Table S1 footnotes

Tr – Data originating from a study for which the majority of ICU admission were for trauma

US - Data originating from a study based in the United States of America or Canada

B – VAP diagnosis based on bronchoscopic based methods for sampling.

Sr - These studies were cited in the following source systematic reviews.

- Agrafiotis M, Siempos II, Ntaidou TK, Falagas ME. Attributable mortality of ventilator-associated pneumonia: a meta-analysis. *The International Journal of Tuberculosis and Lung Disease*. 2011 Sep 1;15(9):1154-63.
- Melsen WG, Rovers MM, Bonten MJM: Ventilator-associated pneumonia and mortality: A systematic review of observational studies. *Crit Care Med* 2009, 37:2709–2718.
- Safdar N, Dezfulian C, Collard HR, Saint S: Clinical and economic consequences of ventilator-associated pneumonia: a systematic review. *Crit Care Med* 2005, 33:2184–93.

Footnotes

a. Treatment abbreviations

- Topical antibiotic components include; topical polymyxin; topical tobramycin; topical amphotericin; topical gentamicin; topical ciprofloxacin; topical vancomycin; topical nystatin; topical neomycin; topical nalidixic acid; topical norfloxacin; topical oflaxcin; nebulized polymyxin; nebulized saline.
- Parenteral antibiotic components include; Amoycillin-clavulinate; systemic ampicillin; systemic Cefuroxime; systemic cefotaxime; systemic ciprofloxacin; systemic vancomycin; systemic ciprofloxacin; systemic trimethoprim; systemic oflaxcin; systemic ceftazidime.

b. Notes

Pl – topical placebo used to achieve observe binding

Tr – Data originating from a study for which the majority of ICU admission were for trauma

L - Data originating from a study for which all patients had severe liver disease or transplantation.

US - Data originating from a study based in the United States of America or Canada

B – VAP diagnosis based on bronchoscopic based methods for sampling. Sr - These studies were derived from the following source systematic reviews

Sr - These studies were cited in the following source systematic reviews.

- Liberati A, D'Amico R, Pifferi S, Torri V, Brazzi L, Parmelli E: Antibiotic prophylaxis to reduce respiratory tract infections and mortality in adults receiving intensive care. *Cochrane Database Syst Rev* 2009, 4.
 - Pileggi C, Bianco A, Flotta D, Nobile CG, Pavia M. Prevention of ventilator-associated pneumonia, mortality and all intensive care unit acquired infections by topically applied antimicrobial or antiseptic agents: a meta-analysis of randomized controlled trials in intensive care units. *Crit Care* 2011; 15:R155.
 - Silvestri L, van Saene HKF, Casarin A, Berlot G, Gullo A. 2008. Impact of selective decontamination of the digestive tract on carriage and infection due to Gram-positive and Gram-negative bacteria. A systematic review of randomised controlled trials. *Anaesth. Intensive Care* 36:324–338.
 - Chan EY, Ruest A, Meade MO, Cook DJ. Oral decontamination for prevention of pneumonia in mechanically ventilated adults: systematic review and meta-analysis. *BMJ*. 2007; 334:889–900.
- c. Note, the number of MRSA strains in the groups of the study by Verwaest [196] is calculated using the proportion of MRSA (55%) among the overall numbers of isolates from all sites of infection in Table 6 of this publication.
