

Supplementary Materials: TIMP-1-Mediated Chemoresistance via Induction of IL-6 in NSCLC

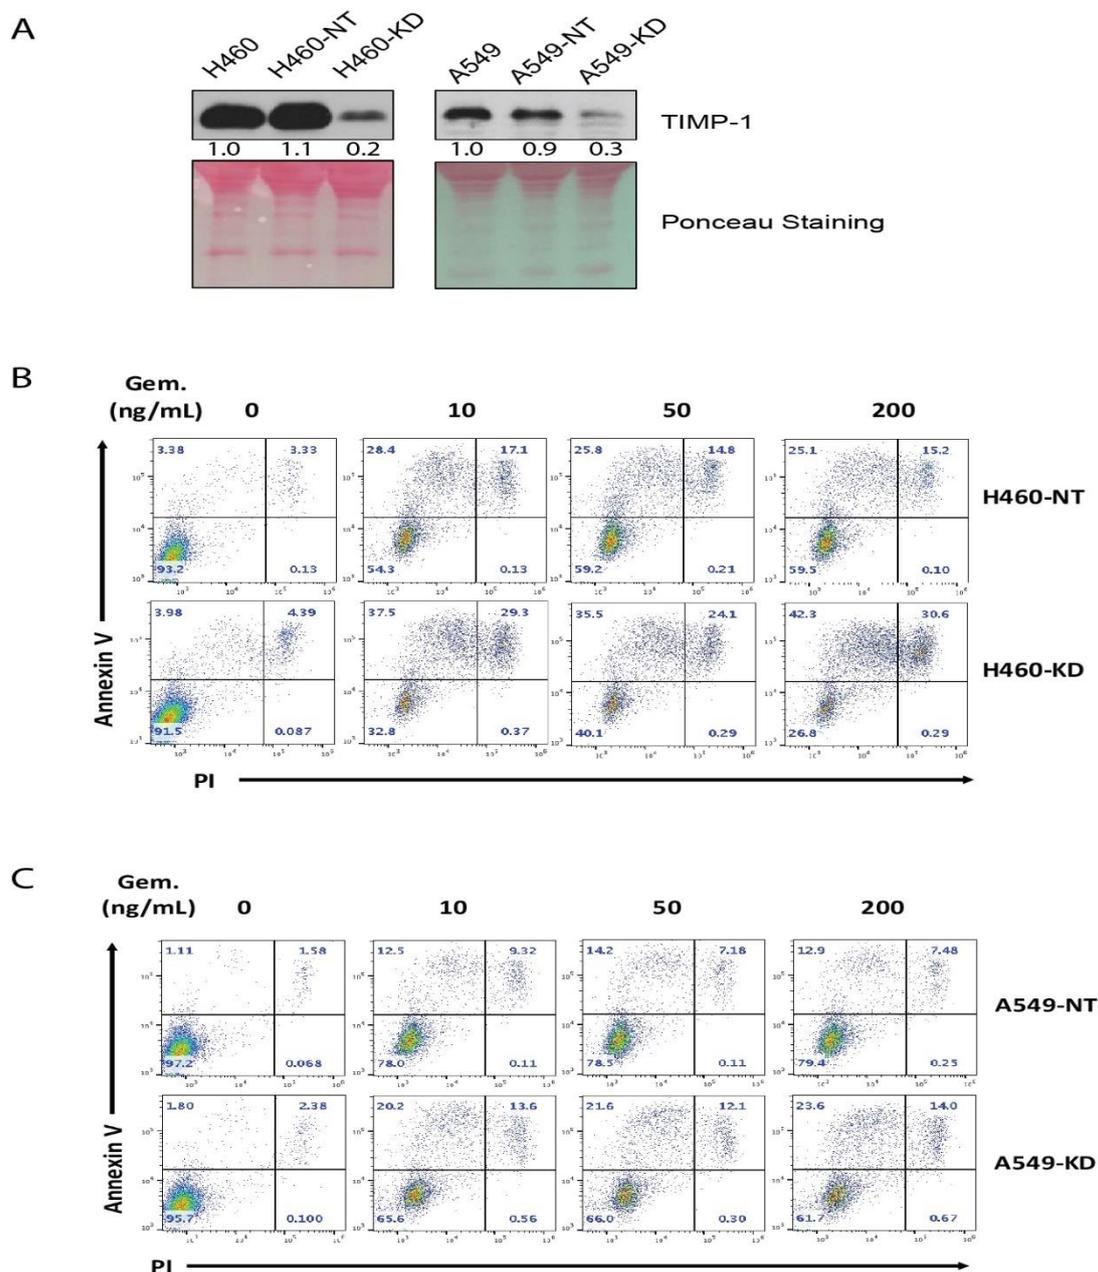

Figure S1. Effects of TIMP-1 gene knockdown on Gemcitabine-induced apoptosis in NSCLC cells. Same counts of NSCLC cells (A549 and H460) and derived TIMP-1 KD and NT clones were seeded and cultured in complete medium for two days. Equal volumes of supernatants were loaded for human TIMP-1-specific immunoblotting analysis. **(B) and (C)** Human NSCLC cells (A549 and H460) encoding non-target scrambled shRNA (NT) sequence or TIMP-1-specific knockdown shRNA (KD) sequence were seeded in 24-well plates (3×10^4 /well). At log-phase, cells were treated with variable doses of gemcitabine as indicated. All floating and adherent cells were collected at 72 hours post treatment, stained with Annexin V and PI and analyzed by flow cytometry. Representative data are shown for apoptosis and cell death of H460 **(B)** and A549-derived cells **(C)**.

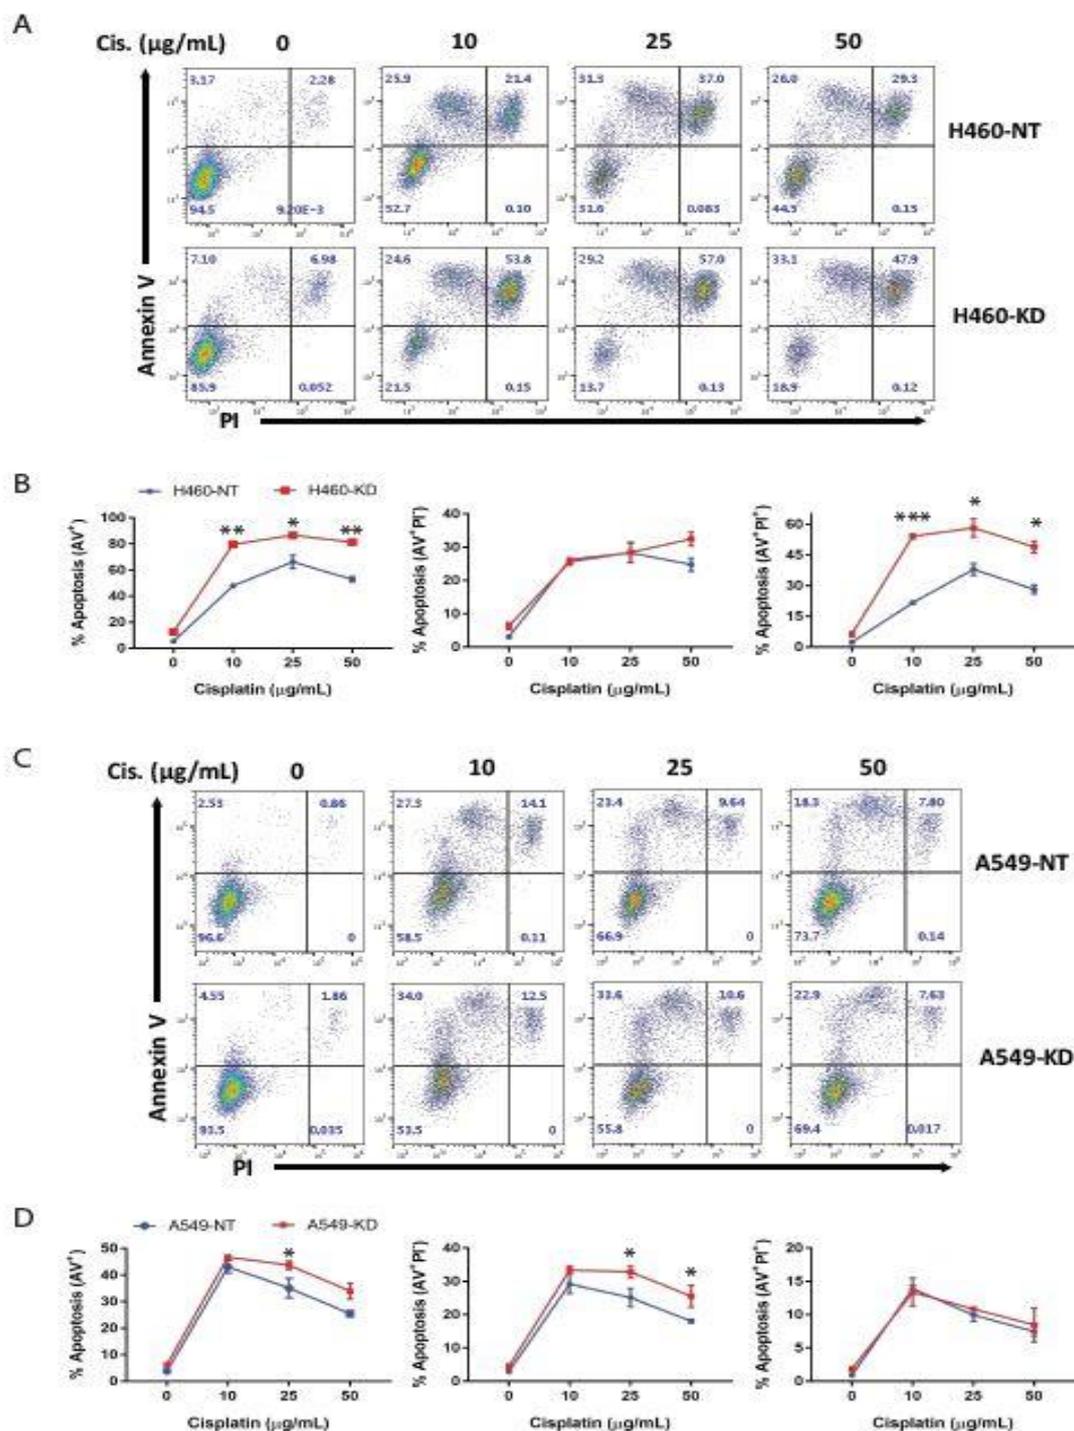

Figure S2. Effects of TIMP-1 gene knockdown on Cisplatin-induced apoptosis in NSCLC cells. Human NSCLC cells (A549 and H460) encoding non-target scrambled shRNA (NT) sequence or TIMP-1-specific knockdown shRNA (KD) sequence were seeded on 24-well plates (3×10^4 /well). At log-phase, cells were treated with variable doses of Cisplatin as indicated. All floating and adherent cells were collected at 48 hours post treatment, and analyzed by flow cytometry following Annexin V and PI staining. Representative data are shown for apoptosis and cell death of H460 and A549-derived cells (A, C). Statistical analysis of total apoptosis (Annexin V⁺), early apoptosis (Annexin V⁺PI⁻) and apoptotic cell death (Annexin V⁺PI⁺) is shown for H460-derived cells (B) and A549-derived cells (D). Data shown is representative from one of two independent experiments.

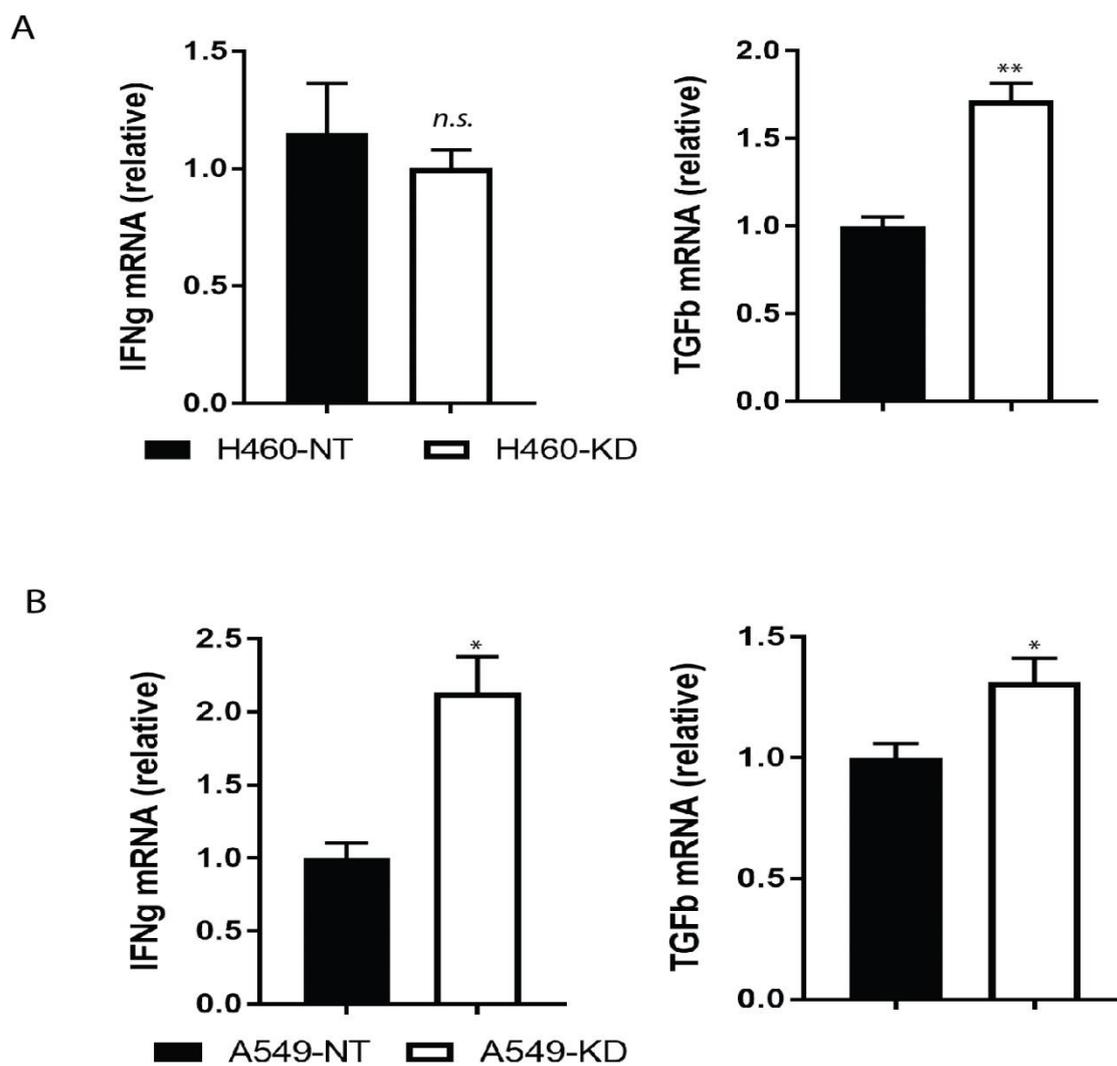

Figure S3. Effects of TIMP-1 gene knockdown on the gene transcription of inflammatory cytokines in NSCLC cells. mRNA levels of IFN γ and TGF β were determined in H460- (A) or A549- (B) derived shRNA-encoding cells (A549-NT, A549-KD, H460-NT and H460-KD) by real-time qRT-PCR.

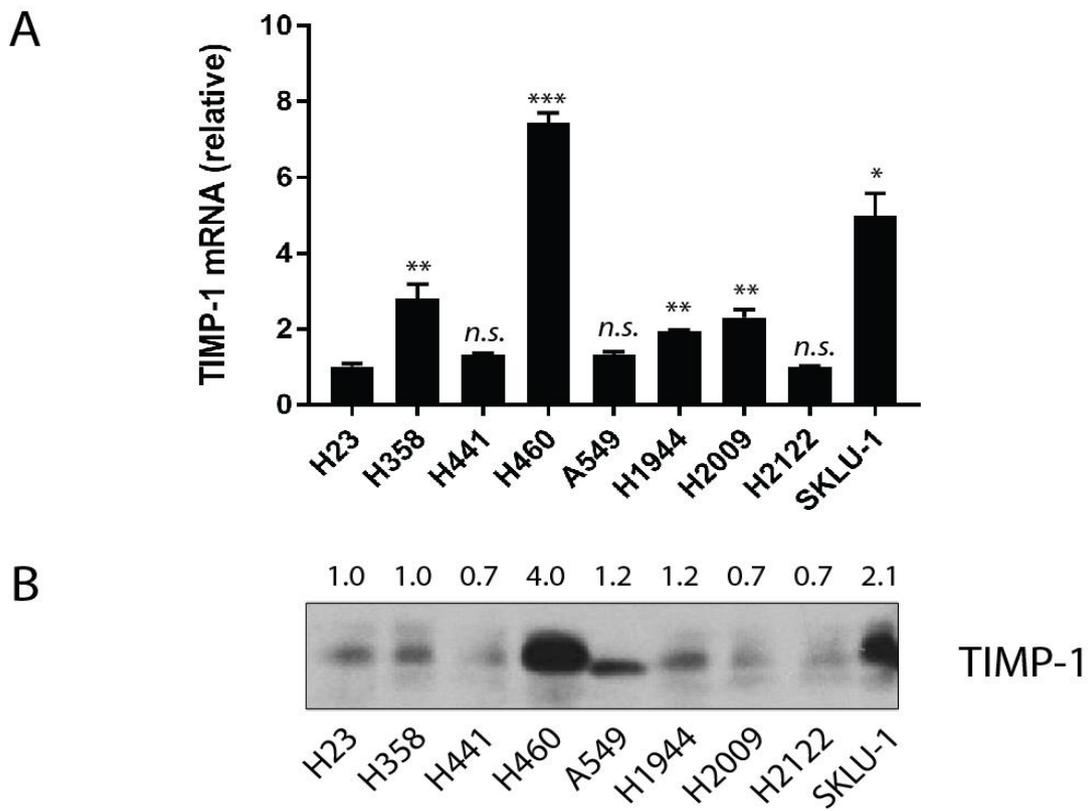

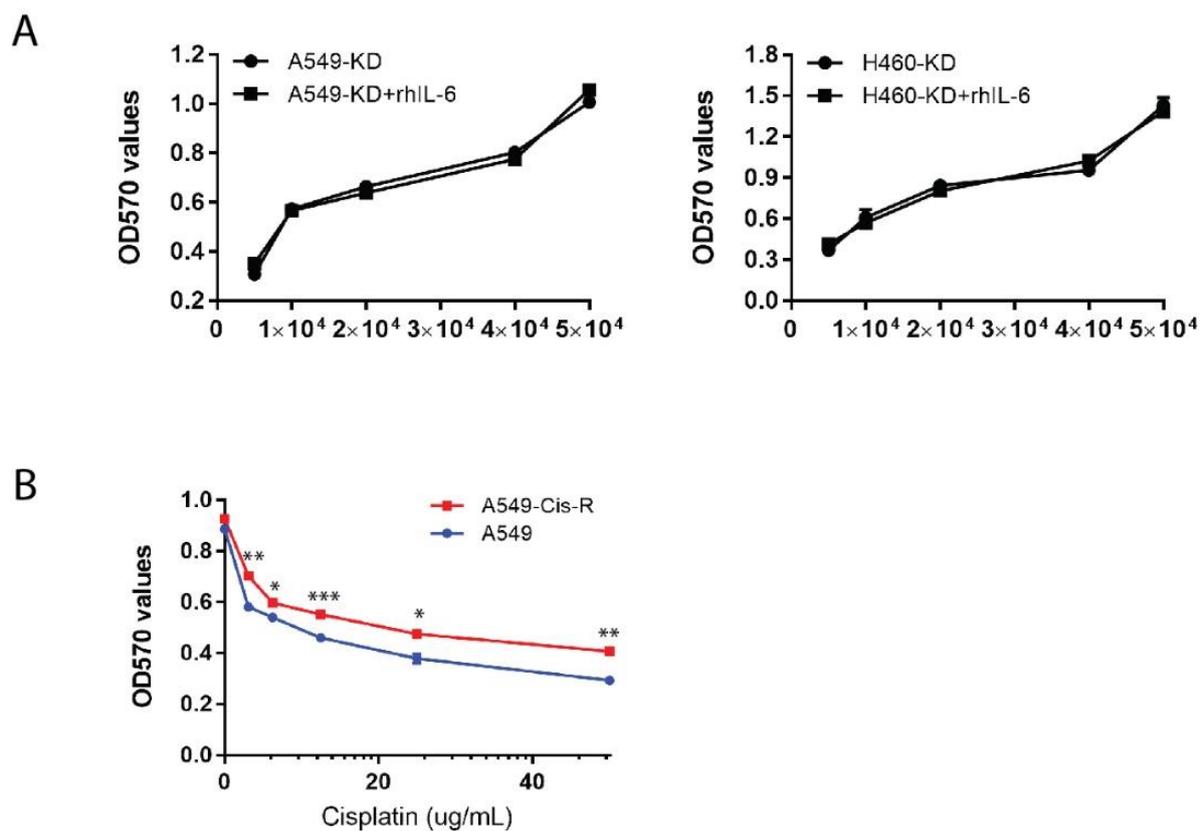

Figure S4. Expression profiles of TIMP-1 in NSCLC cell lines. (A) mRNA levels of TIMP-1 were determined in various NSCLC cell lines, including H23, H358, H441, H460, A549, H1944, H2009, H2122, SKLU-1, by real-time qRT-PCR. (B) Supernatants of culture media from above cell cultures were collected and checked for TIMP-1 protein levels by immunoblotting analysis.

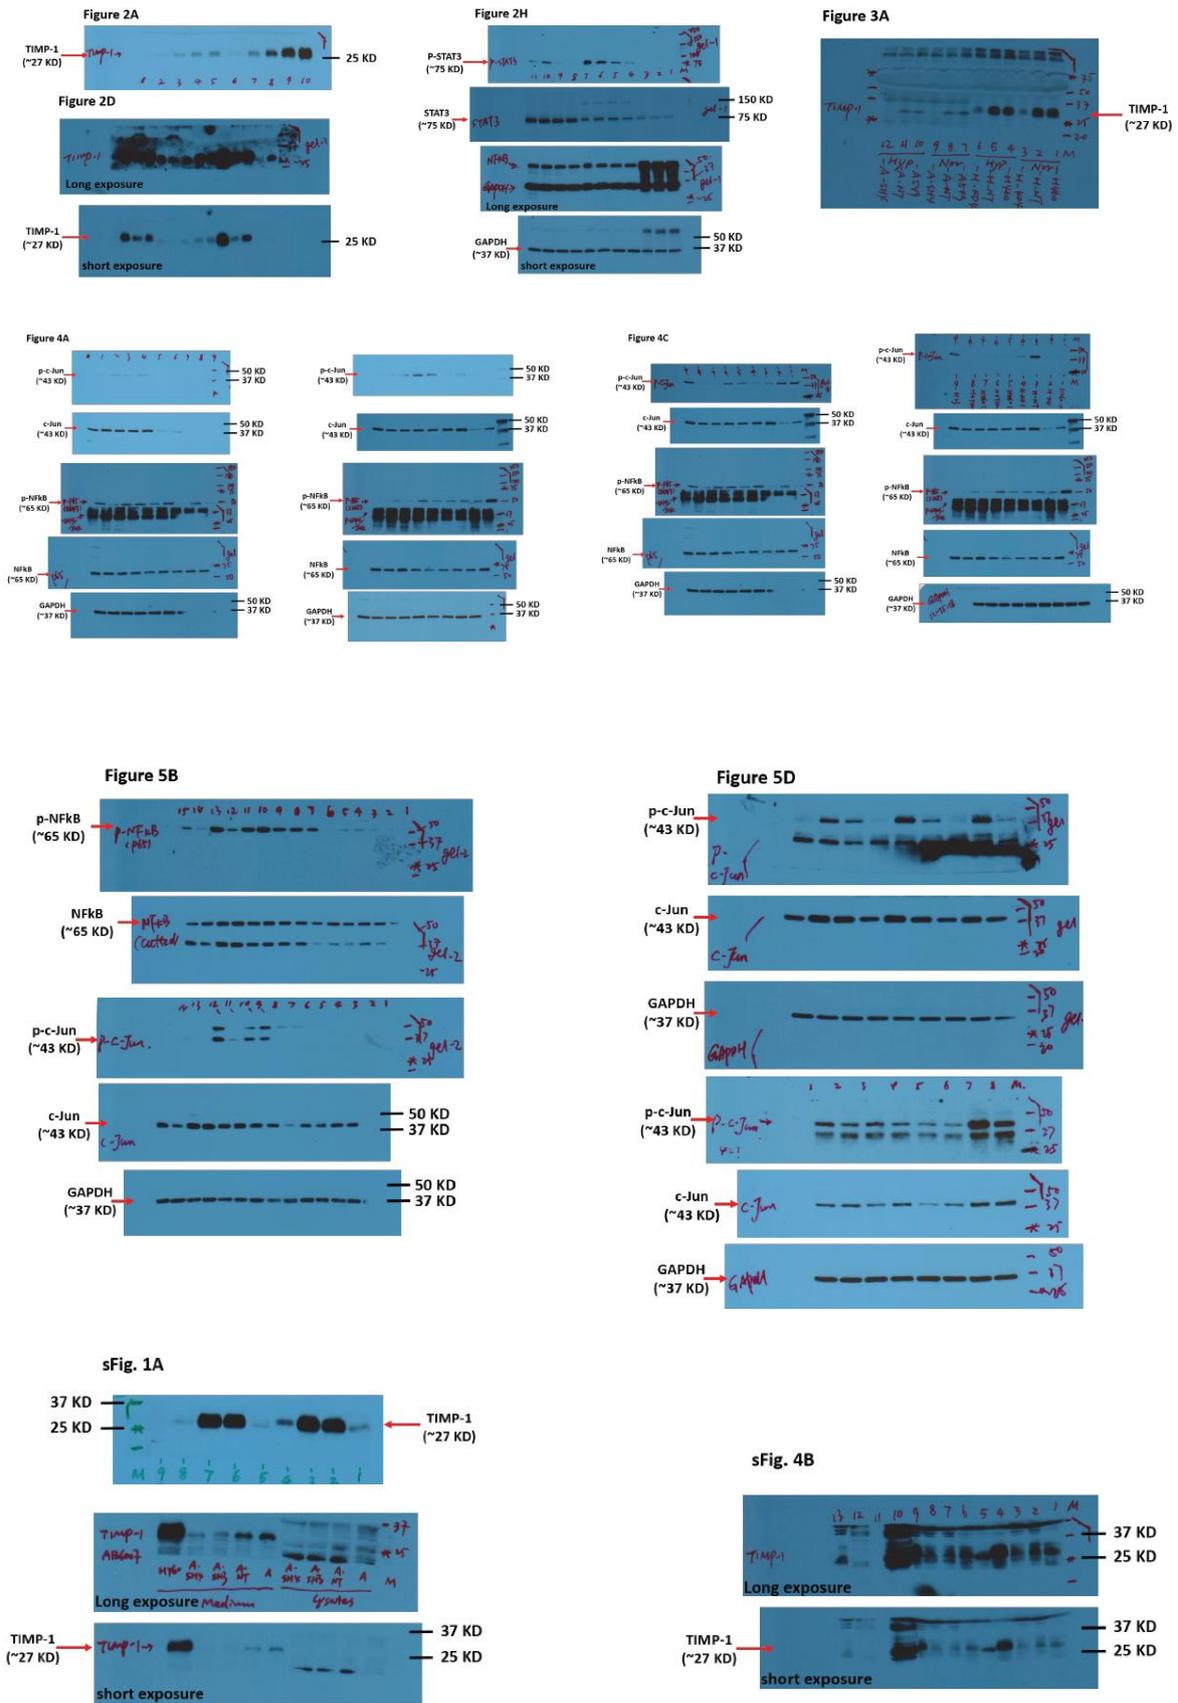

Figure S6. Original Western blot images.

Table S1. Primer Sequences.

| | Primers | Sequences (5'-3') |
|----|------------------------|--------------------------|
| 1 | IL-10_Forward | GCTGGAGGACTTTAAGGGTTAC |
| 2 | IL-10_Reverse | GATGTCTGGGTCTTGGTTCTC |
| 3 | IL-6_Forward | CCAGGAGAAGATTCCAAAGATGTA |
| 4 | IL-6_Reverse | CGTCGAGGATGTACCGAATTT |
| 5 | TGF- β _Forward | CGTGGAGCTGTACCAGAAATAC |
| 6 | TGF- β _Reverse | CACAACTCCGGTGACATCAA |
| 7 | IFN γ _Forward | ATGTCCAACGCAAAGCAATAC |
| 8 | IFN γ _Reverse | ACCTCGAAACAGCATCTGAC |
| 9 | TNF- α _Forward | CCAGGGACCTCTCTCTAATCA |
| 10 | TNF- α _Reverse | TCAGCTTGAGGGTTTGCTAC |
| 11 | TIMP-1_Forward | ATGGACTCTTGCACATCACTAC |
| 12 | TIMP-1_Reverse | GGGATGGATAAACAGGGAAACA |
| 13 | ABCB1_Forward | TGCTGGTTGCTGCTTACA |
| 14 | ABCB1_Reverse | GCCTATCTCCTGTTCGATTATAG |
| 15 | β -Actin_Forward | CACCTTCCAGCCTTCCTTC |
| 16 | β -Actin_Reverse | GTACAGGTCTTTGCGGATGT |

Table S2. List of Antibodies.

| | Targeted Antigens | Antibody Types (clone#/Cat#) | Companies | Dilutions |
|---|-------------------------------------|-------------------------------------|---------------------------|------------------|
| 1 | TIMP-1 | pAB (#AB770) | Millipore Sigma | 1:1000 |
| 2 | phosphor-STAT3 (Tyr705) | mAb (D3A7) | Cell Signaling Technology | 1:1000 |
| 3 | STAT3 | mAb (124H6) | Cell Signaling Technology | 1:1000 |
| 4 | phosphor-c-Jun (Ser63) | pAB (#9261) | Cell Signaling Technology | 1:1000 |
| 5 | c-Jun | mAb (60A8) | Cell Signaling Technology | 1:1000 |
| 6 | phosphor-NF κ B P65 (Ser547) | pAb (#ABS403) | Millipore Sigma | 1:2000 |
| 7 | NF κ B P65 | mAb (D14E12) | Cell Signaling Technology | 1:1000 |
| 8 | GAPDH | mAb (6C5) | Santa Cruz Biotechnology | 1:500 |
