	AA							

<sup>1</sup>PM: plant protein meal based diets, FM: fishmeal based diets; SA: synthetic astaxanthin, AA: microalgal astaxanthin.

<sup>2</sup>AST: tissue concentrations of astaxanthin.

<sup>3</sup>MDA: malondialdehyde; GSH: glutathione; GST: Glutathione S-transferase; GPX: Glutathione peroxidase; GR: Glutathione reductase; SOD: Superoxidase dismutase.

\*, \*\*Positive or negative R and P < 0.05 represents a positive or negative correlation between the concentration of AST and concentrations of MDA or GSH or activities of GST, GPX, GR, and SOD in a given tissue. \*P < 0.05; \*\* P < 0.01.
