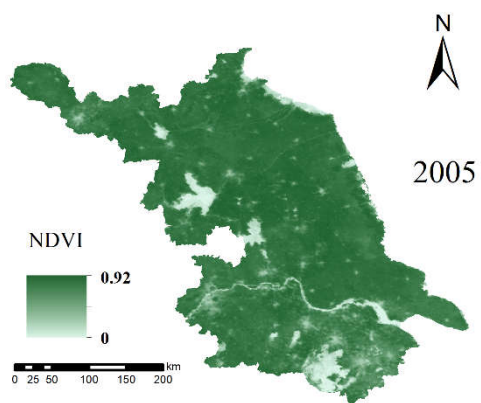

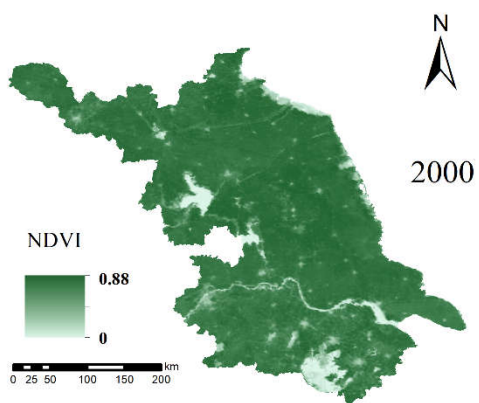

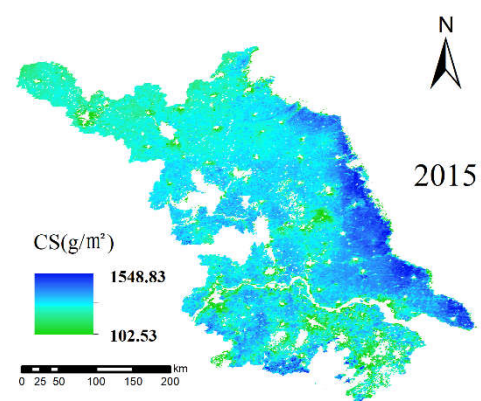

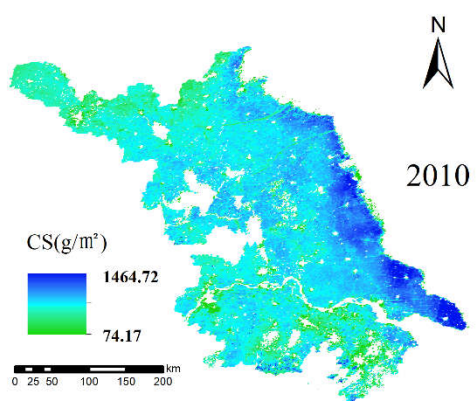

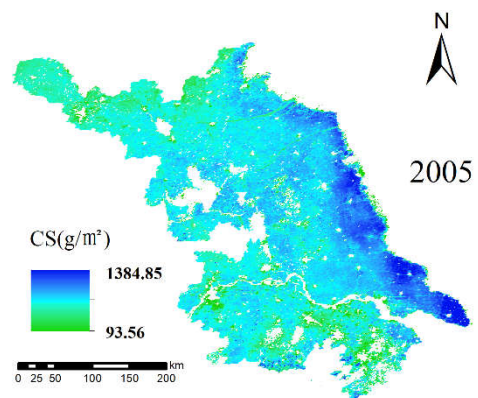

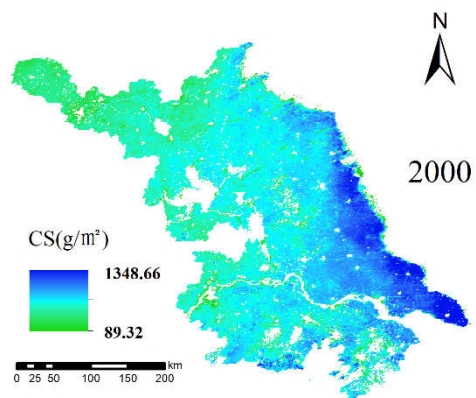

Table S10. Correlation between ESs and cardiorespiratory mortality risk in different groups associated with heat

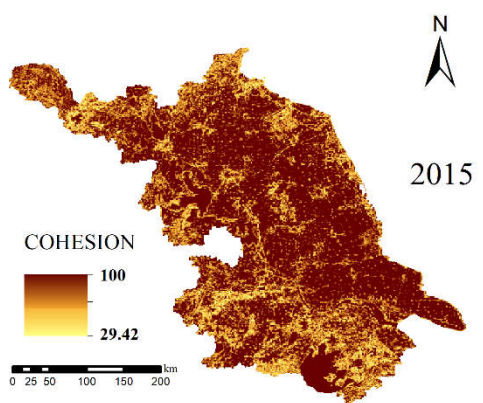

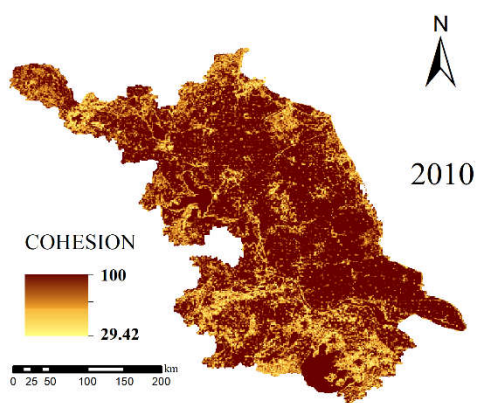

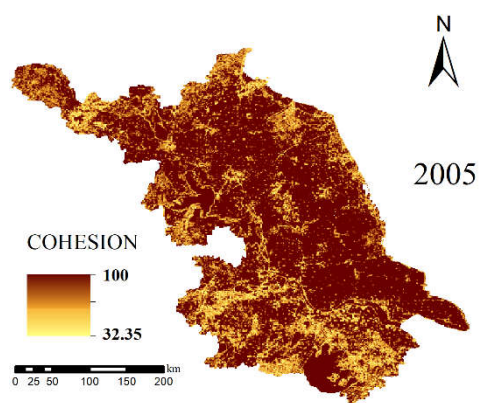

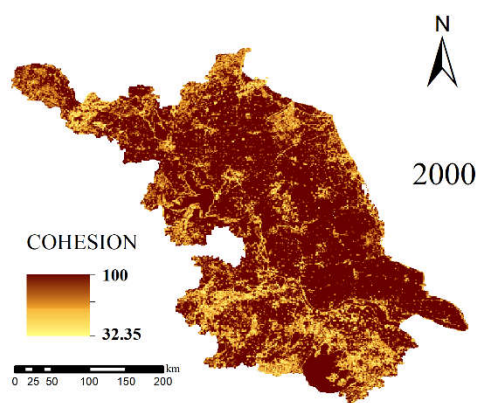

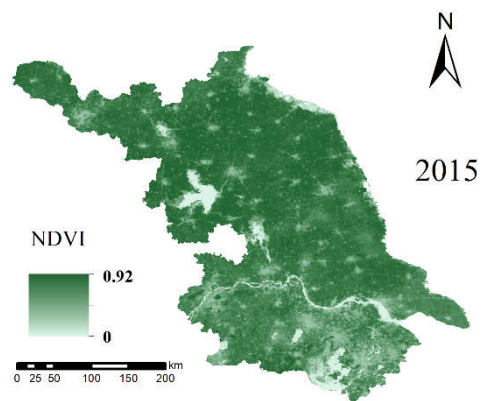

Table S11. Results of paths and effects for different cause-special mortality risk.

Table S12. Results of paths and effects for different sexes and age-groups mortality risk.

Table S13. Results of Granger causality test between ESs and HWMI.

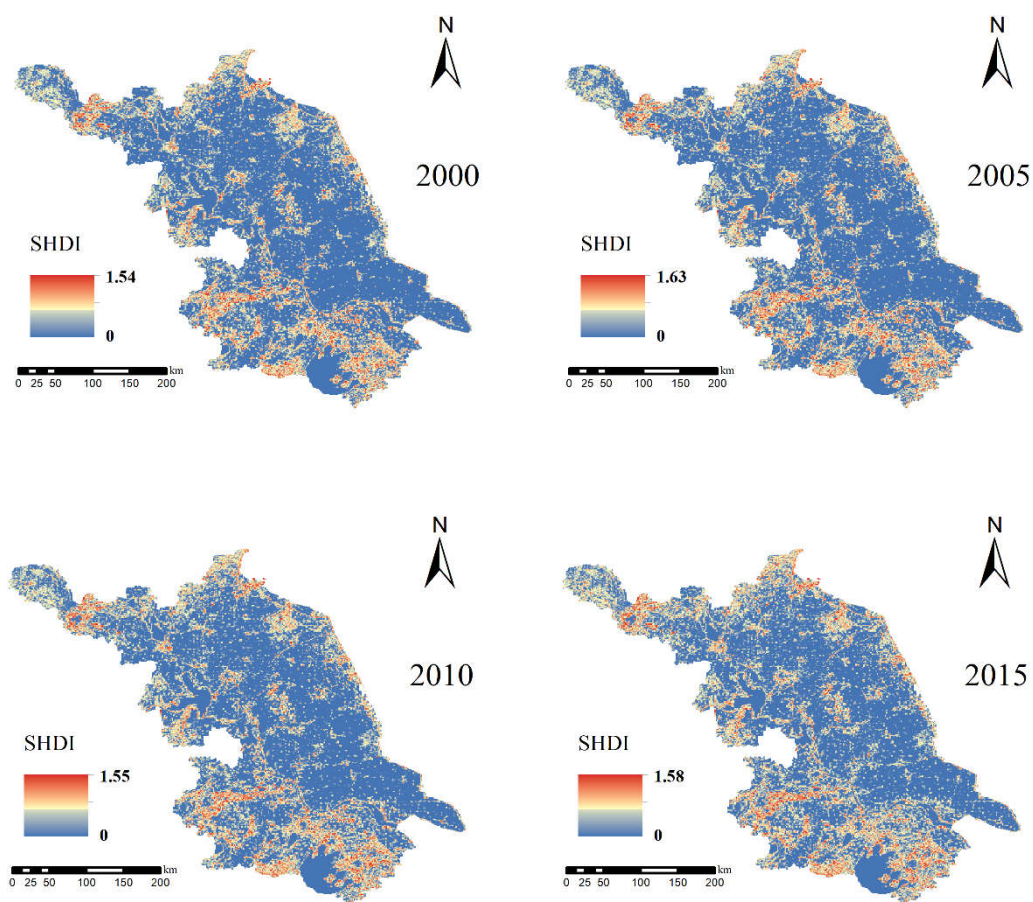

Figure S1. Ecosystem services of Jiangsu Province.

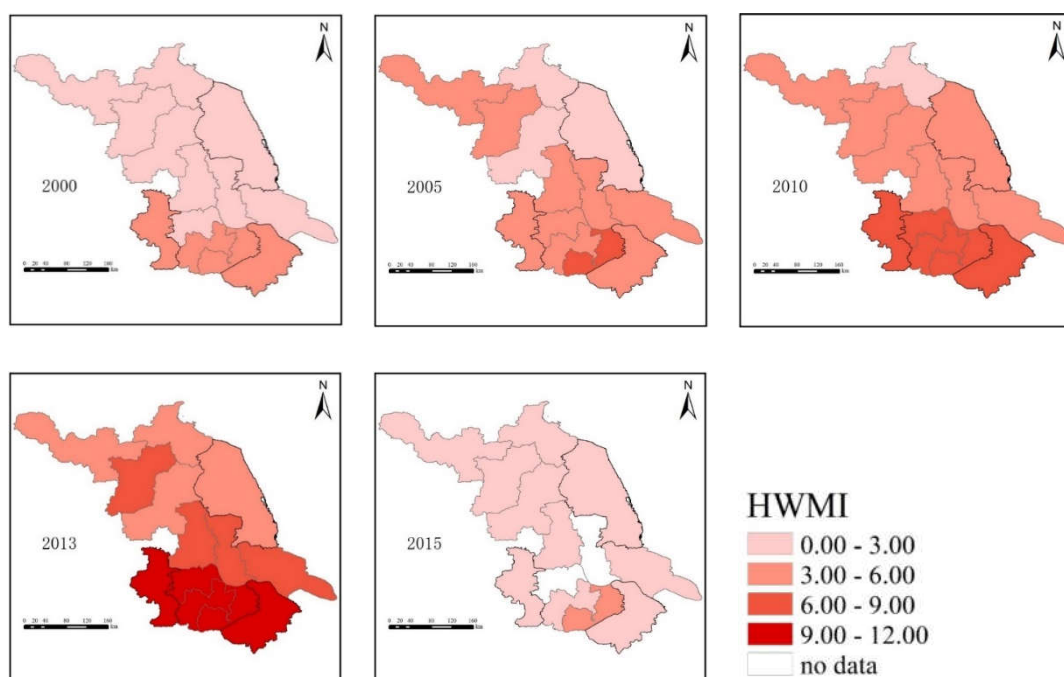

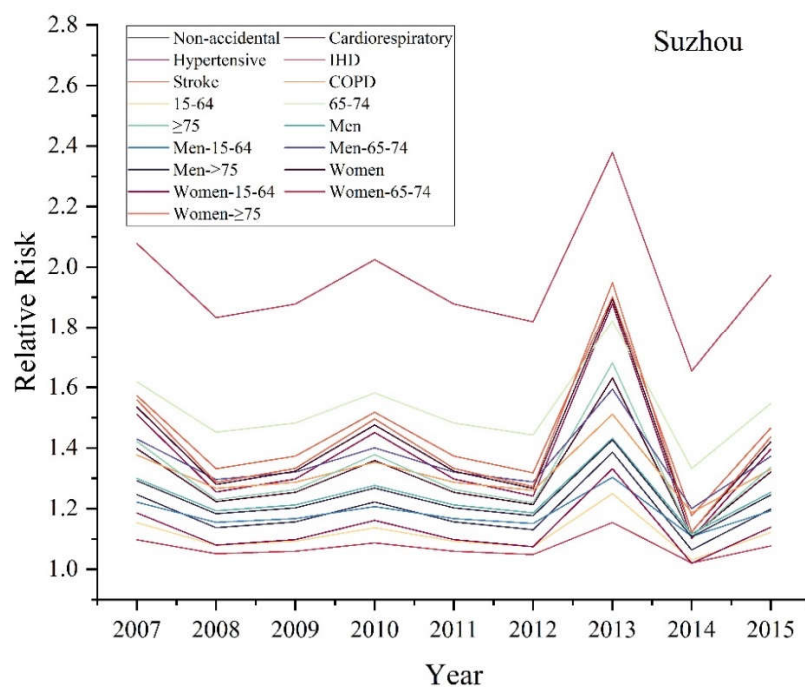

Figure S2. Spatial-temporal patterns of HWMI.

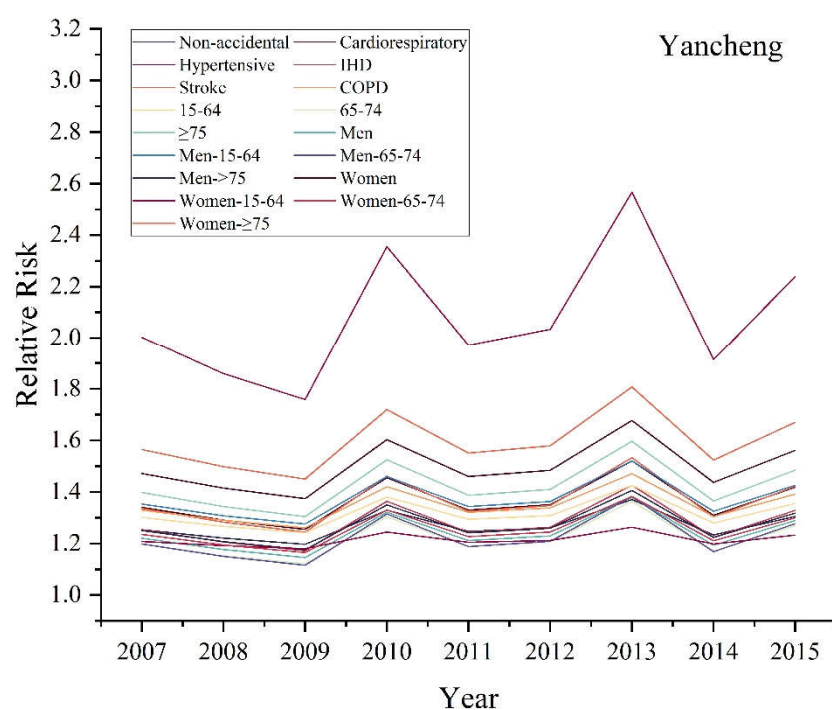

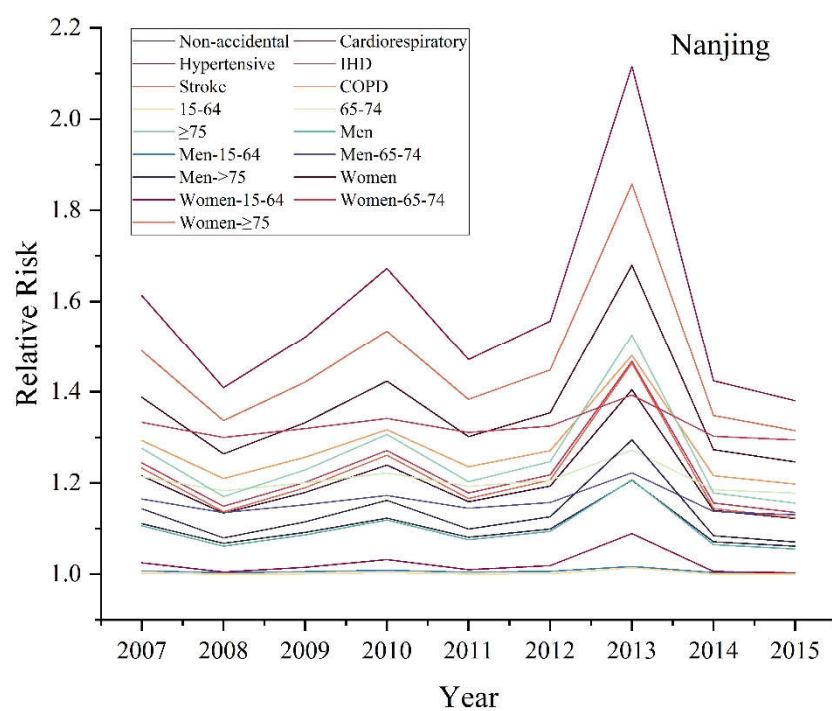

Figure S3. Mortality relative risk caused by heat from 2007 to 2015.

Table S1. Estimated effects of heat (95% confidence interval) on cause-specific mortality during 2007 to 2015 in 3 cities.

| Cause of death | Nanjing | Suzhou | Yancheng |
|----------------------------|-----------------|-----------------|-----------------|
| | RR | RR | RR |
| Non-accidental | 1.10(1.04,1.15) | 1.15(1.08,1.22) | 1.27(1.18,1.36) |
| Cardiorespiratory diseases | 1.19(1.12,1.26) | 1.28(1.21,1.35) | 1.36(1.25,1.49) |
| Hypertensive diseases | 1.54(1.16,2.03) | 1.33(1.16,1.53) | 2.07(1.27,3.37) |
| IHD | 1.21(1.09,1.34) | 1.06(0.93,1.20) | 1.27(1.08,1.50) |
| Stroke | 1.20(1.11,1.29) | 1.40(1.26,1.56) | 1.36(1.21,1.53) |
| COPD | 1.26(1.03,1.55) | 1.30(1.09,1.55) | 1.35(1.16,1.56) |

IHD: ischemic heart diseases, COPD: chronic obstructive pulmonary disease

Table S2. Estimated effects of heat (95% confidence interval) on cardiorespiratory mortality during 2007 to 2015 in different sexes and age-groups in 3 cities.

| sex, age | Nanjing | Suzhou | Yancheng |
|------------|-----------------|-----------------|-----------------|
| | RR | RR | RR |
| All | | | |
| All ages | 1.19(1.12,1.26) | 1.28(1.21,1.35) | 1.36(1.25,1.49) |
