

**Table S1.** Physico-chemical characteristics of the two saline soil samples designated as SMO1 and SMO2. For methodological aspects see Materials and Methods section.

| Parameter                  | Units | SMO1  | SMO2   |
|----------------------------|-------|-------|--------|
| pH <sub>1:2.5</sub>        | -     | 7.8   | 8.9    |
| EC <sub>1:5</sub>          | dS/m  | 24.0  | 54.5   |
| Salinity (1:5)             | g/l   | 16.3  | 54.7   |
| Water content              | %     | 14.7  | 6.9    |
| Organic matter             | mg/kg | 2,590 | 2,342  |
| Organic carbon             | mg/kg | N.D.  | 13,590 |
| Total carbon               | mg/kg | N.D.  | 17,640 |
| Total nitrogen             | mg/kg | 1,070 | 890    |
| Organic nitrogen           | mg/kg | N.D.  | 780    |
| Ammonia – water soluble    | mg/kg | N.D.  | 3.03   |
| Nitrite – water soluble    | mg/kg | N.D.  | 0.04   |
| Nitrate – water soluble    | mg/kg | N.D.  | 257.0  |
| Sulfate – water soluble    | %     | 1.35  | 6.68   |
| Phosphorus – water soluble | %     | 3.095 | 22.759 |
| Chloride – water soluble   | %     | 0.930 | 14.155 |
| Sodium – water soluble     | %     | 2.95  | 8.6    |
| Magnesium – water soluble  | %     | 0.13  | 0.88   |
| Calcium – water soluble    | %     | 0.27  | 1.32   |
| Potassium – water soluble  | %     | 0.56  | 0.12   |
| Total copper               | mg/kg | N.D.  | 74.1   |
| Total zinc                 | mg/kg | N.D.  | 84.4   |
| Total aluminium            | mg/kg | N.D.  | 5.2    |
| Total arsenic              | mg/kg | N.D.  | 11.5   |
| Total cadmium              | mg/kg | N.D.  | 0.1    |
| Total mercurium            | mg/kg | N.D.  | B.D.L. |
| Total lead                 | mg/kg | N.D.  | 16.8   |

N.D. - Not determined; B.D.L. - Below detection limit

**Table S2.** Fraction of reads (%) devoted to specific osmoadaptation functions and rhodopsins from the studied hypersaline soils and salterns databases. Salterns databases used are described in Table 1. SMO refers to the contigs resulting from the co-assembly of the two saline soil databases, SMO1 and SMO2.

|                                   | SS13   | SS19   | IC21   | SS33   | SS37   | SMO    |
|-----------------------------------|--------|--------|--------|--------|--------|--------|
