

## Supplementary Materials: *Annona cherimola* Seed Extract Activates Extrinsic and Intrinsic Apoptotic Pathways in Leukemic Cells

Tony Haykal, Peter Nasr, Mohammad H. Hodroj, Robin I. Taleb, Rita Sarkis, Marvy Nadine El. Moujabber and Sandra Rizk

**Figure S1.** Comparison of the proliferation reduction induced by various concentrations of *Annona cherimola* seed ethanolic extract (ASEE) in normal mesenchymal cells (MSCs) versus acute myeloid leukemia (AML) cell lines (KG-1, Monomac-1, and U937) at 24 h (a) and 48 h (b). \*\*\*\* indicates a  $p$ -value < 0.001.
