Figure S1. This missense mutation probably alters the protein (as determined using PolyPhen). (A) This mutation is predicted to be PROBABLY DAMAGING with a score of 0.999 in HumDiv; and this mutation is predicted to be PROBABLY DAMAGING with a score of 0.977 in HumVar. (B) Inward-rectifier potassium channel Kir2.2 in complex with PIP2. The colorful circles are residue 210 (Cys>Arg), which was an SNP at the DNA level.
