**Figure S1.** Serum iron parameters are altered during high-altitude hypoxia exposure.

Data are presented as the mean  $\pm$  SEM. \*  $p < 0.05$ , \*\*  $p < 0.01$ , and \*\*\*  $p < 0.001$ , versus control.

**Figure S2.** Changes in the mRNA and protein expressions of Fpn1. A RT-qPCR of Fpn1 genes after HA exposure. B Fpn1 protein bands after ECL imaging. C Quantification of the bands, normalized to  $\beta$ -actin. The values are representative of three independent experiments. Data are presented as the mean  $\pm$  SEM. \*\*  $p < 0.01$ , \*\*\*  $p < 0.001$ , versus control.
