

Table S1. Categories of MHC HLA-A (MHC class I) and HLA-DP and HLA-DQ (MHC class II) sequences present in the Vaxitop program used in this study.

MHCs	MHC Alleles
MHC 1	HLA-A*01:01, HLA-A*02:01, HLA-A*02:02, HLA-A*02:03, HLA-A*02:06, HLA-A*02:11, HLA-A*02:12, HLA-A*02:16, HLA-A*02:19, HLA-A*02:50, HLA-A*03:01, HLA-A*11:01, HLA-A*23:01, HLA-A*24:02, HLA-A*24:31, HLA-A*26:01, HLA-A*26:02, HLA-A*29:02, HLA-A*30:01, HLA-A*30:02, HLA-A*31:01, HLA-A*32:01, HLA-A*32:07, HLA-A*33:01, HLA-A*68:01, HLA-A*68:02, HLA-A*68:23, HLA-A*69:01, HLA-A*80:01, HLA-A11, HLA-A2, HLA-A3.
MHC 2	HLA-DPA1*01:03/DPB*02:01, HLA-DPA1*02:01/DPB*01:01, HLA-DPA1*02:01/DPB*05:01, HLA-DPA1*03:01/DPB*04:02, HLA-DPB*04:01, HLA-DPB*04:02, HLA-DQ2, HLA-DQA1*01:01/DQB1*05:01, HLA-DQA1*01:02/DQB1*06:02, HLA-DQA1*03:01/DQB1*03:02, HLA-DQA1*03:02/DQB1*04:01, HLA-DQA1*05:01/DQB1*02:01, HLA-DQA1*05:01/DQB1*03:01.

Table S2. Comparative reverse vaccinology outlining outer membrane antigens identified in study.

Outer membrane antigens	<i>P. salmonis</i>	<i>A. salmonicida</i>	<i>V. anguillarum</i>	<i>M. viscosa</i>	<i>Y. ruckeri</i>
OmpW family protein	+				
Porin family protein	+				
OmpA family protein	+			+	
DUF481 domain-containing protein	+				
Outer membrane protein assembly factor	+	+			+
BamE					
VacJ family lipoprotein	+				
phospholipase A	+				
LPS-assembly protein LptD	+	+	+	+	+
Outer membrane protein assembly factor	+	+	+	+	+
BamA					
Outer membrane protein transport protein	+	+	+	+	
TolC family outer membrane protein	+		+	+	
LbtU family siderophore porin	+				

TonB-dependent siderophore receptor	+	+	+	+	+
Autotransporter outer membrane beta-barrel domain-containing protein	+				+
Host specificity protein J	+				
Type IV conjugative transfer system lipoprotein traV		+			+
Maltoporin		+			+
Transporter		+			
Siderophore amonabactin TonB-dependent receptor		+			
TonB-dependent receptor		+	+	+	
Ligand-gated channel protein		+			
Porin		+	+	+	+
Glycine zipper 2TM domain-containing protein		+			
Peptidoglycan DD-metalloendopeptidase family protein		+			
Outer membrane protein assembly factor BamC		+			
DUF2860 family protein		+	+		
TonB-dependent hemoglobin/transferrin/lactoferrin family receptor		+	+	+	+
Membrane protein		+	+	+	
Flagellar basal body L-ring protein FlgH		+	+	+	+
Efflux transporter outer membrane subunit		+			
M23 family metallopeptidase		+	+		
Porin OmpAI		+			

Porin OmpAII	+			
Type IV pilus secretin PilQ family protein	+			
Type IV pilin biogenesis protein	+			
Carbohydrate porin	+	+		
Porin OmpA	+			
Conjugal transfer protein TraF		+	+	
MSHA biogenesis protein MshQ		+		
Murein hydrolase activator NlpD		+		+
Outer membrane beta-barrel protein		+	+	+
Luciferase		+		
Peptidase		+		
J domain-containing protein		+		
MipA/OmpV family protein		+		+
YjbH domain-containing protein		+		
TonB-dependent vitamin B12 receptor		+		
Sphingomyelin phosphodiesterase		+		
Retention module-containing protein		+		
DUF1566 domain-containing protein			+	
Outer membrane protein assembly factor			+	
BamD				
DUF1983 domain-containing protein			+	
DUF748 domain-containing protein			+	
DUF3466 family protein			+	
DUF1302 domain-containing protein			+	
TonB-dependent receptor plug domain-containing protein			+	
Maltoporin LamB			+	
Protein family protein			+	

LruC domain-containing protein	+	
Conjugal transfer protein TraN		+
Type-F conjugative transfer system mating-pair stabilization protein TraN		+
Outer membrane porin, OprD family		+
Outer membrane usher protein		+
Ion channel protein Tsx		+
Fimbrial biogenesis outer membrane usher protein		+
OmpA family lipoprotein		+
TonB-dependent copper receptor		+
Ig-like domain-containing protein		+
Hemagglutinin repeat-containing protein		+
Outer membrane channel protein TolC		+
Murein transglycosylase A		+
Envelope stress response activation lipoprotein NlpE		+
Rcs stress response system protein RcsF		+
Fimbria/pilus outer membrane usher protein		+
Llong-chain fatty acid transporter FadL		+
Porin OmpC		+
Ligand-gated channel protein		+
Lipid IV(A) palmitoyltransferase PagP		+
Outer membrane protein OmpW		+
Porin OmpF		+
Outer membrane protein OmpX		+

Table S3. Comparative reverse vaccinology outlining secreted antigens identified in this study.

Secreted Antigens	<i>P.</i>	<i>A.</i>	<i>V.</i>	<i>M.</i>	<i>Y.</i>
	<i>salmonis</i>	<i>salmonicida</i>	<i>anguillarum</i>	<i>viscosa</i>	<i>ruckeri</i>
Peptidase M4 family protein	+				
LbtU family siderophore porin	+				
DUF4402 domain-containing protein	+				
DUF1561 family protein	+				
C1 family peptidase	+				
Flagellar hook assembly protein FlgD	+	+	+	+	+
Flagellar hook-basal body complex protein	+				
Flagellar basal-body rod protein FlgG	+	+	+	+	+
Flagellar hook-associated protein FlgK	+	+			+
Flagellar hook-associated protein FlgL	+				+
Endonuclease/exonuclease/phosphatase family protein	+				
Cadherin-like domain-containing protein	+				
Calcineurin-like phosphoesterase	+				
DUF4280 domain-containing protein	+				
Flagellar filament capping protein FliD	+	+		+	+
B-type flagellin	+				
TAXI family TRAP transporter solute-binding subunit		+			
Flagellin		+	+	+	
DUF3466 family protein		+			
M6 family metalloprotease domain-containing protein		+			

Type I secretion C-terminal target domain-containing protein	+			
Phage tail protein	+			+
Lipase	+			
Beta-barrel pore-forming toxin aerolysin	+			
Type 1 fimbrial protein	+			+
Fimbrial protein	+			+
Peptidase M66	+			
Flagellar hook protein FlgE	+	+	+	
Flagellar hook-length control protein FliK	+		+	+
M20/M25/M40 family metallo-hydrolase	+			
Retention module-containing protein	+			
Type IV pilin protein	+			
N-acetylglucosamine-binding protein GbpA	+			+
Pilin	+	+		
Lateral flagellin LafA	+			
Lateral flagellar hook-associated protein	+			
LfgK				
Lateral flagellar basal-body rod protein LfgG	+			
Lateral flagellar hook protein FlgEL	+			
M4 family metallopeptidase		+	+	
Trypsin-like peptidase domain-containing protein		+		
Hcp family type VI secretion system effector		+		
SGNH/GDSL hydrolase family protein		+	+	
Immune inhibitor A		+		
Class C beta-lactamase		+		
Nucleotidyltransferase		+		

Hemolysin	+		
Endonuclease	+	+	
Deoxyribonuclease I	+		
Exo-alpha-sialidase	+		
Chitinase	+		
Ig-like domain-containing protein		+	
Triacylglycerol lipase		+	
Transferrin-binding protein-like solute binding protein		+	
Collagenase		+	
Membrane-targeted effector domain-containing toxin		+	
DUF1566 domain-containing protein		+	
Type II secretion system protein		+	
Lytic polysaccharide monooxygenase		+	+
Sphingomyelin phosphodiesterase		+	
Methyltransferase		+	
ABC transporter substrate-binding protein		+	+
Flagellar basal body protein FlgE		+	+
Aerolysin family beta-barrel pore-forming toxin		+	
Rcin-type beta-trefoil lectin domain protein		+	
DUF3570 domain-containing protein		+	
Conjugal transfer protein TraN			+
DUF481 domain-containing protein			+
Fimbria/pilus periplasmic chaperone			+
Heme acquisition hemophore HasA			+

Spore coat protein U domain-containing protein						+
Tail fiber protein						+
FliC/FljB family flagellin						+
Patatin-like phospholipase RssA						+
M10 family metalloproteinase						+
Peptidase M4 family protein	+					
LbtU family siderophore porin	+					
DUF4402 domain-containing protein	+					
DUF1561 family protein	+					
C1 family peptidase	+					
Flagellar hook assembly protein FlgD	+	+	+	+	+	+

Table S4. Selected B and T (MHC I and II) cell epitopes identified for the common antigens.
