

Survey S1: The development of a multidimensional land use planning in Paraguay

How difficult is to develop a multidimensional land use planning in Paraguay?

	Very easy	Moderately easy	Neither easy nor difficult	Moderately difficult	Very difficult
Multidimensional land use planning					

Please indicate the main reason of your previous answer

- ☐ Lack of data
- ☐ Lack of expertise to create needed data
- ☐ Lack of resources to create needed data
- ☐ Lack of interest
- ☐ Other: _____

Do you think that Paraguay will benefit from having a framework to develop a multidimensional land use planning?

- ☐ Yes
- ☐ No
- ☐ Not sure
- ☐ Does not apply. Paraguay already has a multidimensional framework

Please indicate the main reason of your previous answer

In which of the following areas have you been working the most?

- ☐ Environmental topics
- ☐ Social topics
- ☐ Economic topics

Environmental criteria

Based on previous studies in other countries, the list of environmental criteria that can be used to include this dimension in a land use planning is presented below. Please select the level of difficulty to collect the specific criteria considering the context of Paraguay.

Criteria	Very easy	Moderately easy	Neither easy nor difficult	Moderately difficult	Very difficult
Ecosystem services					
Updated land use and land cover					
Biodiversity					
Habitat preferences for some species					
Environmental policies					

Comments (you can add additional data):

Please rank from highest to lowest those criteria that you consider most important to obtain, with 1 being the most important.

_____ Ecosystem services
_____ Updated land use and land cover
_____ Biodiversity
_____ Habitat preferences for some species
_____ Environmental policies

Social criteria

Based on previous studies in other countries, the list of social criteria that can be used to include this dimension in a land use planning is presented below. Please select the level of difficulty to collect the specific criteria considering the context of Paraguay.

Criteria	Very easy	Moderately easy	Neither easy nor difficult	Moderately difficult	Very difficult
Social impact assessment					
Social value					
Land-use preference					

Comments (you can add additional data):

Please rank from highest to lowest those criteria that you consider most important to obtain, with 1 being the most important.

_____ Social impact assessment
_____ Social value
_____ Land-use preference

Economic criteria

Based on previous studies in other countries, the list of economic criteria that can be used to include this dimension in a land use planning is presented below. Please select the level of difficulty to collect the specific criteria considering the context of Paraguay.

Criteria	Very easy	Moderately easy	Neither easy nor difficult	Moderately difficult	Very difficult
Ecosystem service values					
Cost of conservation actions					
Opportunity costs					
Land price markets					
Marginal value					
Economic returns					
Economic policies					

Comments (you can add additional data):

Please rank from highest to lowest those criteria that you consider most important to obtain, with 1 being the most important.

_____ Ecosystem service values
_____ Cost of conservation actions
_____ Opportunity costs
_____ Land price markets
_____ Marginal value
_____ Economic returns
_____ Economic policies
