

Supplementary Table S7. Resistance patterns of, and ESBL production by, global clones.

Sample no.	Global clones	Resistance pattern in disk diffusion test	Positive for resistance genes	ESBL production with ESBL NDP test
Z222	ST131	cefepime, cephalothin, ceftazidime, cefotaxime, aztreonam, streptomycin, amoxycylav, ampicillin, piperacillin, tetracycline, ciprofloxacin, azithromycin, sulphafurazole, polymyxin-B	<i>ampC</i> , <i>bla</i> _{CTX-M}	+
J211	ST648	cefepime, cephalothin, ceftazidime, ceftazidime, cefotaxime, ceftriaxone, aztreonam, ertapenem, streptomycin, amikacin, amoxycylav, ampicillin/sulbactam, piperacillin/tazobactam, ampicillin, piperacillin, trimethoprim, co-trimoxazole, tetracycline, azithromycin, chloramphenicol, ciprofloxacin, sulphafurazole	<i>bla</i> _{OXA-1} , <i>bla</i> _{CMY-2} , <i>ampC</i>	+
H250	ST648	cephalothon, ceftazidime, cefotaxime, streptomycin, amoxycylav, ampicillin, piperacillin, ciprofloxacin	<i>ampC</i>	-
J295	ST648	cephalothon, ceftazidime, cefotaxime, ceftriaxone, aztreonam, imipenem, streptomycin, amikacin, amoxycylav, piperacillin/tazobactam, ampicillin, piperacillin, tetracycline, ciprofloxacin, sulphafurazole	<i>ampC</i>	-
