**Controls**

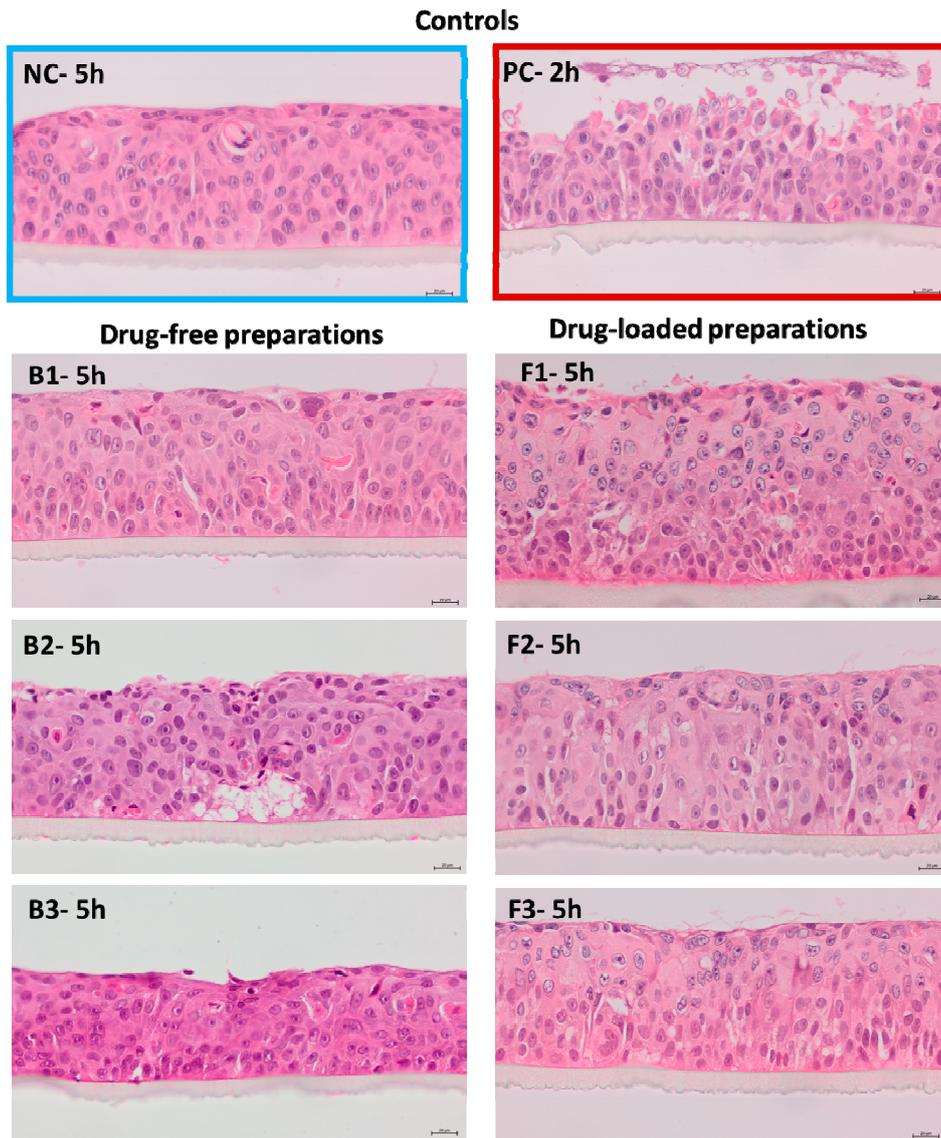

**Drug-free preparations**

**Drug-loaded preparations**

(A)

(B)

**Figure S1.** H&E staining of the representative histopathological sections of the human oral epithelium model after: (A) 2h, (B) 5h incubation with ALA-loaded emulgels (F1-F3) and corresponded drug-free formulations (B1-B3) compared to negative control (NC, water treated tissue) and positive control (PC, SDS treated tissue). Tissue Fragn. – tissue fragmentation; N – necrotic cell.
