

Supplementary Material S1: Cohort definition and concept sets.

[JC] Surgery cohort

Initial Event Cohort

People having any of the following:

- a drug exposure of flurane³
- a drug exposure of propofol⁵

with continuous observation of at least 0 days prior and 0 days after event index date, and limit initial events to: **all events per person.**

Inclusion Rules

Inclusion Criteria #1: Muscle relaxant use

Having all of the following criteria:

- at least 1 occurrences of a drug exposure of Muscle relaxant ⁴

where event starts between 1 days Before and 1 days After index start date
occurring within the same visit

Inclusion Criteria #2: cardiac or brain surgery

Having all of the following criteria:

- at most 0 occurrences of a procedure of cardiac or brain surgery²

where event starts between 7 days Before and 7 days After index start date

Inclusion Criteria #3: transplant

Having all of the following criteria:

- at most 0 occurrences of a procedure of transplant⁷

where event starts between 7 days Before and 7 days After index start date

Limit qualifying cohort to: **all events per person.**

End Date Strategy

Date Offset Exit Criteria

This cohort defintion end date will be the index event's start date plus 0 days

Cohort Collapse Strategy:

Collapse cohort by era with a gap size of 0 days.
