Figure S1 A graph showing four ROC curves for the Ki-67 expression, pre-and post-treatment concentrations of AOPP, and tumour diameter for evaluating the most accurate indicator for disease recurrence with different values of area under the curve (AUC) and *p*-values.

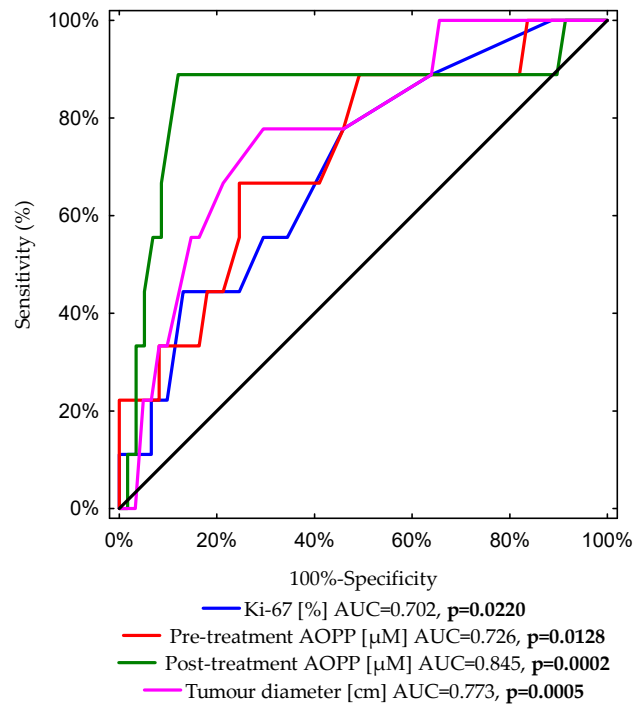

Figure S2 A graph showing four ROC curves for the Ki-67 expression, pre-and post-treatment concentrations of AOPP, and tumour diameter for evaluating the most accurate indicator for predicting cancer-related death with different values of area under the curve (AUC) and *p*-values.
