

Supplemental table 1: Blood parameters before and at conclusion of the last treatment phase for participants in the oligofructose ($n = 45$) and maltodextrin (placebo; $n = 43$) groups. Within group differences (before compared with after final treatment period) are marked with * ($p < 0.05$) or ** ($p < 0.01$). Differences between oligofructose and maltodextrin groups are marked with # ($p < 0.05$) or ## ($p < 0.01$).

Blood parameter (Reference Values)	Oligofructose		Maltodextrin
