

Figure S1 – Salogni et. al – The Characterization of *Lactococcus garvieae* isolated in an Outbreak of Septicaemic Disease in Farmed Sea Bass (*Dicentrarchus labrax*, Linnaeus 1758) in Italy

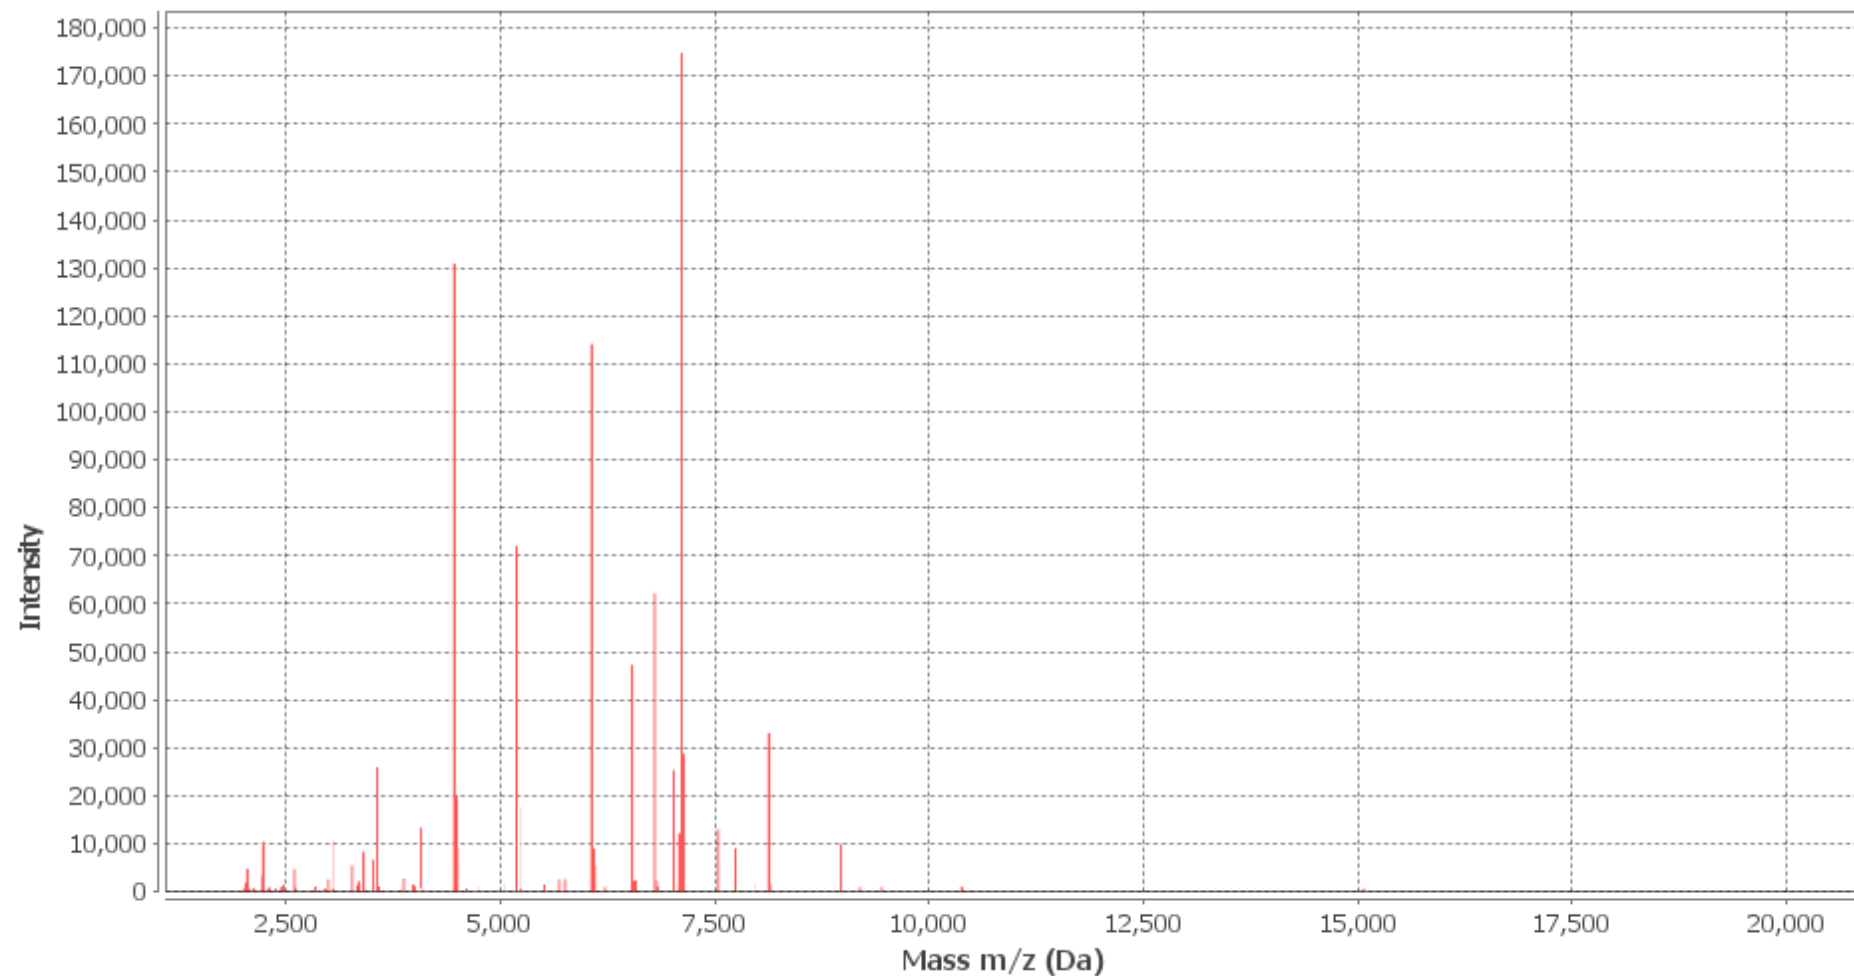

Figure S1. Main spectrum profiles of the *Lactococcus garvieae* isolated during an outbreak in sea bass (*Dicentrarchus labrax*) reared in an inland intensive farm located in the Gulf of Follonica (Tuscany, Italy). Intensity (Y-axis) is shown as a function of the mass-to-charge ratio (m/z, molecular weight for a single positive charge; X-axis).
