

STROBE Statement—Checklist of items that should be included in reports of *cross-sectional studies*

	Item No	Recommendation	
Title and abstract	1	(a)	Indicate the study's design with a commonly used term in the title or the abstract Page 1
		(b)	Provide in the abstract an informative and balanced summary of what was done and what was found Page 1
Introduction			
Background/rationale	2	Explain the scientific background and rationale for the investigation being reported Page 1-2	
Objectives	3	State specific objectives, including any prespecified hypotheses Page 2	
Methods			
Study design	4	Present key elements of study design early in the paper Page 2-3	
Setting	5	Describe the setting, locations, and relevant dates, including periods of recruitment, exposure, follow-up, and data collection Page 2-3	
Participants	6	Give the eligibility criteria, and the sources and methods of selection of participants Page 2-3	
Variables	7	Clearly define all outcomes, exposures, predictors, potential confounders, and effect modifiers. Give diagnostic criteria, if applicable Page 2-3	
Data sources/ measurement	8*	For each variable of interest, give sources of data and details of methods of assessment (measurement). Describe comparability of assessment methods if there is more than one group Page 2-3	
Bias	9	Describe any efforts to address potential sources of bias Page 2-3	
Study size	10	Explain how the study size was arrived at Page 2-3	
Quantitative variables	11	Explain how quantitative variables were handled in the analyses. If applicable, describe which groupings were chosen and why Page 2-3	
Statistical methods	12	(a)	Describe all statistical methods, including those used to control for confounding Page 3
		(b)	Describe any methods used to examine subgroups and interactions Page 3
		(c)	Explain how missing data were addressed Page 3
		(d)	If applicable, describe analytical methods taking account of sampling strategy N/A
		(e)	Describe any sensitivity analyses N/A
Results			

Participants	13*	(a)	Report numbers of individuals at each stage of study—eg numbers potentially eligible, examined for eligibility, confirmed eligible, included in the study, completing follow-up, and analysed Page 3-4
		(b)	Give reasons for non-participation at each stage Page 3-4
		(c)	Consider use of a flow diagram N/A
Descriptive data	14*	(a)	Give characteristics of study participants (eg demographic, clinical, social) and information on exposures and potential confounders Page 3-4
		(b)	Indicate number of participants with missing data for each variable of interest Page 4
Outcome data	15*		Report numbers of outcome events or summary measures Page 5
Main results	16	(a)	Give unadjusted estimates and, if applicable, confounder-adjusted estimates and their precision (eg, 95% confidence interval). Make clear which confounders were adjusted for and why they were included Page 2-6
		(b)	Report category boundaries when continuous variables were categorized N/A
		(c)	If relevant, consider translating estimates of relative risk into absolute risk for a meaningful time period N/A
Other analyses	17		Report other analyses done—eg analyses of subgroups and interactions, and sensitivity analyses N/A
Discussion			
Key results	18		Summarise key results with reference to study objectives Page 6
Limitations	19		Discuss limitations of the study, taking into account sources of potential bias or imprecision. Discuss both direction and magnitude of any potential bias Page 8
Interpretation	20		Give a cautious overall interpretation of results considering objectives, limitations, multiplicity of analyses, results from similar studies, and other relevant evidence Page 8
Generalisability	21		Discuss the generalisability (external validity) of the study results Page 8
Other information			
Funding	22		Give the source of funding and the role of the funders for the present study and, if applicable, for the original study on which the present article is based Page 8

*Give information separately for exposed and unexposed groups.
