

Figure S2

**Figure S2.** Mean female fecundity (left) and mean egg fertility (right) in *Ae. albopictus* ARwP<sub>L</sub>, ARwP<sub>BA</sub>, ARwP<sub>BN</sub>, and BN. ARwP<sub>L</sub>: *Wolbachia wPip*-infected *Ae. albopictus* from Rome (Italy) [31]; ARwP<sub>BN</sub>: wild strain of *Ae. albopictus* from Barcelona (Spain) infected with *Wolbachia wPip* from ARwP<sub>L</sub> through hybridization; ARwP<sub>BA</sub>: aposymbiotic strain of *Ae. albopictus* obtained in Valencia from the wild strain of Barcelona and then infected with *Wolbachia wPip* from ARwP<sub>L</sub> through hybridization; BN: wild strain of *Ae. albopictus* from Barcelona (Spain). Error bars show the standard error of the mean of three biological replicates, each containing 19–20 fed females. In both cases, values were not significantly different by One way-ANOVA.
