Figure Legend

In the original publication [1], there was a mistake in the legend for Figures 1 and 4. A map legend can be explained either by text within the figure (where space permits) or by numbering the conventional signs within the figure, and explaining them below the figure (where space is more limited). In Figures 1 and 4, the second method of explanation was initially used (by means of the numbers explained under the figure), but later, according to the indications received from the referents, the numbers in the figures were replaced by their explanations (according to the version uploaded on 3 September 2023). Due to an unfortunate error, in the version uploaded on 6 September 2023, Figures 1 and 4 were uploaded with the conventional numbered signs in the legend, but without the explanation of the numbers below the figure, making the figures much more difficult to explain. Therefore, we request that these two figures be replaced with their variant, where the legend is explained in the text, as indicated by the referents. The correct legend appears below. The authors state that the scientific conclusions are unaffected. This correction was approved by the Academic Editor. The original publication has also been updated.
