Statistics of the operational taxonomic units (OTU) clusters and species annotation of every replication of treatment. Total Tag indicates the number of total effective tags. Unique Tag indicates the total number of singletons which were removed for further analysis from the dataset. Taxon Tag displays the total number of tags which were subjected to OTU clusters along species annotation. Unclassified Tag represents the total number of tags without species annotation. OTU number show the number of OTUs for each replication of treatment.
