

Figure S1. Weight change curves of mice. (A to D) Five-week-old BALB/c mice were infected by the i.c. route with four viruses at different doses ( $10^{1.0}$ ,  $10^{2.0}$ ,  $10^{3.0}$  or  $10^{4.0}$  TCID<sub>50</sub>), respectively or mock infected. Animals were monitored daily for the appearance of symptoms and weight changes were recorded during the two weeks period of observation.

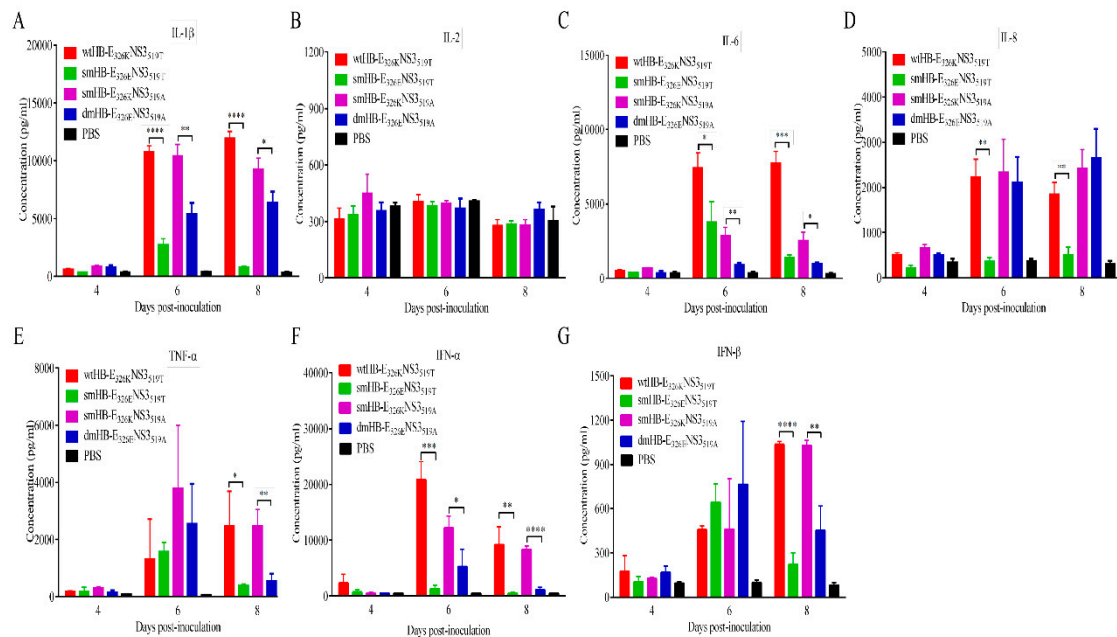

Figure S2. The wtHB-E326K-NS3<sub>519T</sub> and mutant viruses induce different protein levels inflammatory cytokines in the mouse brain. Five-week-old BALB/c mice were infected by the i.c. route with virus at a dose  $10^{3.0}$  TCID<sub>50</sub>. Supernatants of infected mouse brain homogenates

were collected for measurement of pro-inflammatory cytokines(A-E) and IFN- $\alpha/\beta$  (F and G) at protein levels by ELISA. (\*\*\*\*,  $p < 0.0001$ ; \*\*\*,  $p < 0.001$ ; \*\*,  $p < 0.01$ ; \*,  $p < 0.05$ ).

Figure S3. The death of infected mice was promoted by i.c. injection of IFN- $\beta$ . Five-week-old BALB/c mice were infected by the i.c. route with virus at a dose  $10^{3.0}$  TCID<sub>50</sub>. Human recombinant IFN- $\beta$  was injected into the brain of mice at a dose of 3000 U at 3 dpi and 5 dpi to observe the survival of the mice.

Figure S4. Histopathologic analysis of the hematoxylin and eosin (HE)-stained brain tissue of mice infected. Five-week-old female BALB/c mice were infected by the i.c. route with wtHB-E<sub>326K</sub>NS<sub>3519T</sub> and smHB-E<sub>326E</sub>NS<sub>3519T</sub> at a dose  $10^{3.0}$  TCID<sub>50</sub>. Brain tissues of infected mice was collected at 4, 6, and 8 dpi for histopathological analysis.

Table S1. Primers used in the study

Primer name	Sequence (5' to 3')	Positions	Application
HBRT1	ACACATCGGGTAGGTC	1856-1871	Specific reverse transcription primer
HBRT2	CCTTCTCAAAATCTCC	3578-3593	Specific reverse transcription primer
HBRT3	ATCTCTGTGATGCTCC	4404-4419	Specific reverse transcription primer
HBRT4	GTCAACCTTGTCCCGC	2433-2457	Specific reverse transcription primer
HBRT5	TGCCGTCGCTGGTCTCAA	3806-3831	Specific reverse transcription primer
HBRT6	TAACCTCTCACTTCCT	3656-3680	Specific reverse transcription primer
HBRT7	AGACTCTGTGTTCTAC	10957-10991	Specific reverse transcription primer
HBT7-1F	CCCGGGTAATACGACTCACTATAGGGA GAAGTTCATCTGTGTGAAGTTATTCC	1-27	Amplifying HB
HB-956R	GCTGTACGCTGGGGC	942-956	Amplifying HB
HB-942F	GCCCCAGCGTACAGCTT	942-958	Amplifying HB
HB-2459R	GGCATTGACATTTACTGCC	2441-2459	Amplifying HB
HB-2433F	GTCTTCCTGGCAGTAAATGTCAATG	2433-2457	Amplifying HB
HB-3831R	ATCTGCTTTCCTGATTGCTCCACTTC	3806-3831	Amplifying HB
HB-3656F	AGGAATCACGTACAGTGATCTGGTC	3656-3680	Amplifying HB
