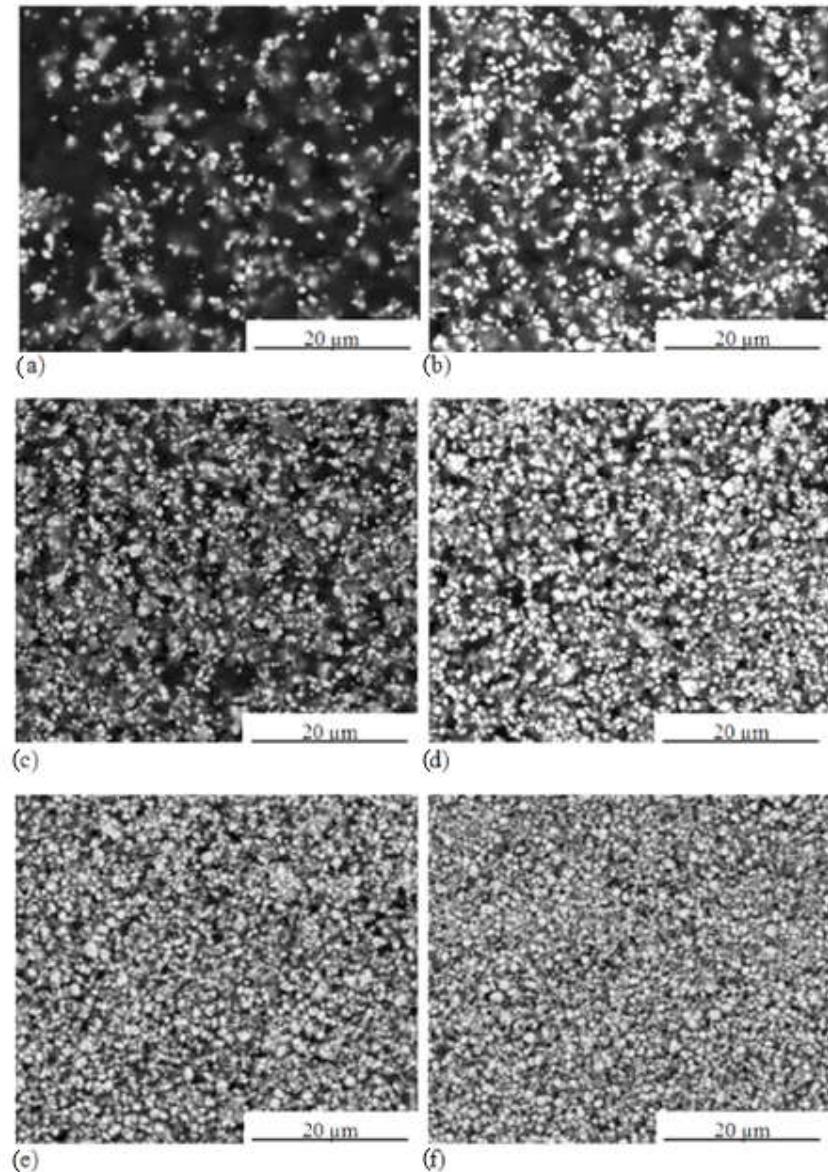

Figure S1. SEM micrographs of PZT-polymer composites with increasing filler content (dark: polymer matrix, bright: filler particles); (a) 5 vol.% PZT, (b) 15 vol.% PZT, (c) 25 vol.% PZT, (d) 35 vol.% PZT, (e) 45 vol.% PZT, (f) 55 vol.% PZT.

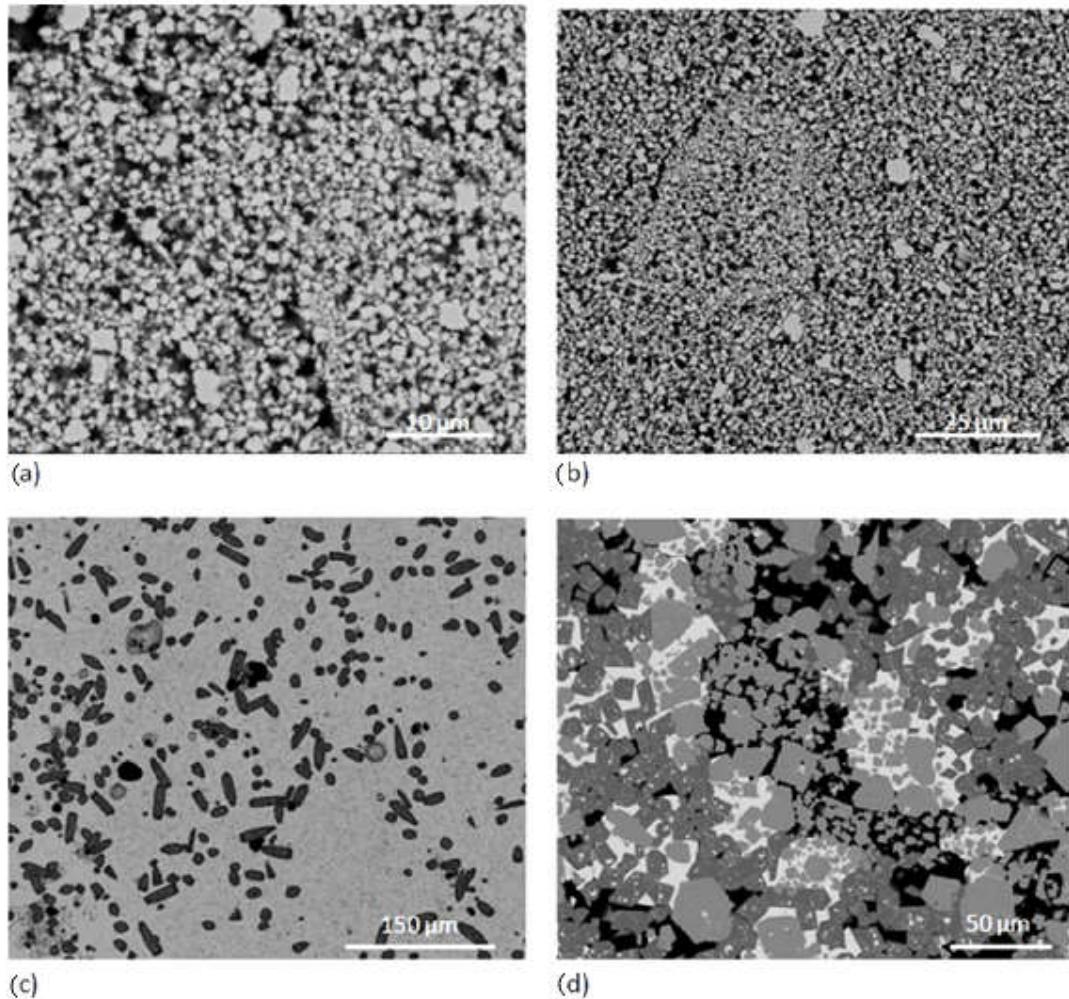

Figure S2. SEM micrographs of selected PZT-polymer composites with a filler content of 40 vol.% PZT with increasing heat treatment processing; (a) 500 °C, (b) 750 °C, (c) 1000 °C, (d) 1250 °C.

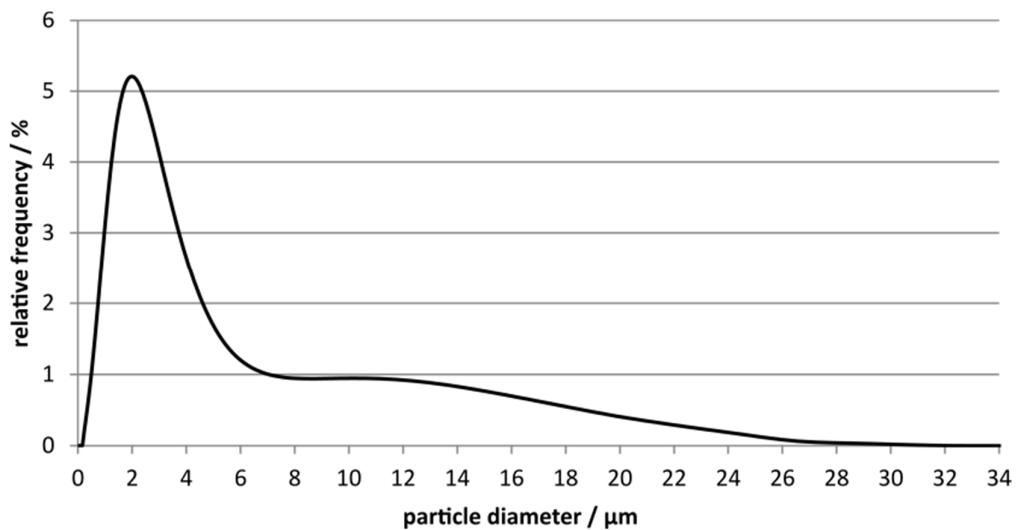

Figure S3. Particle size distribution of the NCE51 PZT-powder
