

remote sensing-1598935-supplementary

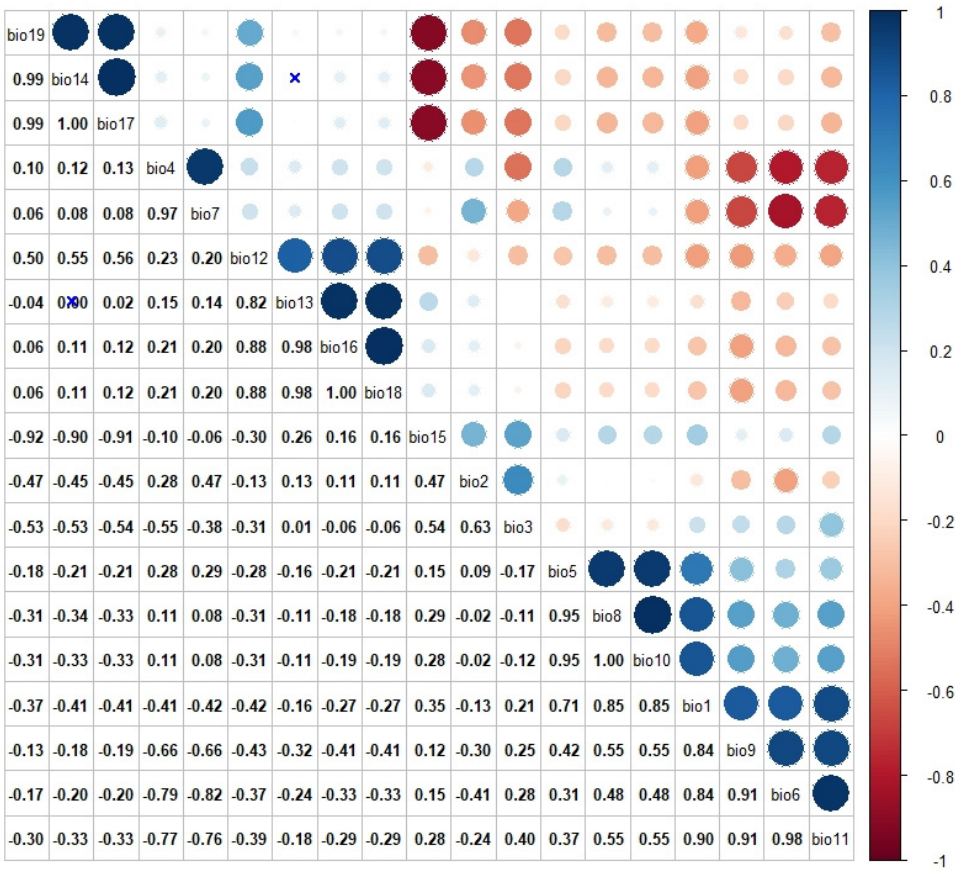

Figure S1. Pearson correlation coefficient of bioclimatic factors. The blue cross indicates the difference is not significant ($p > 0.05$); all remaining differences were significant ($p < 0.001$).

Figure S2. The response curve of distribution probability of Swan Geese in breeding grounds.

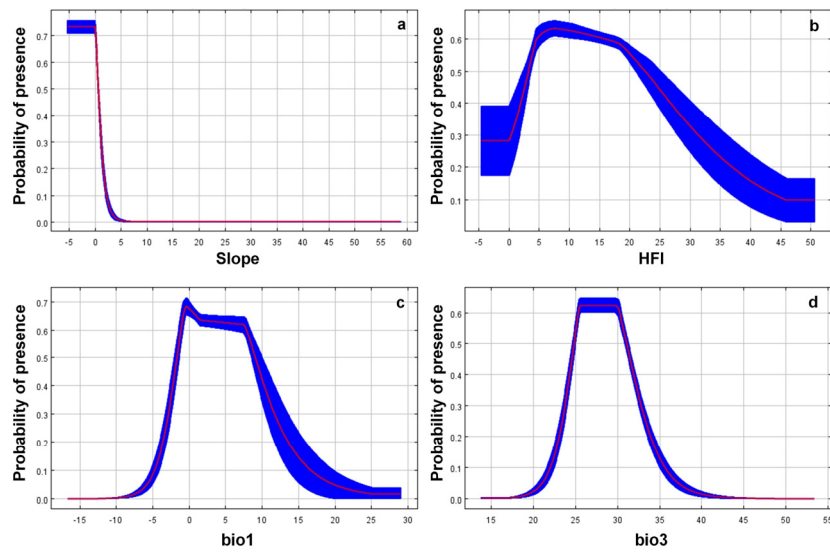

Figure S3. The response curve of distribution probability of Swan Geese in stopover sites.

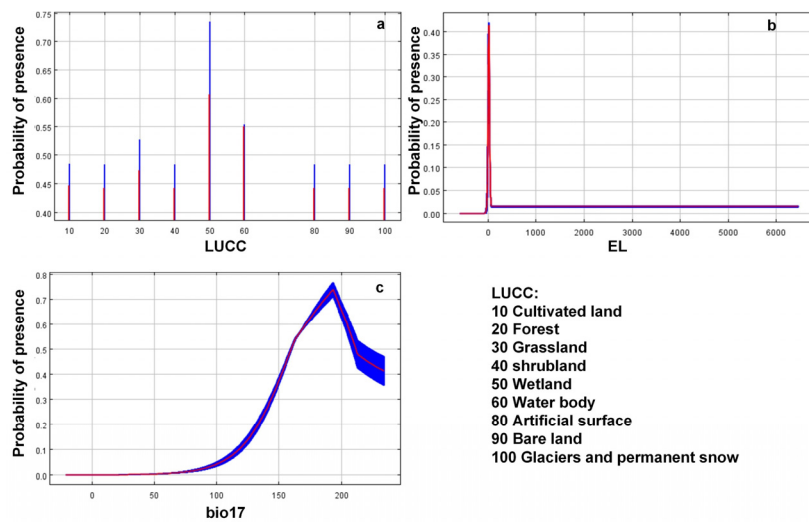

Figure S4. The response curve of distribution probability of Swan Geese in wintering grounds
