

Figure S1. TEM images of MVs stored at 23°C for 2, 5 days, and 1 week. MVs prepared from culture supernatants after incubation for 6, 17, and 24 h.

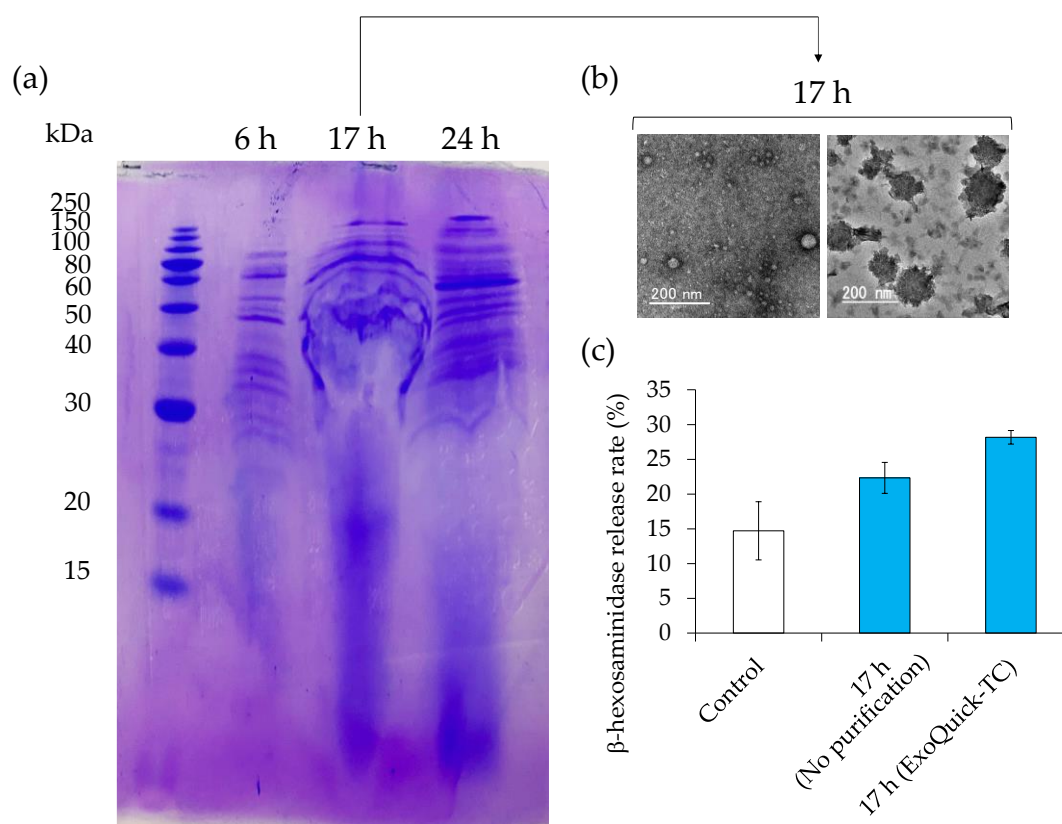

Figure S2. Cargo proteins in MV prepared using MVs-precipitation reagent (ExoQuick-TC). (a) MVs prepared from culture supernatants after incubation for 6, 17, and 24 h was analyzed by SDS-PAGE. (b) TEM images of MVs prepared using ExoQuick-TC from culture supernatants after incubation for 17 h. (c) β -Hexosaminidase release induced by MVs prepared using ExoQuick-TC.
