

Figure S1: PIE scores and genotypes of rs121918166 and rs74653330 in the study cohort ($n = 94$).

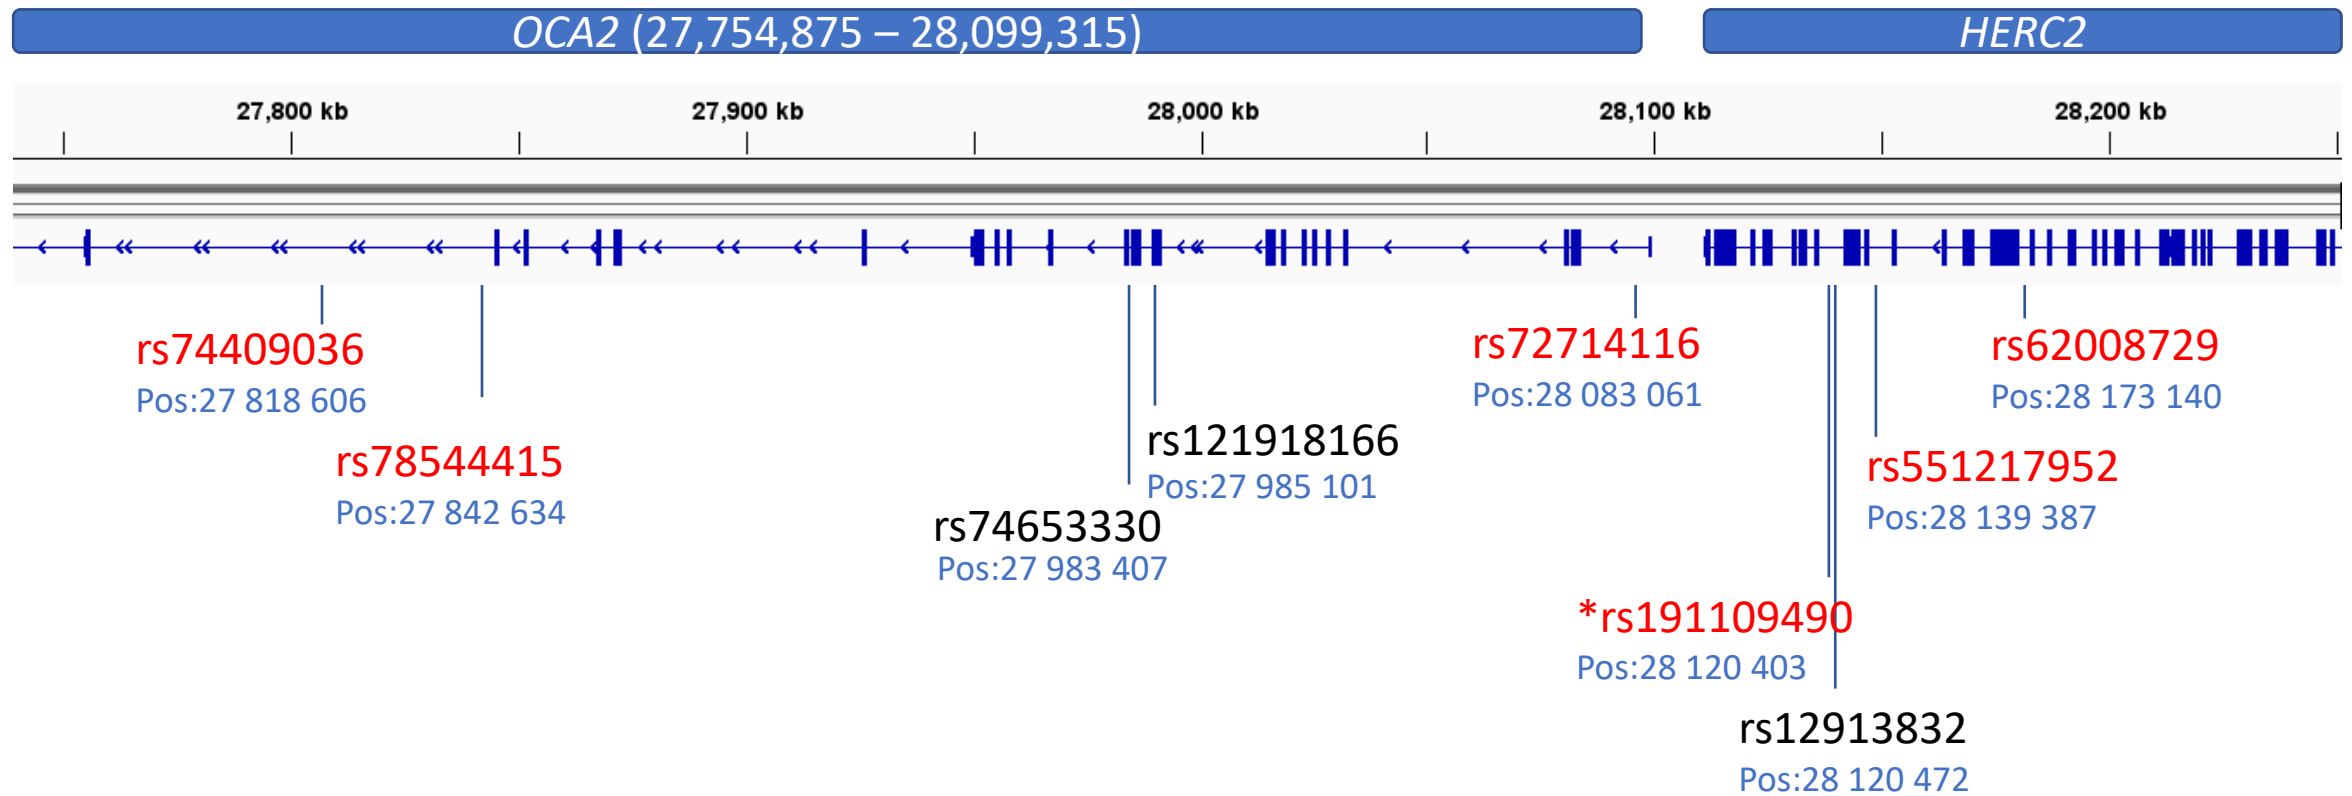

Figure S2: Chromosomal position of the six blue eye colour candidate variants (red), the two missense variants rs74653330 and rs121918166, and the main eye colour predictor SNP rs12913832. Pos = chromosomal position (GRCh38).

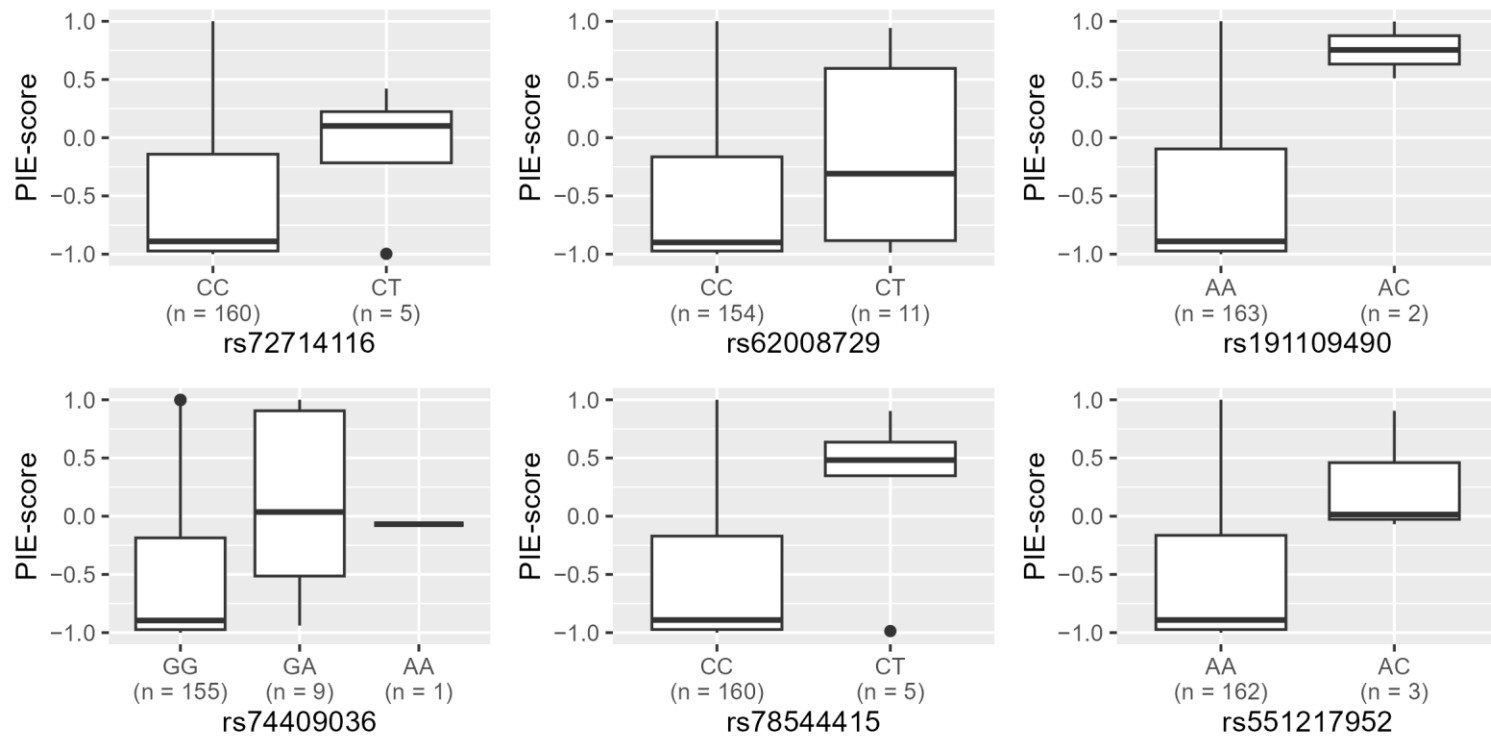

Figure S3: Genotypes and PIE-scores for the candidate blue eye colour variants typed in rs12913832 AA and AG individuals ($n = 165$) from the Norwegian biobank population.
