

Supplementary figures

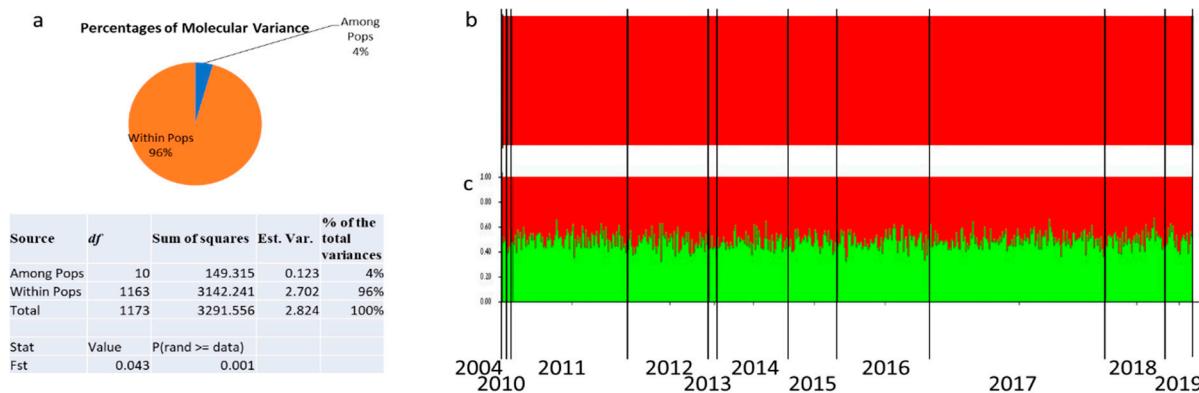

Figure S1: Between years comparisons. a. Hierarchical analysis of molecular variance (AMOVA), summary graph and table. b and c. Population structure analyses, b. Cluster analysis using BAPS for groups of individuals, c. Cluster analysis using 'STRUCTURE' (optimal K=2).

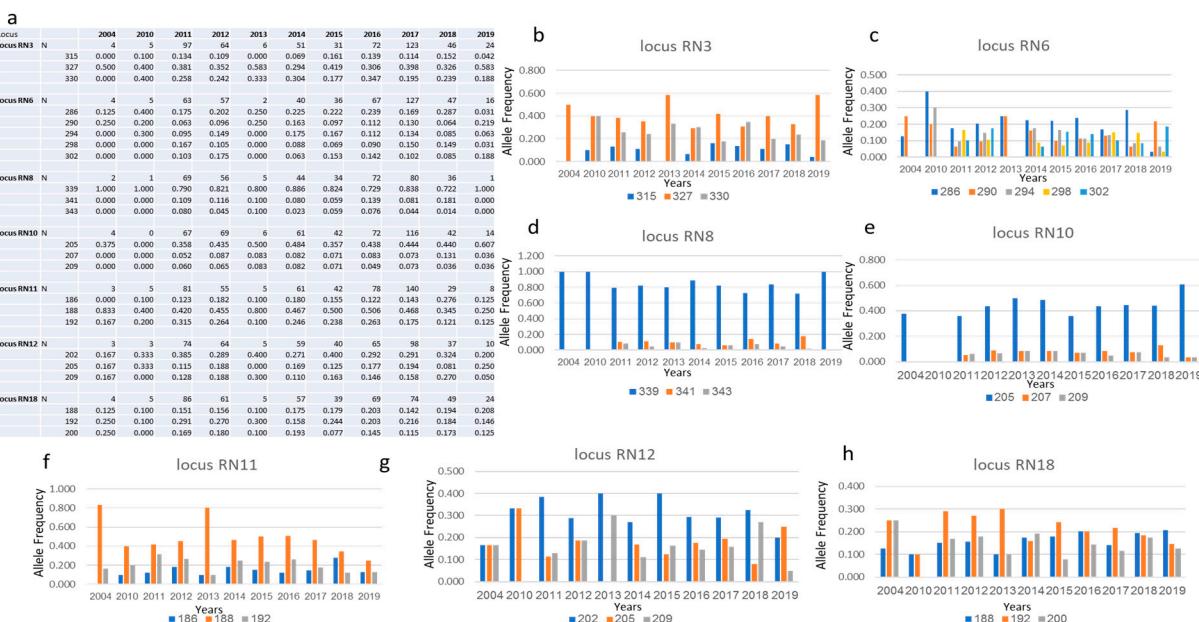

Figure S2: Abundance frequencies for the three most common alleles per locus over the years, a table (a) and graphs (b-h) for each locus (b-h), N=No. of samples.

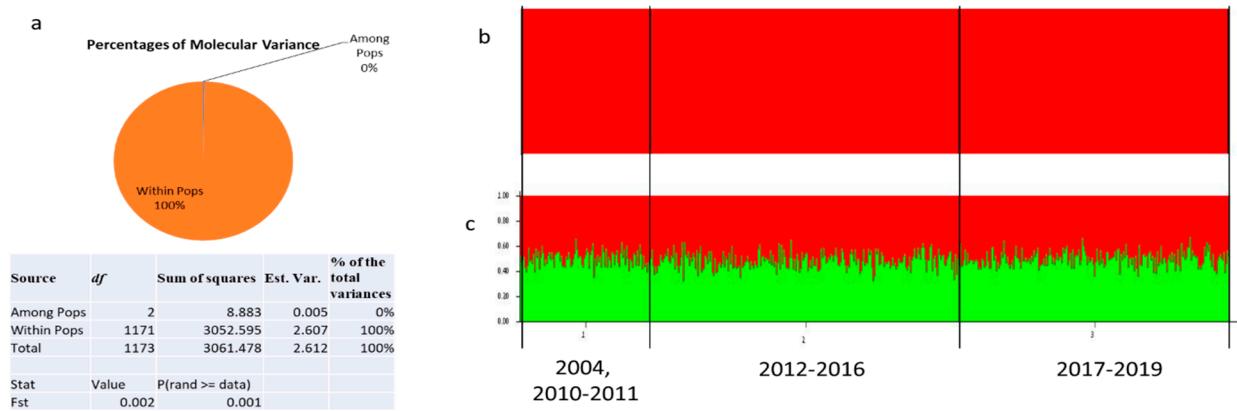

Figure S3: Comparisons between the early collecting period and the late collecting period. a. Hierarchical analysis of molecular variance (AMOVA), a summary graph and table. b and c, Population structure analyses, b. Cluster analysis using BAPS for groups of individuals, c. Cluster analysis using 'STRUCTURE' (optimal K=2).

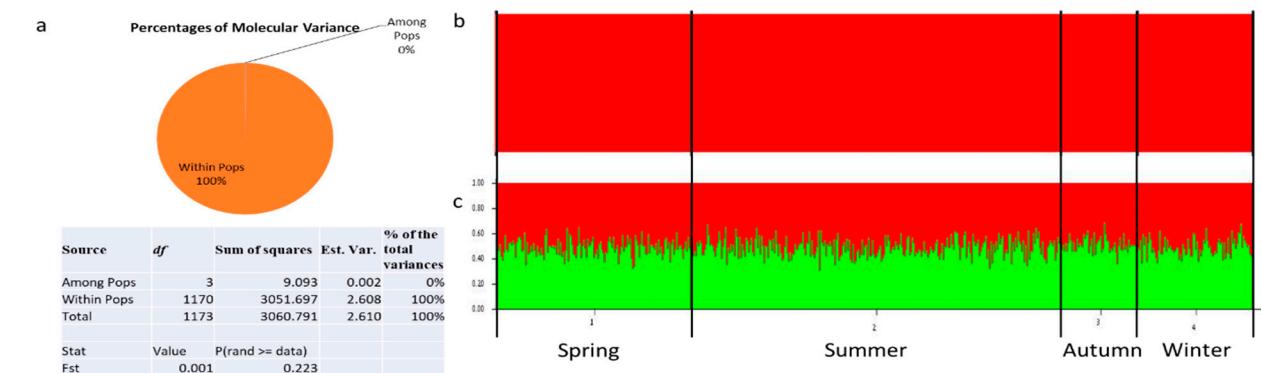

Figure S4: Between seasons comparisons. a. Hierarchical analysis of molecular variance (AMOVA), a summary graph and table. b and c, Population structure analyses, b. Cluster analysis using BAPS for groups of individuals, c. Cluster analysis using 'STRUCTURE' (optimal K=2).

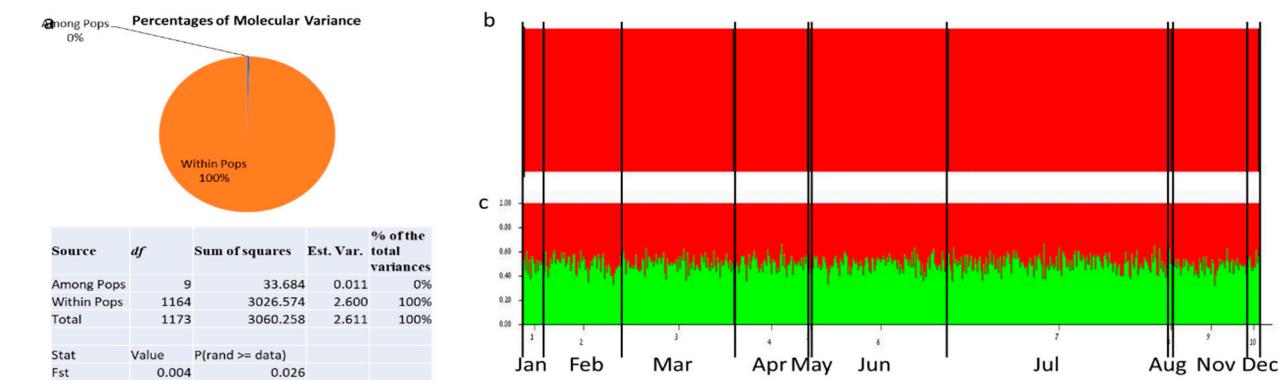

Figure S5 Between months comparisons. a. Hierarchical analysis of molecular variance (AMOVA), a summary graph and table. b and c, Population structure analyses, b. Cluster analysis using BAPS for groups of individuals, c. Cluster analysis using 'STRUCTURE' (optimal K=2).

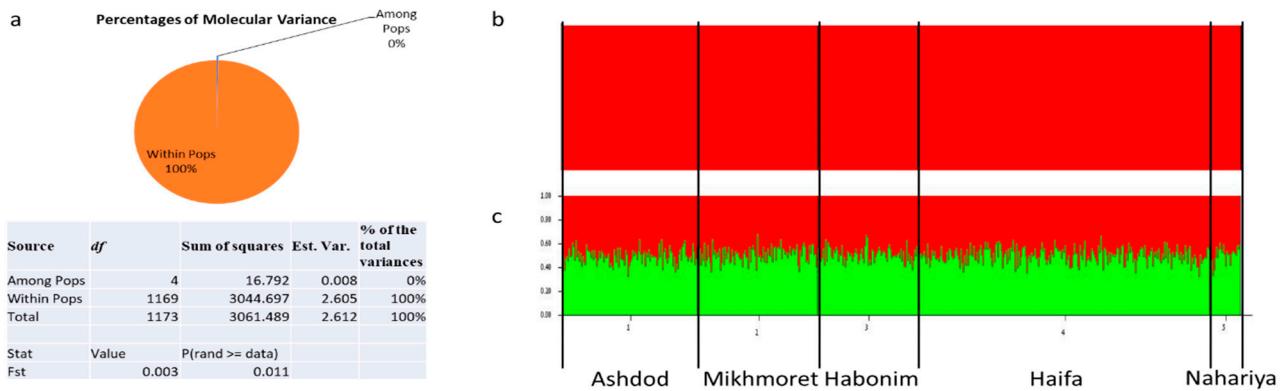

Figure S6: Between collecting regions comparisons. a. Hierarchical analysis of molecular variance (AMOVA), a summary graph and table. b and c, Population structure analyses, b. Cluster analysis using BAPS for groups of individuals, c. Cluster analysis using 'STRUCTURE' (optimal K=2).

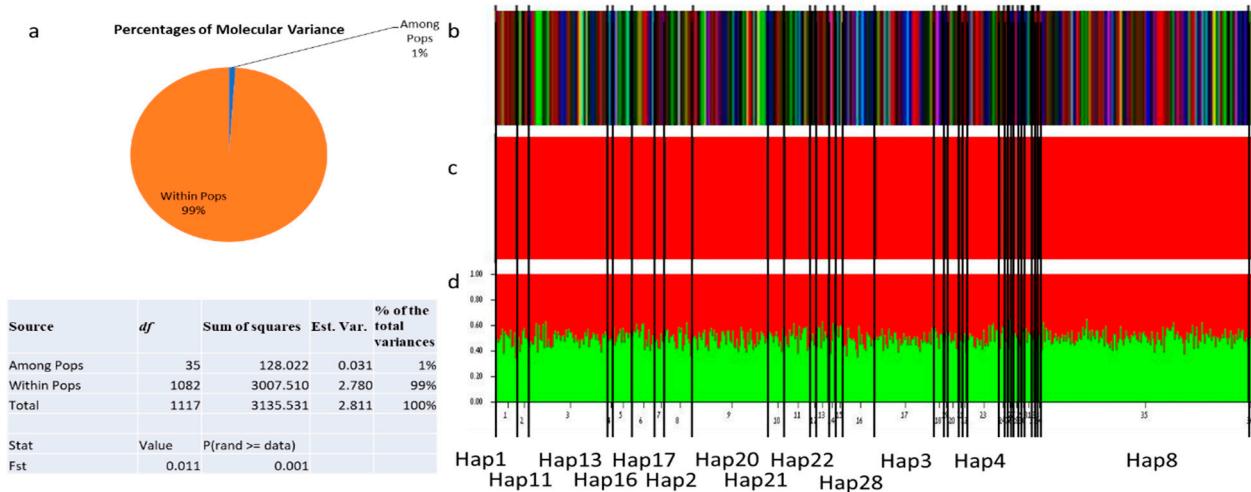

Figure S7: Comparing Between COI haplotypes comparisons. a. Hierarchical analysis of molecular variance (AMOVA), a summary graph and table. b, c and d, Population structure analyses, b. Cluster analysis using BAPS for individuals, c. Cluster analysis using BAPS for groups of individuals. d. Cluster analysis using 'STRUCTURE' (optimal K=2). large haplotypes (Hap) are shown.

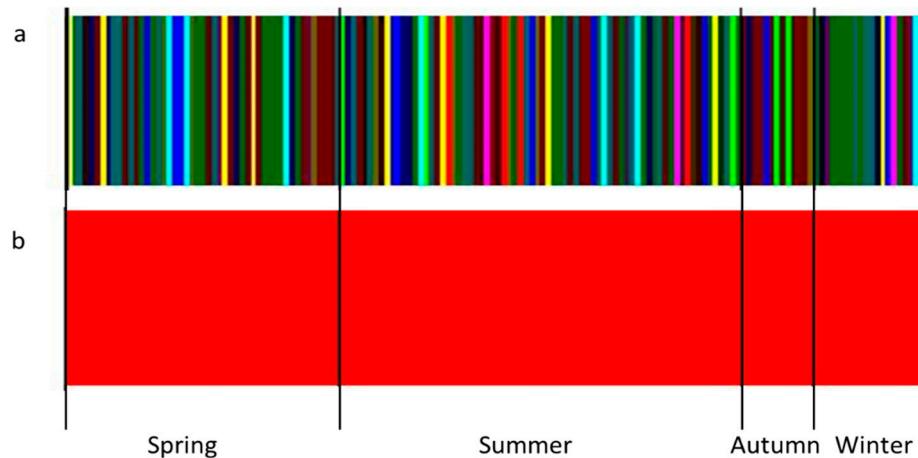

Figure S8: Population structure analyses of samples sharing COI haplotype 8. Between seasons. comparisons a. Cluster analysis of individuals using BAPS, b. Cluster analysis of groups of individuals using BAPS.

Supplementary tables**Table S1:** List of sampling sites, coordinates, years of sampling and number of collected specimens per site.

Sampling Site	Abbr	Coordinates (DD) Long; Lat	Sampling years	No. of specimens
Acre beach	AB	32.925335, 35.066904	2015	2
Ashdod	AS	31.811572, 34.631689	2011, 2015-2019	111
