Section and Topic	Item #	Checklist item	Location where item is reported
<b>TITLE</b>			
Title	1	Identify the report as a systematic review.	1
<b>ABSTRACT</b>			
Abstract	2	See the PRISMA 2020 for Abstracts checklist.	1
<b>INTRODUCTION</b>			
Rationale	3	Describe the rationale for the review in the context of existing knowledge.	2
Objectives	4	Provide an explicit statement of the objective(s) or question(s) the review addresses.	2-3
<b>METHODS</b>			
Eligibility criteria	5	Specify the inclusion and exclusion criteria for the review and how studies were grouped for the syntheses.	3
Information sources	6	Specify all databases, registers, websites, organisations, reference lists and other sources searched or consulted to identify studies. Specify the date when each source was last searched or consulted.	3
Search strategy	7	Present the full search strategies for all databases, registers and websites, including any filters and limits used.	3
Selection process	8	Specify the methods used to decide whether a study met the inclusion criteria of the review, including how many reviewers screened each record and each report retrieved, whether they worked independently, and if applicable, details of automation tools used in the process.	3
Data collection process	9	Specify the methods used to collect data from reports, including how many reviewers collected data from each report, whether they worked independently, any processes for obtaining or confirming data from study investigators, and if applicable, details of automation tools used in the process.	3
Data items	10a	List and define all outcomes for which data were sought. Specify whether all results that were compatible with each outcome domain in each study were sought (e.g. for all measures, time points, analyses), and if not, the methods used to decide which results to collect.	3
	10b	List and define all other variables for which data were sought (e.g. participant and intervention characteristics, funding sources). Describe any assumptions made about any missing or unclear information.	3
Study risk of bias assessment	11	Specify the methods used to assess risk of bias in the included studies, including details of the tool(s) used, how many reviewers assessed each study and whether they worked independently, and if applicable, details of automation tools used in the process.	Not applicable
Effect measures	12	Specify for each outcome the effect measure(s) (e.g. risk ratio, mean difference) used in the synthesis or presentation of results.	Not applicable
Synthesis methods	13a	Describe the processes used to decide which studies were eligible for each synthesis (e.g. tabulating the study intervention characteristics and comparing against the planned groups for each synthesis (item #5)).	Not applicable
	13b	Describe any methods required to prepare the data for presentation or synthesis, such as handling of missing summary statistics, or data conversions.	Not applicable
	13c	Describe any methods used to tabulate or visually display results of individual studies and syntheses.	Not applicable
	13d	Describe any methods used to synthesize results and provide a rationale for the choice(s). If meta-analysis was performed, describe the model(s), method(s) to identify the presence and extent of statistical heterogeneity, and software package(s) used.	Not applicable
	13e	Describe any methods used to explore possible causes of heterogeneity among study results (e.g. subgroup analysis, meta-regression).	Not

Section and Topic	Item #	Checklist item	Location where item is reported
			applicable
	13f	Describe any sensitivity analyses conducted to assess robustness of the synthesized results.	Not applicable
Reporting bias assessment	14	Describe any methods used to assess risk of bias due to missing results in a synthesis (arising from reporting biases).	Not applicable
Certainty assessment	15	Describe any methods used to assess certainty (or confidence) in the body of evidence for an outcome.	Not applicable
<b>RESULTS</b>			
Study selection	16a	Describe the results of the search and selection process, from the number of records identified in the search to the number of studies included in the review, ideally using a flow diagram.	4
	16b	Cite studies that might appear to meet the inclusion criteria, but which were excluded, and explain why they were excluded.	Not applicable
Study characteristics	17	Cite each included study and present its characteristics.	4-28
Risk of bias in studies	18	Present assessments of risk of bias for each included study.	Not applicable
Results of individual studies	19	For all outcomes, present, for each study: (a) summary statistics for each group (where appropriate) and (b) an effect estimate and its precision (e.g. confidence/credible interval), ideally using structured tables or plots.	Not applicable
Results of syntheses	20a	For each synthesis, briefly summarise the characteristics and risk of bias among contributing studies.	Not applicable
	20b	Present results of all statistical syntheses conducted. If meta-analysis was done, present for each the summary estimate and its precision (e.g. confidence/credible interval) and measures of statistical heterogeneity. If comparing groups, describe the direction of the effect.	Not applicable
	20c	Present results of all investigations of possible causes of heterogeneity among study results.	Not applicable
	20d	Present results of all sensitivity analyses conducted to assess the robustness of the synthesized results.	Not applicable
Reporting biases	21	Present assessments of risk of bias due to missing results (arising from reporting biases) for each synthesis assessed.	Not applicable
Certainty of evidence	22	Present assessments of certainty (or confidence) in the body of evidence for each outcome assessed.	Not applicable
<b>DISCUSSION</b>			
Discussion	23a	Provide a general interpretation of the results in the context of other evidence.	29-30
	23b	Discuss any limitations of the evidence included in the review.	29-30
	23c	Discuss any limitations of the review processes used.	Not applicable

Section and Topic	Item #	Checklist item	Location where item is reported
	23d	Discuss implications of the results for practice, policy, and future research.	29-30
<b>OTHER INFORMATION</b>			
Registration and protocol	24a	Provide registration information for the review, including register name and registration number, or state that the review was not registered.	3
	24b	Indicate where the review protocol can be accessed, or state that a protocol was not prepared.	3
	24c	Describe and explain any amendments to information provided at registration or in the protocol.	3
Support	25	Describe sources of financial or non-financial support for the review, and the role of the funders or sponsors in the review.	30
Competing interests	26	Declare any competing interests of review authors.	30
Availability of data, code and other materials	27	Report which of the following are publicly available and where they can be found: template data collection forms; data extracted from included studies; data used for all analyses; analytic code; any other materials used in the review.	Not applicable

## Prisma checklist

From: Page MJ, McKenzie JE, Bossuyt PM, Boutron I, Hoffmann TC, Mulrow CD, et al. The PRISMA 2020 statement: an updated guideline for reporting systematic reviews. BMJ 2021;372:n71. doi: 10.1136/bmj.n71

**Supplementary Table S1.** Studies included in the systematic review.

Author	Title	Study design
Abdalla, D. S.-/-Bechara, E. J.	The effect of chlorpromazine and Li2CO3 on the superoxide dismutase and glutathione peroxidase activities of rat brain, liver and erythrocytes	preclinical
Abdel-Salam, O. M.-/-El-Sayed El-Shamarka, M.-/-Salem, N. A.-/-El-Mosallamy, A. E.-/-Sleem, A. A.	Amelioration of the haloperidol-induced memory impairment and brain oxidative stress by cinnarizine	preclinical
Abou El-Magd, R. M.-/-Park, H. K.-/-Kawazoe, T.-/-Iwana, S.-/-Ono, K.-/-Chung, S. P.-/-Miyano, M.-/-Yorita, K.-/-Sakai, T.-/-Fukui, K.	The effect of risperidone on D-amino acid oxidase activity as a hypothesis for a novel mechanism of action in the treatment of schizophrenia	preclinical
Adler, L. A.-/-Peselow, E.-/-Rotrosen, J.-/-Duncan, E.-/-Lee, M.-/-Rosenthal, M.-/-Angrist, B.	Vitamin E treatment of tardive dyskinesia	clinical
Adler, L. A.-/-Edson, R.-/-Lavori, P.-/-Peselow, E.-/-Duncan, E.-/-Rosenthal, M.-/-Rotrosen, J.	Long-term treatment effects of vitamin E for tardive dyskinesia	clinical
Afshari, P.-/-Yao, W. D.-/-Middleton, F. A.	Reduced Slc1a1 expression is associated with neuroinflammation and impaired sensorimotor gating and cognitive performance in mice: Implications for schizophrenia	preclinical
Akhondzadeh, S.-/-Safarcherati, A.-/-Amini, H.	Beneficial antipsychotic effects of allopurinol as add-on therapy for schizophrenia: a double blind, randomized and placebo controlled trial	clinical
Altar, C. A.-/-Jurata, L. W.-/-Charles, V.-/-Lemire, A.-/-Liu, P.-/-Bukhman, Y.-/-Young, T. A.-/-Bullard, J.-/-Yokoe, H.-/-Webster, M. J.-/-Knable, M. B.-/-Brockman, J. A.	Deficient hippocampal neuron expression of proteasome, ubiquitin, and mitochondrial genes in multiple schizophrenia cohorts	preclinical
Amiri, S.-/-Jafari-Sabet, M.-/-Keyhanfar, F.-/-Falak, R.-/-Shabani, M.-/-Rezayof, A.	Hippocampal and prefrontal cortical NMDA receptors mediate the interactive effects of olanzapine and lithium in memory retention in rats: the involvement of CAMKII-CREB signaling pathways	preclinical
Andrade, C.	Antipsychotic Augmentation With N-Acetylcysteine for Patients With Schizophrenia	review
Andreazza, A. C.-/-Shao, L.-/-Wang, J. F.-/-Young, L. T.	Mitochondrial complex I activity and oxidative damage to mitochondrial proteins in the prefrontal cortex of patients with bipolar disorder	preclinical
Ansari, Z.-/-Pawar, S.-/-Seetharaman, R.	Neuroinflammation and oxidative stress in schizophrenia: are these opportunities for repurposing?	review
Antkiewicz-Michaluk, L.-/-Ossowska, K.-/-Romańska, I.-/-Michaluk, J.-/-Vetulani, J.	3-Methoxytyramine, an extraneuronal dopamine metabolite plays a physiological role in the brain as	preclinical

	an inhibitory regulator of catecholaminergic activity	
Balijepalli, S.-//Boyd, M. R.-//Ravindranath, V.	Inhibition of mitochondrial complex I by haloperidol: the role of thiol oxidation	preclinical
Balijepalli, S.-//Kenchappa, R. S.-//Boyd, M. R.-//Ravindranath, V.	Protein thiol oxidation by haloperidol results in inhibition of mitochondrial complex I in brain regions: comparison with atypical antipsychotics	preclinical
Barrientos, A.-//Marín, C.-//Miró, O.-//Casademont, J.-//Gómez, M.-//Nunes, V.-//Tolosa, E.-//Urbano-Márquez, A.-//Cardellach, F.	Biochemical and molecular effects of chronic haloperidol administration on brain and muscle mitochondria of rats	preclinical
