

Supplementary Materials: In Silico Selection and Evaluation of Pugnins with Antibacterial and Anticancer Activity Using Skin Transcriptome of Treefrog (*Boana pugnax*)

Yamil Liscano, Laura Medina, Jose Oñate-Garzón, Fanny Gúzman, Monica Pickholz and Jean Paul Delgado

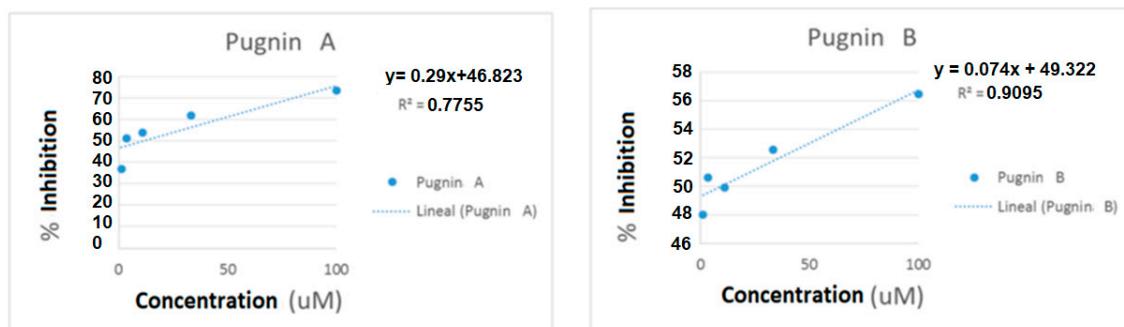

Figure S1. Percentage of growth inhibition of *S. aureus* of the pugnins A and B, with their respective R^2 of the concentration curve of each peptide and the equation of the line is also observed.

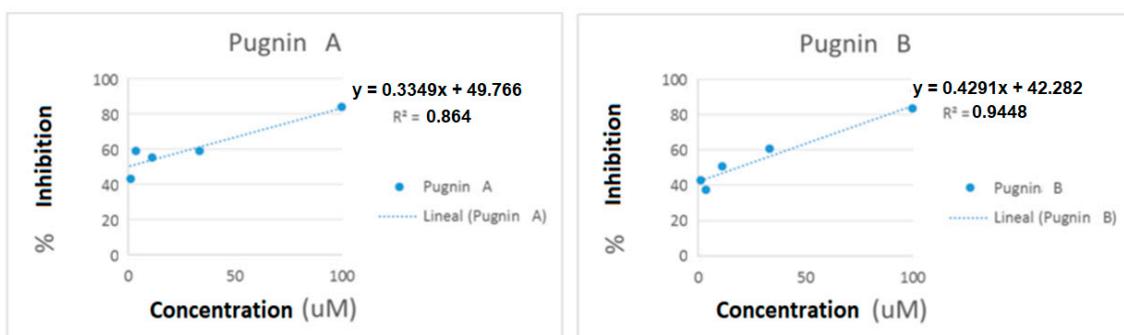

Figure S2. Percentage of growth inhibition of *E. faecalis* of the pugnins A and B, with their respective R^2 of the concentration curve of each peptide and the equation of the line is also observed.

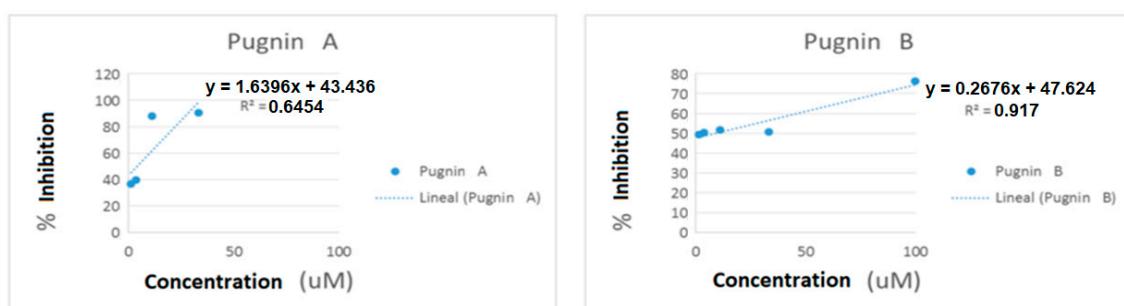

Figure S3. Percentage of growth inhibition of *P. aeruginosa* of the pugnins A and B, with their respective R^2 of the concentration curve of each peptide and the equation of the line is also observed.

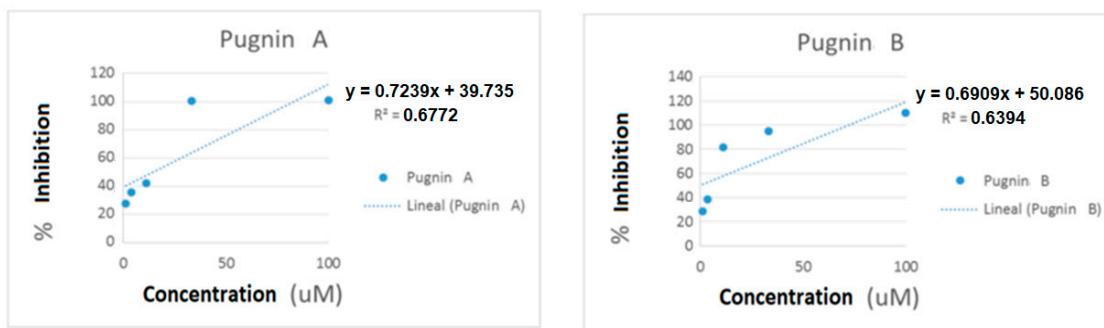

Figure S4. Percentage of growth inhibition of *E. coli* of the pugnins A and B, with their respective R^2 of the concentration curve of each peptide and the equation of the line is also observed.

Extended Information

[Comments]
Sample name 3665 TFE 30%
Comment
User
Division
Company NBC PUCV

[Detailed Information]

Creation date #####

Data array type Linear data array * 3
Horizontal axis Wavelength [nm]
Vertical axis(1) Mol. Ellip.
Vertical axis(2) HT [V]
Vertical axis(3) Abs
Start 250 nm
End 190 nm
Data interval 0.5 nm
Data points 121

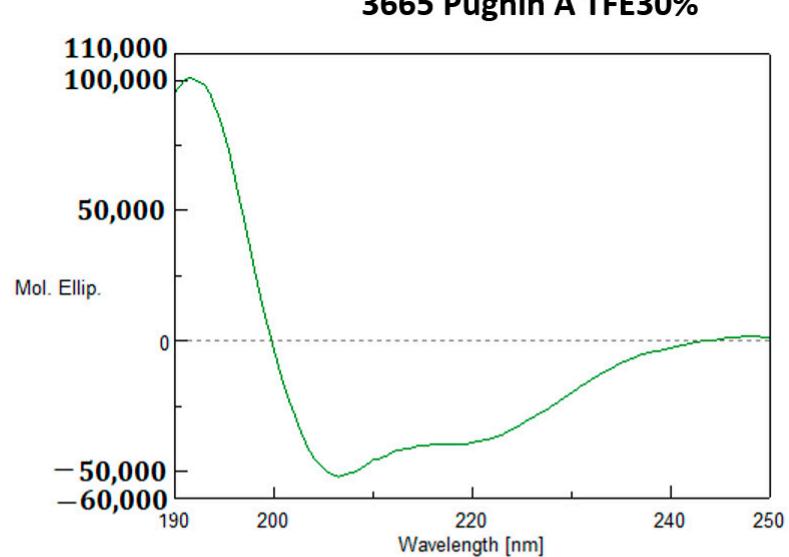

[Measurement Information]

Instrument name DICROISMO PUCV
Model name J-815
Serial No. B052661168

Accessory CDF-426S
Accessory S/N B009861183
Temperature 19.98 C
Control sensor Holder
Monitor sensor Holder
Start Mode Start immediately
Cell length 10 mm

Measurement date #####

Photometric mode CD. HT. Abs
Measure range 250 - 190 nm
Data pitch 0.5 nm
Sensitivity Standard
D.I.T. 2 sec
Bandwidth 1.00 nm
Start mode Immediately
Scanning speed 100 nm/min
Baseline correction None
Shutter control Manual
CD detector PMT
PMT voltage Auto
Accumulations 3

Residual	4,753	30	0,1584		
Number of missing values	0				

Table S6. One-way ANOVA and post-HOC comparisons of control with MTT cytotoxicity treatments of pugnins in HACAT cells. * significant value; ** high significant value; **** very high significant value.

Table Analyzed		One-Way ANOVA Data		
ANOVA Summary				
	F		47,68	
	P value		<0,0001	
	P value summary		****	
	Are differences among means statistically significant? ($P < 0.05$)		Yes	
	R square		0,7607	
Dunnett's multiple comparisons test	Mean Diff,	95% CI of diff,	Significant?	Summary
Control vs. Pugnina A	26,45	9,234 to 43,67	Yes	**
Control vs. Pugnina B	72,45	55,23 to 89,67	Yes	****

Table 7. One-way ANOVA and post-HOC comparisons of control with MTT cytotoxicity treatments of pugnins in MFC7 cells. * significant value; ** high significant value; **** very high significant value.

Table Analyzed		One-Way ANOVA Data		
ANOVA Summary				
	F		321,5	
	P value		<0,0001	
	P value summary		****	
	Are differences among means statistically significant? ($P < 0.05$)		Yes	
	R square		0,9554	
Dunnett's multiple comparisons test	Mean Diff,	95% CI of diff,	Significant?	Summary
Control vs. Pugnina A	77,84	68,84 to 86,83	Yes	****
Control vs. Pugnina B	84,88	75,88 to 93,88	Yes	****

Table 8. One-way ANOVA and post-HOC comparisons of control with MTT cytotoxicity treatments of pugnins in PC3 cells. * significant value; ** high significant value; **** very high significant value.

Table Analyzed		One-Way ANOVA Data		
ANOVA Summary				
	F		3,445	
	P value		0,0450	
	P value summary		*	
	Are differences among means statistically significant? ($P < 0.05$)		Yes	
	R square		0,1868	
Dunnett's multiple comparisons test	Mean Diff,	95% CI of diff,	Significant?	Summary
Control vs. Pugnina A	13,69	0,08111 to 27,31	Yes	*
Control vs. Pugnina B	-1,387	-15,00 to 12,23	No	ns
