

Table S1a. Effects of sheep population (fat-tailed or thin-tailed sheep), live-weight category (LWC—% of mature live weight) and their interaction on studied traits, as estimated based on two-way ANOVA.

| Trait | Effect | Sum of squares | df | Mean Square | F | P-value |
|----------------------|------------------------|----------------|----|--------------|--------|---------|
| Wither height (m) | Sheep population | 0.01 | 1 | 0.01 | 5.53 | <0.05 |
| | LWC | 2.28 | 4 | 0.57 | 269.96 | <0.001 |
| | Sheep population × LWC | 0.03 | 4 | 0.01 | 3.45 | <0.01 |
| Yellowness - b* | Sheep population | 0.03 | 1 | 0.03 | 0.03 | 0.871 |
| | LWC | 3.53 | 4 | 0.88 | 0.77 | 0.549 |
| | Sheep population × LWC | 11.80 | 4 | 2.95 | 2.56 | <0.05 |
| Hue angle | Sheep population | 0.00 | 1 | 0.00 | 1.04 | 0.311 |
| | LWC | 0.02 | 4 | 0.01 | 1.65 | 0.170 |
| | Sheep population × LWC | 0.07 | 4 | 0.02 | 4.63 | <0.01 |
| Meat hardness 1 (g) | Sheep population | 1,093,742.00 | 1 | 1,093,742.00 | 2.01 | 0.160 |
| | LWC | 3,357,320.00 | 4 | 839,330.00 | 1.54 | 0.197 |
| | Sheep population × LWC | 3,412,780.00 | 4 | 853,195.00 | 1.57 | 0.190 |
| Meat hardness 2 (g) | Sheep population | 752,817.00 | 1 | 752,817.00 | 2.46 | 0.120 |
| | LWC | 1,867,845.00 | 4 | 466,961.00 | 1.53 | 0.202 |
| | Sheep population × LWC | 1,826,880.00 | 4 | 456,720.00 | 1.49 | 0.211 |
| Meat springiness | Sheep population | 0.00 | 1 | 0.00 | 0.45 | 0.506 |
| | LWC | 0.07 | 4 | 0.02 | 2.01 | 0.100 |
| | Sheep population × LWC | 0.14 | 4 | 0.03 | 3.77 | <0.01 |
| Meat chewiness | Sheep population | 260,012.00 | 1 | 260,012.00 | 3.58 | 0.062 |
| | LWC | 568,876.00 | 4 | 142,219.00 | 1.96 | 0.108 |
| | Sheep population × LWC | 552,548.00 | 4 | 138,137.00 | 1.90 | 0.117 |

Table S1b. Effects of sheep population (fat-tailed or thin-tailed sheep), sex and their interaction on studied traits, as estimated based on two-way ANOVA.

| Trait | Effect | Sum of squares | df | Mean Square | F | P-value |
|----------------------|------------------------|----------------|----|-------------|-------|---------|
| Wither height (m) | Sheep population | 0.01 | 1 | 0.01 | 1.02 | 0.314 |
| | Sex | 0.06 | 1 | 0.06 | 4.97 | <0.05 |
| | Sheep population × Sex | 0.00 | 1 | 0.00 | 0.29 | 0.594 |
| Lightness - L* | Sheep population | 13.40 | 1 | 13.40 | 1.61 | 0.208 |
| | Sex | 64.00 | 1 | 64.03 | 7.69 | <0.01 |
| | Sheep population × Sex | 1.30 | 1 | 1.29 | 0.16 | 0.695 |
| Redness - a* | Sheep population | 4.01 | 1 | 4.01 | 1.93 | 0.169 |
| | Sex | 12.79 | 1 | 12.79 | 6.14 | <0.05 |
| | Sheep population × Sex | 8.40 | 1 | 8.40 | 4.03 | <0.05 |
| Yellowness - b* | Sheep population | 0.03 | 1 | 0.03 | 0.03 | 0.866 |
