

Sup. Figure S1

Supplementary Figure S1

Kaplan–Meier survival curves for survival after submission of comprehensive genomic profiling (CGP) tests. CI, confidence interval.

Sup. Figure S2

Supplementary Figure S2

Comparison of survival from IPC diagnosis between the patients who had homologous recombination deficiency

(HRD)-related genetic mutations (HRD (+)) and those who did not (HRD (-)).

IPC, incurable pancreatic cancer; OS, overall survival; HRD, homologous recombination deficiency; CI,

confidence interval.
