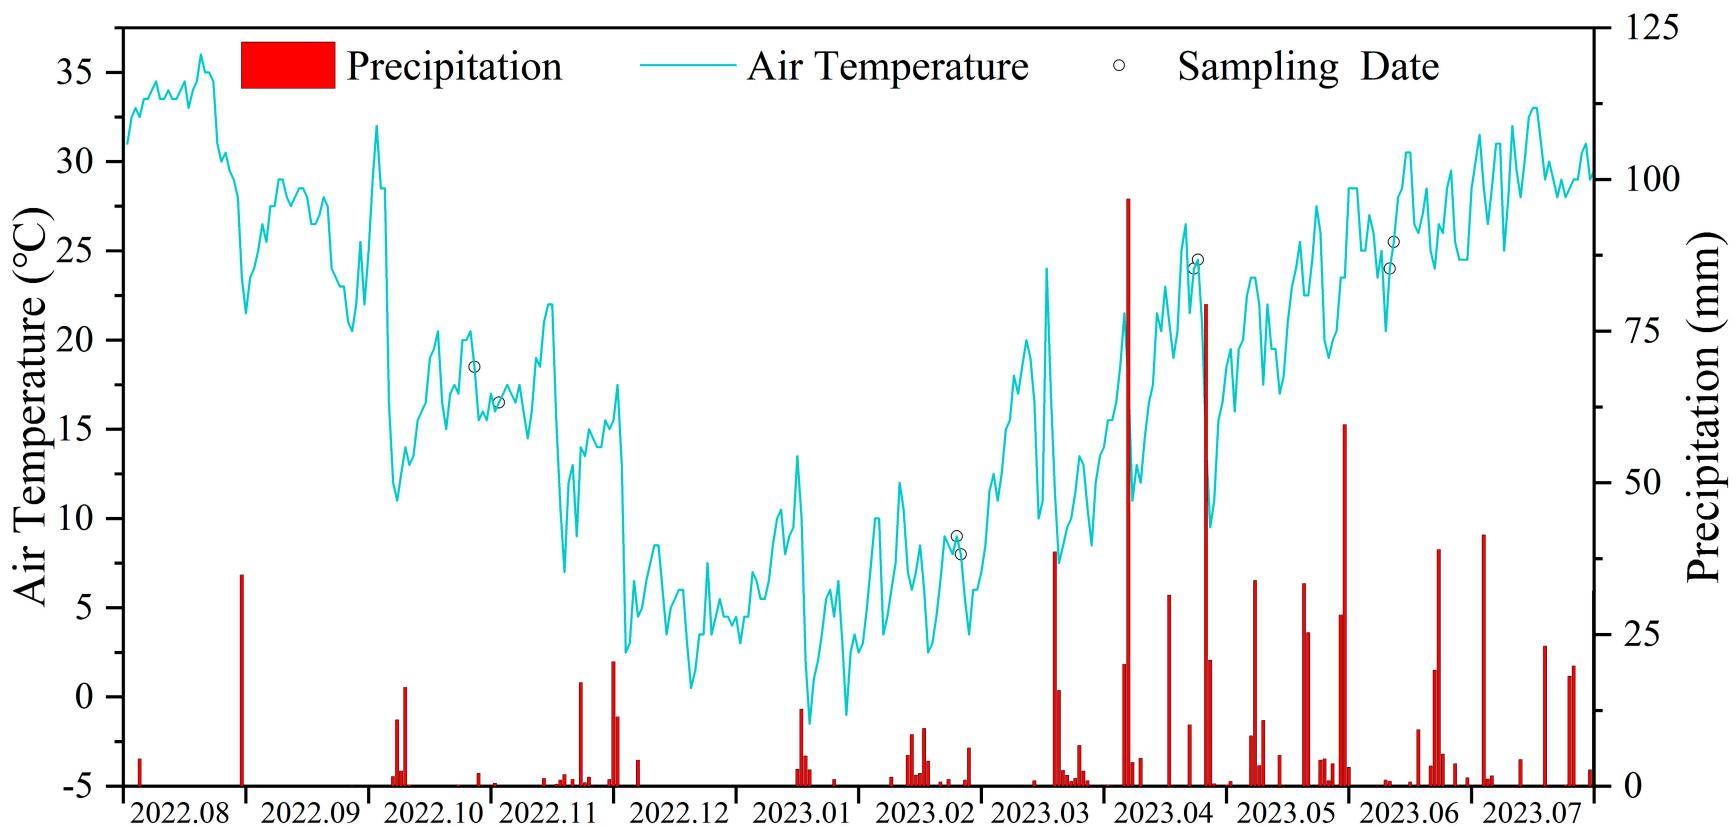

Figure S1. Air Temperature ($^{\circ}\text{C}$) and precipitation (mm) from August 2022 to July 2023 (average daily temperature and precipitation: $18.34\text{ }^{\circ}\text{C}$ and 2.81 mm , respectively). The hollow circles represent sampling data. The data in the above figures have been authorized by the National Meteorological Center of China (<http://www.nmc.cn/>).

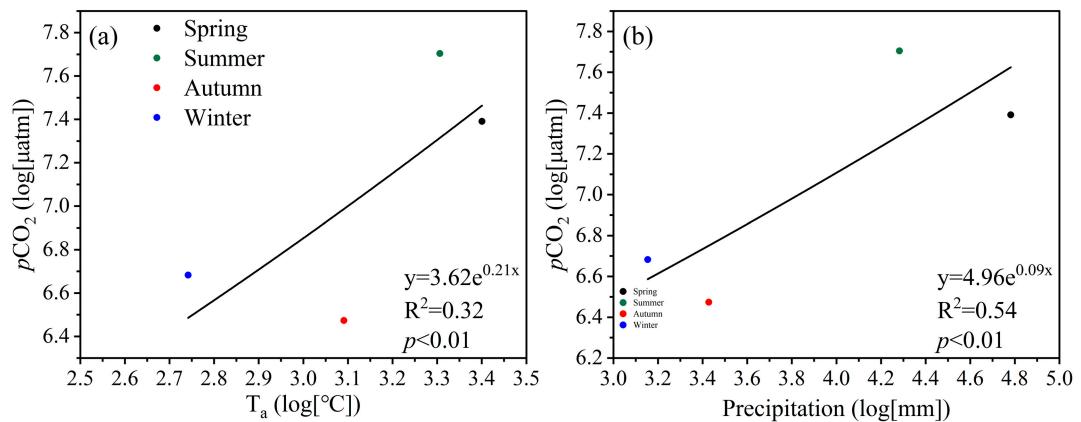

Figure S2. The relationship between the $p\text{CO}_2$ and (a) T_a ; (b) precipitation.

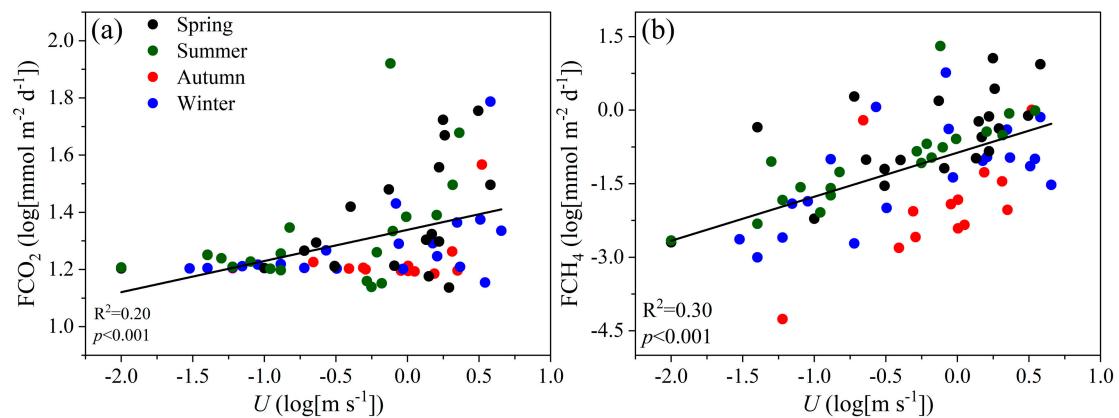

Figure S3. The relationship between the GHG emission and U : (a) CO_2 emission; (b) CH_4 emission.
